Safety Information

- Read this owner's manual for your Navigation System carefully before using the system. They contain instructions about how to use the system in a safe and effective manner. Mazda assumes no responsibility for any problems resulting from failure to observe the instructions given in this manual.
- This manual uses pictographs to show you how to use the product safely and to alert you to potential dangers resulting from improper connections and operation. The meanings of the pictographs are explained below. It is important that you fully understand the pictographs and explanations in order to use this manual and the system properly.

Warning

Warning

The presence of this Warning symbol in the text is intended to alert you to the importance of heeding the operation instructions. Failure to heed the instructions may result in severe injury or death.

Warnings

■ Do not keep your eyes fixed on the monitor screen or operate the system while driving.

Do not change the settings and destination locations while driving. Minimize the time spent on viewing the monitor screen and listening to the voice guidance while driving. Operating the system will distract the driver from looking ahead of the vehicle and can cause accidents. Always stop the vehicle in a safe location and use the parking brake before operating the system.

■ Always obey local traffic regulations.

Your guided route may include roads that are not open to vehicles or are closed due to traffic regulations. Comply with the local traffic regulations and take another route.

■ Do not use the unit when it is out of order.

If the unit is out of order (no image, no sound) or in an abnormal state (has foreign matter in it, is exposed to water, is smoking, or smells), then turn it off immediately and consult with an Authorized Mazda Dealer. Using the unit in out-of-order condition may lead to accidents, fires, or electric shocks.

■ Use the proper power supply.

This product is designed for operation with a negative grounded 12 V DC battery system.

■ Leaving children in a vehicle with the ignition key is dangerous.

This could result in someone being badly injured or even killed. They could play with power windows or other controls, or even make the vehicle move. Don't leave the keys in your vehicle with children.

Warning

Warning

The presence of this Warning symbol in the text is intended to alert you to the importance of heeding the operation instructions. Failure to heed the instructions may result in severe injury or death.

Warnings

■ **Do not disassemble.**

Do not disassemble the product or attempt to repair it yourself. If the product needs to be repaired, take it to an Authorized Mazda Dealer.

■ **Never attempt to play the map disc on an audio player.**

Do not attempt to play the map disc on other CD (DVD) player. The loud sound produced may damage your hearing and your speakers.

Safety Information

Caution

Caution

The presence of this Caution symbol in the text is intended to alert you to the importance of heeding the operation instructions. Failure to heed the instructions may result in injury or material damage.

Cautions

■ **Do not use the product where it is exposed to water, moisture, or dust.**

Exposure to water, moisture, or dust may lead to smoke, fire, or other damage to the unit. Make especially sure that the unit does not get wet in car washes or on rainy days.

■ **Keep the voice guidance volume at an appropriate level.**

Keep the volume level low enough to be aware of road and traffic conditions while driving.

■ **Protect the Deck Mechanism.**

Do not insert any foreign objects into the slot of this unit.

■ **This navigation system is designed use for exclusively in automobiles.**

This navigation system should only be installed in an automobile. Do not install it in a ship, aircraft, or any other vehicles except an automobile. Do not use it detached from the vehicle.

■ **Do not insert or allow your hand or fingers to be caught in the unit.**

To prevent injury, do not get your hand or fingers caught in moving parts or in the disc slot. Especially watch out for infants.

SOFTWARE (MAP DISC) LICENCE AGREEMENT

PLEASE READ THIS AGREEMENT CAREFULLY BEFORE USING NAVTECH PRODUCT

This software and data ("Software") is provided for your personal, non-commercial use only. Copyright and other Laws protect it.

By using this Software you agree to the following terms and conditions.

You agree to use this Software for solely personal use or, if applicable, for use in your business' internal operations, and not for service bureau, time-sharing or other similar purposes. Except to save it on your hard drive, you may not copy or reproduce this Software, and may not distribute it in any form, for any purpose. You agree not to disassemble, decompile or otherwise reverse engineer the Software, except to the extent expressly permitted by mandatory laws.

