# Safety Information

Before Use

- Read this owner's manual for your Navigation System carefully before using the system. It contains instructions about how to use the system in a safe and effective manner. Mazda assumes no responsibility for any problems resulting from failure to observe the instructions given in this manual.
- This manual uses pictographs to show you how to use the product safely and to alert you to potential dangers resulting from improper connections and operation. The meanings of the pictographs are explained below. It is important that you fully understand the pictographs and explanations in order to use this manual and the system properly.

Warning

## Warning

The presence of this Warning symbol in the text is intended to alert you to the importance of heeding the operation instructions. Failure to heed the instructions may result in severe injury or death.

Warnings

- **Do not keep your eyes fixed on the monitor screen or operate the system while driving.**  
Do not change the settings and destination locations while driving. Minimize the time spent on viewing the monitor screen and listening to the voice guidance while driving. Operating the system will distract the driver from looking ahead of the vehicle and can cause accidents. Always stop the vehicle in a safe location and use the parking brake before operating the system.
- **Always obey local traffic regulations.**  
Your guided route may include roads that are not open to vehicles or are closed due to traffic regulations. Comply with the local traffic regulations and take another route.
- **Do not use the unit when it is out of order.**  
If the unit is out of order (no image, no sound) or in an abnormal state (has foreign matter in it, is exposed to water, is smoking, or smells), then turn it off immediately and consult with an Expert dealer, we recommend an Authorized Mazda Dealer. Using the unit in an out-of-order condition may lead to accidents, fires, or electric shocks.
- **Use the proper power supply.**  
This product is designed for operation with a negative grounded 12 V DC battery system.
- **Do not disassemble.**  
Do not disassemble the product or attempt to repair it yourself. If the product needs to be repaired, take it to an Expert dealer, we recommend an Authorized Mazda Dealer.

Caution

## Caution

The presence of this Caution symbol in the text is intended to alert you to the importance of heeding the operation instructions. Failure to heed the instructions may result in injury or material damage.

Cautions

- **Do not use the product where it is exposed to water, moisture, or dust.**  
Exposure to water, moisture, or dust may lead to smoke, fire, or other damage to the unit. Make especially sure that the unit does not get wet in car washes or on rainy days.
- **Keep the voice guidance volume at an appropriate level.**  
Keep the volume level low enough to be aware of road and traffic conditions while driving.
- **Protect the Deck Mechanism.**  
Do not insert any foreign objects into the slot of this unit.
- **This navigation system is designed exclusively for use in automobiles.**  
This navigation system should only be installed in an automobile. Do not install it in a ship, aircraft, or any other vehicles except an automobile. Do not use it detached from the vehicle.
- **Do not insert or allow your hand or fingers to be caught in the unit.**  
To prevent injury, do not get your hand or fingers caught in moving parts or in the disc slot. Especially watch out for infants.

Operation is subject to the following two conditions;  
(1) this device may not cause interference, and  
(2) this device must accept any interference,  
including interference that may cause undesired operation of the device.

Before Use

# Introduction

Before Use

## Use This Product Safety

### ■ Extremely low or high temperatures may interfere with normal operation

The inside of the vehicle can become very hot or cold when it is parked for extended periods in direct sunlight or in cold places with the engine turned off. The navigation system may not operate normally under such circumstances. Turn off the navigation system until the inside of the vehicle has cooled down or warmed up. If the system does not operate thereafter, consult an Authorized Dealer, we recommend an Authorized Mazda Dealer.

## Navigation System

This navigation system utilizes GPS\* satellite signals, a speed sensor and gyrosensor to track and display your vehicle's current position, and to guide you from your starting point to your destination along a calculated route.

\* : GPS (Global Positioning System) is a position detecting system utilizing the signals from GPS satellites deployed by the U.S. Defense Department.

## Screens

**Screens displayed in this manual may differ from those on the actual display.**

# MEMO

Before Use

# Names and Functions

Before Use

 **Joystick**

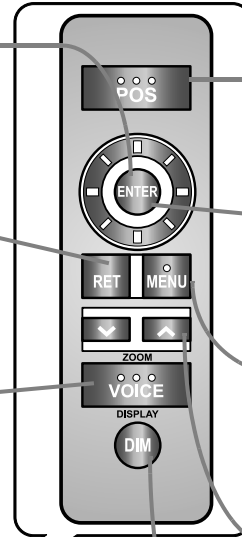

- Selects items by tilting it up, down, right, and left.
- Scrolls map.

 **RET key**

Returns to the previous screen.