Further Restrictions. You may not use this Software with: (i) any positioning devices, including without limitation, any GPS receivers, compasses, wheel sensors, or any other distance or direction sensors; or (ii) any products, systems or applications installed in or otherwise connected to or in communication with vehicles, or capable of vehicle navigation, positioning, dispatch, real time route guidance, fleet management or similar applications; or (iii) any hand-held computer devices, cell phones or similar mobile devices.

No warranty. This Software is provided to you "as is," and you agree to use it at your own risk. Mazda and its suppliers and licensors make no guarantees, representations or warranties of any kind, express or implied, arising by law or otherwise, including but not limited to, content, quality, accuracy, completeness, effectiveness, reliability, fitness for a particular purpose, usefulness, use or results to be obtained from this Software will be uninterrupted or error-free.

Disclaimer of Warranty: Mazda AND ITS SUPPLIERS AND LICENSORS DISCLAIM ANY WARRANTIES, EXPRESS OR IMPLIED, OF QUALITY, PERFORMANCE, MERCHANTABILITY, FITNESS FOR A PARTICULAR PURPOSE OR NON-INFRINGEMENT. Some States, Territories and Countries do not allow certain warranty exclusions, so to that extent the above exclusion may not apply to you.

Disclaimer of Liability: Mazda AND ITS SUPPLIERS AND LICENSORS SHALL NOT BE LIABLE TO YOU: IN RESPECT OF ANY CLAIM, DEMAND OR ACTION, IRRESPECTIVE OF THE NATURE OF THE CAUSE OF THE CLAIM, DEMAND OR ACTION ALLEGING ANY LOSS, INJURY OR DAMAGES, DIRECT OR INDIRECT, WHICH MAY RESULT FROM THE USE OR POSSESSION OF THE SOFTWARE; OR FOR ANY LOSS OF PROFIT, REVENUE, CONTRACTS OR SAVINGS, OR ANY OTHER DIRECT, INDIRECT, INCIDENTAL, SPECIAL OR CONSEQUENTIAL DAMAGES ARISING OUT OF YOUR USE OF OR INABILITY TO USE THIS SOFTWARE, ANY DEFECT IN THE SOFTWARE, OR THE BREACH OF THESE TERMS OR CONDITIONS, WHETHER IN AN ACTION IN CONTRACT OR TORT OR BASED ON A WARRANTY, EVEN IF Panasonic OR ITS LICENSORS HAVE BEEN ADVISED OF THE POSSIBILITY OF SUCH DAMAGES. Some states, Territories and Countries do not allow certain liability exclusions or damages limitations, so to that extent the above may not apply to you.

Indemnity. You agree to indemnify and hold Mazda and its suppliers and licensors harmless from any liability or loss of any kind arising out of or in connection with any use by you of this Software.

Export Control. You agree not to export from anywhere any part of the Software provided to you or any direct product thereof except in compliance with applicable export laws, rules and regulations.

Governing Law. The above terms and conditions shall be governed by the laws of the Netherlands, without giving effect to (i) its conflict of laws provisions, or (ii) the United Nations Convention for contracts for the international Sale of Goods.

Introduction

Features

This DVD Navigation System combined with the NAVTECH's MAP Disc has following special features:

- **Detailed maps are used.**
Selected destinations will be displayed for easy viewing.
- **Desired places or facilities can be stored in the memory.**

Notes

- DVD audio and video will not work by this unit.
- This unit does not support all Video CD and CD formats.

■ Map Disc

This unit supports only DVD-SDAL-formatted map disc (SEAMLESS) that NAVTECH has specifically designed for this unit. Mazda shall not be liable for any damages caused by using other formatted discs. Make sure to use only the discs specified for this product.

Use This Product Safety

■ Avoid excessive moisture

Do not expose the product to water or excessive moisture. This could cause electrical shorts, fire or other damage.

■ Extremely low or high temperatures may interfere with normal operation

The inside of the vehicle can become very hot or cold when it is parked for extended periods in direct sunlight or in cold places with the engine turned off. The navigation system may not operate normally under such circumstances. Turn off the navigation system until the inside of the vehicle has cooled down or warmed up. If the system does not operate thereafter, consult an Authorized Mazda Dealer.

Navigation System

This navigation system utilizes GPS* satellite signals, Speed sensor and Gyrosensor to track and display your vehicle's current position, and to guide you from your starting point to your destination along a calculated route.

* : GPS (Global Positioning System) is a position detecting system utilizing the signals from GPS satellites deployed by the U.S. Defense Department.

Map Related Issues

Customer Service

If you need help with the operation your Mazda navigation system, want to report a map database error or wish to obtain a new map DVD, please call 1-888-NAV-MAPS (1-888-628-6277).

Latest map DVD

Map content is constantly changing due to the addition of new roads, points of interest, traffic restrictions, etc. While every effort is made to supply the most accurate DVD map, it is not always possible for the DVD map to match the current roadways. Not all map areas are covered to the same level of detail. Some areas that include private roads may not be included on the database. Map DVD's are updated on a regular basis to check availability, please call 1-888-NAV-MAPS (1-888-628-6277).

Notes

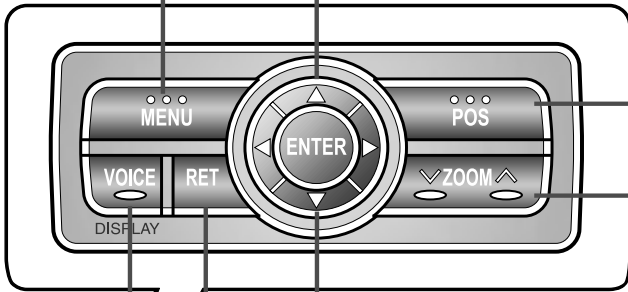

- Please have the map and software version numbers available in advance. This information can be found by using the following procedure:

- ① Press **MENU** on the remote control.
- ② Select **Setup Menu** and press **ENTER**
- ③ Use the remote control joystick to scroll through the menu options, select **System information** and press **ENTER**
- ④ Select **Version** and press **ENTER**
Map and software versions are now displayed.

- For further assistance please refer to pages 30 in the instruction book.

Names and Functions

MENU key
Displays menu.

VOICE key

- Initiates vocal guidance for route maneuvers.
- Adjusts screen quality. (👉 page 16)

Joystick

- Selects items by tilting it up, down, right, and left.
- Scrolls map.

POS (Position) key
Displays your current position.
(👉 page 18)

ZOOM key
Changes the map scale.
(👉 page 19)

ENTER key

- Executes a selected item.
- Displays pop up menu.
(👉 page 14)

RET key
Returns to the previous screen.

Before Use Activation

Insert the map disc into the unit to start the Mobile Navigation System.

Caution

Map Disc

- Only map discs with a NAVTECH DVD-SDAL format that are seamlessly supported can be used with this unit. Use DVD-SDAL-formatted map discs (SEAMLESS) that NAVTECH has specifically designed for this unit.
- Refer to "Handling and Care of Map Discs" to know how to handle a map disc (☞ page 41).

Notes

- The map disc cannot be inserted or ejected while the ignition switch is in the OFF position.
- Remember that the battery can run down if the ignition switch is kept in the ON or ACC position for a long time while the engine not running.

- 1 Turn the ignition switch to the ON position and press **OPEN** to open the display.

Notes

- The display angle can be adjusted by pressing **TILT**.

When the **TILT** is pressed, the display angle changes in stages.

- Press **OPEN** to close the display.

- 2 Slide the front cover down of the unit.

Notes

- The main unit is located in the Center Console(Rear).
- Condensation may form on the optical lens or the map disc inside the unit when the temperature in the vehicle increases in a short time such as when heating the car on a cold day. This condensation may cause malfunctions. If so, then unload the map disc and do not operate the unit for approximately 1 hour. Wipe the condensation off the map disc with a soft cloth. If the unit does not operate correctly after 1 hour, then consult an Authorized Mazda Dealer.

- 3 Insert the map disc with the printed side facing up, and close the front cover by pushing it up.

Opening screen

[Warning] screen

4 Read the [Warning] **ENTER**

- Current position map appears.

Note

The map displayed when you first turn on the unit might show a different area than where your vehicle is currently located. The map display will change to your current area once GPS positioning signals are received.

5 Select a language (Default: English). For details (page 33)

MENU → Select **Setup Menu** → **ENTER** → Select **System Setup** →
ENTER → Select a Language → **ENTER**

Notes

- The following languages are available for the display and voice guidance:
English (Default), French
- Once selected, the system should stay with your language choice.