 **VOICE key**

- Initiates vocal guidance for route maneuvers.
- Adjusts screen quality. (  page 15)

 **POS**

 **ENTER**

 **MENU**

 **ZOOM**

 **DIM**

**Before Use**

### Switching the Display Mode

When the headlight switch is in the ● or ☰ position, the display switches to night mode.  
Press the DIM key to switch to day mode.  
To return to night mode, press the DIM key again.

# Activation

Insert the map disc into the unit to start the Mobile Navigation System.

## Map Disc

- Refer to “Handling and Care of Map Discs” to know how to handle a map disc (page 56).

## Note

- The map disc cannot be inserted or ejected while the ignition switch is in the OFF position.
- Remember that the battery can run down if the ignition switch is kept in the ON or ACC position for a long time while the engine not running.

Getting started

- 1 Turn the ignition switch to the ON position and press **OPEN** to open the display.

## Note

- This display angle can be adjusted by pressing **TILT**.

When the **TILT** is pressed, the display angle changes in stages.

- Press **OPEN** to close the display.

- 2 Insert the map disc with the printed side facing up.

## Note

- The main unit is located in the glove box compartment.
- Condensation may form on the optical lens or the map disc inside the unit when the temperature in the vehicle increases in a short time such as when heating the car on a cold day. This condensation may cause malfunctions. If so, unload the map disc and do not operate the unit for approximately 1 hour. Wipe the condensation off the map disc with a soft cloth.

If the unit does not operate correctly after 1 hour, consult an Authorized Mazda Dealer.

(CAUTION) screen

### 3 Read CAUTION carefully, and select **Agree** and press **ENTER**.

**ENTER**

- The Current Position screen appears.

#### Note

- You can select the language by select  and press **ENTER**. You can also change the selected language using Language Selection. (  page 47)
- The CAUTION screen remains on the display unless you select **Agree** and press **ENTER**.

Most functions are inhibited while the vehicle is in motion. Please read the handbook for operation instructions. Always obey traffic regulations.

Getting started

## Removing the Map Disc

When the ignition switch is in the ACC position and press **▲ (EJECT)**.

Do not get your hand or fingers caught in moving parts or in the disc slot. This can cause injuries. Children are inquisitive, try to install or remove the map disc without infants looking on.

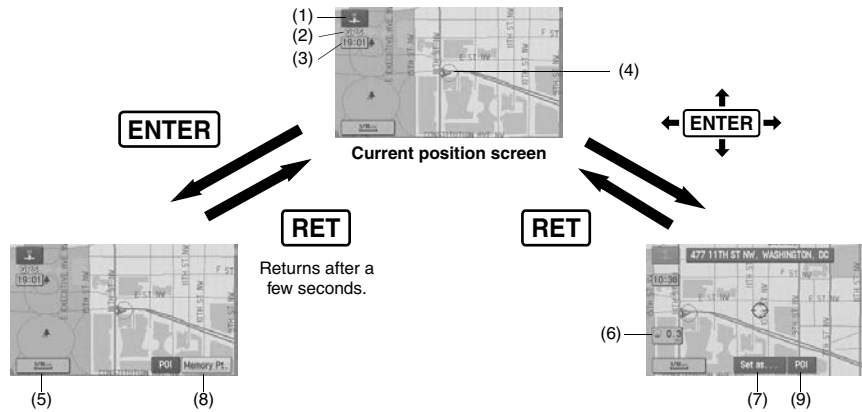

## Buttons on the screen

Select the buttons by using Joystick and press **ENTER**. Colors for unavailable buttons will be pale.

# Screen Names and Functions

## Screens Before Setting Route

Getting started

- (1) **Map Orientation control**  
(☞ page 16)
- (2) **GPS (Global Positioning System) marker**  
(☞ page 50)
- (3) **Clock**  
Clock will be displayed when you set up Clock on Navigation Set Up On.
- (4) **Vehicle marker**  
Shows the current position and direction of your vehicle.
- (5) **Scale display**  
Displays the scale of the map.
- (6) **Distance from current position**  
Displays the distance from the current position to the position pointed by Ⓞ.
- (7) **Set Destination button**  
The destination, memory point or way point will be set at the position pointed by Ⓞ in the scroll screen.
- (8) **Store Memory Point button**  
Stores markers on the map.
- (9) **POI (Point of Interest) Display button**  
(☞ page 26)

## Screens During Route Guidance

- (1) **Distance and Time to Destination display**  
Displays the time\* and distance to the destination or way point. Selecting this will display the next and further information on the way point or time and distance to the destination. (\* Either required time or estimated time arrival)
- (2) **Route display**  
Shows the provided route as a thick blue line.
- (3) **Turn Arrow display**  
Shows the direction to turn at the next junction and the distance to the junction.
- (4) **Route Preferences button**  
(☞ page 30)
- (5) **Current Road Name**  
Shows the name of the road you are currently driving on.