Removing the Map Disc

When the ignition switch is in the ACC position, slide the front cover, and press **▲ (EJECT)**.

Caution

- Do not get your hand or fingers caught in moving parts or in the disc slot. This can cause injuries. Children are inquisitive, try to install or remove the map disc without infants looking on.
- Keep the front panel of the navigation system closed except when loading or unloading a map disc. Dust can cause malfunction.

Pop Up Menu

Pop Up menu appears when pressing **ENTER** .

This function is mainly used during route searches.

Before Use System Operation Verification

Automatic distance correction

The mobile navigation system uses GPS data for distance correction automatically. It must be properly calibrated for accurate operation. Perform calibration in any of the following circumstances:

1. When using the navigation system for the very first time after installing the system.
2. When the navigation system is transferred to another vehicle.
3. When the tire pressure is changed, tires are rotated, the spare tire is used, tire size, or wheel diameter is changed.
4. When deleting the position correction learning results.

Notes

- Start the driving after closing the opening screen as much as possible. The system is ready to start during opening screen.
- The vehicle position indicator may disappear temporarily after the speed is increased depending on the vehicle model. This is a normal phenomenon indicating that the system is calculating the distance correction.

Resetting automatic distance correction

Drive the vehicle in an open area for approximately 30-minutes at a speed over 20 kph (12.5 MPH) while receiving GPS signals.

Notes

Make sure the GPS reception indicator is illuminated on the map screen.

— GPS reception indicator

Before Use Screen Quality Adjustment

1 VOICE Press and hold

2 ↕ ENTER → ENTER

Screen quality adjustment

Open [Display Menu]

Select ADJ.

Screen off

Select DISP OFF

Screen display turns off. Press any button to return to screen display.

Enter/Select the street name.

Enter/Select the city name.*1

Enter the Zipcode.*2

Select the city name.

Enter/Select the street name.

Select the house number

*1 The memory stores up to 10 cities visited recently, and these city names can be selected.
 *2 Depending on the area, zipcode search may not be possible.

Search method**Shortest Route**

This is the route that reaches the destination in the shortest time.

Avoid Highway

This route reduces the use of highways (if there are highways on the way).

Map

You can designate a destination on the map. (Move the crosshair cursor to the destination.) The following menu will be displayed when **ENTER** is pressed on the map display.
 [Marked Point]
 [Destination]
 [Nearest POI]... (page 24)

Marked Point

Marks the destination resulting from the search.

Note

The results from the route search are not always the shortest routes. You cannot always avoid the highways even if the highway is set to [Avoid Highway]. For example, you will be on the highway when your vehicle is on the highway or when your destination exists on the highway.

Enter the name of the city where your target intersection is.

Enter the name of a street that is part of the intersection.

Enter the other street name that makes up the intersection.

Enter the target city name.

Enter the target name.

Select a desired destination from the list.

Enter the target name.

(The 20 closest destinations to the current position appear (within a radius of about 30 mile.).)

Select a destination from the list of recent destinations.
 (Up to 50 points including the latest starting point are in the system memory.)

Select a destination from the list of Marked points
 (Up to 100 points).

Move the crosshair cursor to the destination and press **ENTER**.

Select **Destination**

Character Entry

To enter the street name, city name, and other.

Select the first several characters on the screen.

BS : Move the cursor to the previous position and delete a character.

OK : The list appears.

● Up to 10 characters can be entered.

Caution

Entry of a street name

Do not enter the type of street such as ST, AVE, PL, LN, or RD as the search may not perform successfully.

● Examples

Street : 33RD ST

Enter by selecting characters:

Select your target in the list, and press **ENTER**

Names of which spelling starts with the entered character appear.

● If a desired name is not in the list, go back to the step 1, and try fewer characters.

To enter the zip code, house number, and other.

Select the characters on the screen.

Space : Space

Select **OK** and press **ENTER**

BS : Move the cursor to the previous position and delete a character.

Precautions/System Performance

Voice Guidance

- The navigation system is just a support system for the driver. The driver should always pay attention to the traffic situation to safely make decisions. You may be unable at times to arrive at your destination due to out-of-date information on a map disc. You should be especially careful when selecting an urgent destination such as a hospital or a police station.
- Your route may sometimes include roads that are not open to vehicles or are closed due to traffic regulations. Please comply with the local traffic regulations.
- Do not change the settings and destination locations while driving. Minimize the time spent viewing the monitor screen and listening to the voice guidance while driving. Operating the system will distract the driver from looking ahead of the vehicle and may cause an accident. Always stop the vehicle in a safe location and use the parking brake before operating the system.

Voice guidance has the following functions:

■ Intersection guidance

- The system voice announces the distance to an upcoming turn and the turning direction.
 - ➔ This guidance function is automatic. Therefore, you do not have to set it, and it cannot be disabled.
- The system vocally announces the distance to an upcoming highway branching point or junction.
 - ➔ This guidance function can be set in the [Setup menu]. For details, see page 32.

When two intersections are close together, the voice guidance may be late.

When two roundabouts are close together, the voice guidance for the second may be late.

Automatic Distance Correction

- The mobile navigation system calculates and indicates the vehicle position on the map by multiplying the speed pulse emitted by the vehicle with a correction coefficient. The speed pulse emitted varies with the type of vehicle and with differences in tire pressure and wear. A different correction coefficient might even be required for the same type of vehicle.
- Using a spare tire in place of the regular one may cause vehicle position deviations.

GPS

GPS is a position detecting system utilizing the signals from GPS satellites deployed by the U.S. Department of Defense. The Mobile Navigation System uses input from three or more satellites and calculates the vehicle position based on the principle of triangulation. The positioning accuracy of the system corresponds to the error display of the GPS which is from about 30 to 200 meters.

- If you are using the system for the first time, or if you have not used it for some time, it takes about 5 minutes (or about 2 minutes in open areas) to calculate your vehicle's position.

■ GPS signal reception is poor in the following places

In tunnels

Among high-rise buildings

Under elevated roads

In wooded areas

- The GPS satellites are controlled by the U.S. Defense Department, which may intentionally lower positioning accuracy. In such cases, there may be vehicle position deviations.
- There may be vehicle position deviations for some time until GPS signals are received after turning on the ignition.

Map Matching

This function compares your vehicle's tracking data with the road data on the map disc, applies dead reckoning to determine the road you are driving on, and displays your vehicle on that road on the map.

- Intelligent map matching addresses the following problems to achieve high accuracy in vehicle positioning.

Position Correction for Elevated Roads

Position accuracy is improved by detecting if the vehicle is running on or under an elevated road.

Position Correction for Parking Garages

Position accuracy is improved by detecting if the vehicle is driving in an elevated or underground parking garage.

High-precision Gyrosensor

A gyro detects turns with an accuracy of 0.05° per second. Combined with a speed sensor, it enables the system to display the current vehicle position even where GPS signals may be blocked.

- Using a spare tire in place of the regular one may cause vehicle position deviations.
- Any difference between the direction which your vehicle actually travels and that shown on the map is automatically eliminated by azimuth correction.

Precautions/System Performance

Positioning Accuracy

In the following situations, your vehicle position may not be displayed correctly on the map. But, as you keep driving, your vehicle position will be automatically corrected utilizing map matching and GPS data.

Running on an elevated road

Making a turn after driving on a long straight road

Running on a steep mountain road

Running on a spiral road

Entering an intersection where a road branches off at a small angle

Running on gridiron layout of roads

Running on a slippery road with tire chains

Snaking on a wide road

When your vehicle is on a turntable with the ignition turned off

After getting off a ferryboat or vehicle train

Route Guide

Although you may encounter the following problems in route guide, there is nothing wrong with the system.

For certain intersection shapes, the upcoming turn or the name of the intersection may not be announced.

For certain intersection shapes, you may be prompted to turn right or left when you should actually stay on the same road.

Voice guidance for the planned route may continue even after you have deviated from that route such as having turned too early.

Some points where the road divides on highways or toll roads may not be displayed or announced.

The Intersection Zoom Map may not always agree with the actual shape of the intersection.

The announced distance to an upcoming turn may differ slightly from reality.

The navigation system is just a support system for the driver. The driver should always pay attention to the traffic situation to safely make decisions. You may be unable to arrive at your destination due to out-of-date information on a map disc. You should be especially careful when selecting an urgent destination such as a hospital or a police station.

Route Search

Although you may encounter the following problems in a route search, there is nothing wrong with the system.

Troubleshooting

Verification First

Note

There may be some problems due to operational errors or mistakes. Please read this manual again and verify that there really is a problem before calling an Authorized Mazda Dealer to ask for repair services.

Symptom	Check point
No picture	<ul style="list-style-type: none">● Check if a fuse has been blown. ➔ Consult an Authorized Mazda Dealer.● Check if the voltage level of the vehicle battery is low. ➔ Recharge the battery or change batteries.
The vehicle position is not correct	<ul style="list-style-type: none">● Check if the vehicle position changed when ACC was set to OFF. When, for example,<ul style="list-style-type: none">● The vehicle was transported by a ferry boat.● The vehicle was rotated on a turn table in a parking lot.● The vehicle was transported by a tow track or other such vehicle. ➔ Drive the vehicle for a while where you are receiving GPS signals.

Symptom	Check point
<p>No GPS symbols are displayed</p>	<ul style="list-style-type: none"> ● GPS signals may not be received because of obstructions. After moving the vehicle away from obstructions, the GPS signals can be received.
<p>The vehicle position is not displayed</p>	<ul style="list-style-type: none"> ● Check if the mode is set to the map mode. <ul style="list-style-type: none"> ➔ Press POS
<p>No voice guidance</p>	<ul style="list-style-type: none"> ● Check if the volume control for the voice guidance is adjusted to zero. ● Check if the vehicle is off the route. <ul style="list-style-type: none"> ➔ Repeat the route search while checking the route guide screen. ● Check if you are driving the vehicle in the wrong direction on the route. <ul style="list-style-type: none"> ➔ Repeat the route search checking the direction of the destination.
<p>Buttons in the remote control do not beep</p>	<ul style="list-style-type: none"> ● Check if [Beep] is set to [Off] ( page 33).
<p>No map displayed (blank screen)</p>	<ul style="list-style-type: none"> ● Check if the disc is wet, scratched, or dewy.

Troubleshooting

Error Messages

If the same message is displayed when this operation is repeated after checking, then consult an Authorized Mazda Dealer.● When the message appears during operation:<ul style="list-style-type: none">➔ If the same message appears after repeating the operation, then consult an Authorized Mazda Dealer.
Please Select another point. * When entering your destination Unable to select Destination.	<ul style="list-style-type: none">● Change your destination and route, and repeat the route search.

Maintenance

Care of the Product

■ Cleaning this product

Use a dry, soft cloth to wipe it.

■ Cautions for cleaning

Never use solvents such as benzene and thinners they may mar the surface of the unit.

■ Map disc

If you require the latest map disc, consult an Authorized Mazda Dealer. For latest map disc information, please refer to "Map Related Issues" on page 9.

Handling and Care of Map Discs

Caution

■ Map Disc

This unit supports only DVD-SDAL-formatted map disc (SEAMLESS) that NAVTECH has specifically designed for this unit. Mazda shall not be liable for any damages caused by using other formatted discs. Make sure to specify that a disc should be exclusively used for this product when you purchase it.

■ How to hold the disc

- Do not touch the underside of the disc.
- Do not make scratches on the disc.
- Do not bend the disc.
- When not in use, keep the disc in the case.

■ Disc Cleaning

- Use a dry, soft cloth to wipe from the center outward.

<Right >

<Wrong >

■ Do not leave discs in the following places:

- Direct sunlight
- Near car heaters
- In dirty, dusty and damp areas
- On seats and dashboards

Zoom-Zoom

All children instinctively know it.

A few adults still remember it.

One unique car company refuses to outgrow it.

In grown-up language, it means the exhilaration and

liberation that come from experiencing sheer motion.

But as usual, children put it much better and simply call it "Go Zoom-Zoom."

We practice it every day.

It's why we build the kind of cars we do.

Zoom-Zoom.

Can we re-awaken it in you today?