## Menu

Menu appears when pressing **MENU**.

## Screen adjustments and settings

Display Menu screen will be shown when you press **VOICE** (DISP) and hold.

### Note

Display Menu screen will be disappeared when they have been unused during a few seconds.

### ■ Adjusting the screen quality

- Adjusts the screen brightness  
Select "ADJ", and then "BRIGHT". The screen will brighten when scrolling to the right, or darken when scrolling to the left.
- Adjusts the screen contrast  
Select "ADJ", and then "CONTRAST". The screen will lighten when scrolling to the right, or deepen when scrolling to the left.

### Note

- Adjust by scrolling the Joystick to the right and left.
- Restore the adjustment value to the default when selecting "RESET", press **ENTER**.

### ■ Clearing the screen

Select "DISP OFF", press **ENTER** and the screen will disappear.  
The screen will appear again when pressing any buttons.

### ■ Daytime screen/Night screen

When the headlights are on, daytime mode can also be selected (if extra screen certain nighttime conditions). This selection can only be done when the headlights are on. Press **ENTER** to switch between day and night modes.

- The screen can be returned to the daytime screen while the headlights or running lights are on using **DIM**.

Getting started

# Screen change Changing the Map Orientation/Scale

Getting started

Warning

**Do not keep your eyes fixed on the monitor screen or operate the system while driving**

Do not change the settings and destination locations while driving. Minimize the time spent viewing the monitor screen and listening to the voice guidance while driving. Operating the system will distract the driver from looking ahead of the vehicle and may cause an accident. Always stop the vehicle in a safe location and use the parking brake before operating the system.

## Map orientation

- 1 Press **ENTER**
- 2 Select ,  and press **ENTER**

● North Up: Geographic north is up.

● Head Up: The direction you are heading is up.

## Map scale

- 1 **ZOOM**
- The map can be displayed in 13 steps with scales from  to .

● ZOOM OUT: Enlarges the map.

**ZOOM**

● ZOOM IN: Reduces the map. (more detail.)

	Position before change					<Scale bar>				
Imperial display (mile)	1/32 mi	1/4 mi	2 mi	16 mi	128 mi					
Metric display	50 m	500 m	4 km	32 km	256 km

# Quick POI

- You can select one of the Six Categories on the menu or List Categories and then select the POI(s) to be displayed on the map.

**Before Steps**

**ENTER** → ← **ENTER** → → **Select** **POI**

Routing

**Displaying POI(s) on a Map**

**Open the [QUICK POI]**

**Select the categories to be displayed up to a maximum of five.**

● POI icon chart (page 29)  
For categories other than the six displayed, select **List Categories** and select them from the list shown.

→ **Show**

→ **Search Selected POI**

→ **Select the POI you want to find from the listed categories.**

After you make a selection, the point of interest you selected appears on the map.

**Route**: Search POI along the route during the guidance and show the list.

→ **POI Off**

**Local Search**

**Deleting POI Markers**

**Before Steps**

**Displaying POI(s) on a Map** (page 25 above)

**Showing POI Data**

**Display the POI.**

→ **Select the desired POI by moving on top of the POI icon.**

The name of the selected POI appears.

If no data is stored for the selected POI, the POI name is not displayed.

→ **Select **Info.** (Information)**

The POI(s) data is displayed.

# Character Entry

**To enter the street name, city name, and other.**

**Select the first several characters on the screen. (Step 1)**

**Select your target in the list.**

Names of which spelling starts with the entered character appear.

- If a desired name is not in the list, go back to Step 1, and try fewer characters.
- ▲ : Display up to five previous suggestions.
- ▼ : Display the previous suggestions.
- ▶ : Text flow (Right)
- ◀ : Text flow (Left)
- Sort : The order of the displayed list can be changed. (Displayed list varies or may not be displayed depending on what was input.)
- Input Name : Additional text can be input. (Use when inputting additional characters after the list is displayed.)

◀ : Move the cursor to the previous position and delete a character.  
 List : The list appears.

● Examples

**Street: CANAL**  
 Enter by selecting characters:  
C A                  

**Street: MAIN STREET**  
 Enter by selecting characters:  
M A I N S            

**Street: 52nd Ave.**  
 Enter by selecting characters:  
5 2 n d   A

Routing

**To enter the house phone number, and other.**

**Select the characters on the screen.**

**Select** OK

◀ : Move the cursor to the previous position and delete a character.

# Direct Destination Input

Routing

## Direct Destination Input

1

**Position the cursor on your destination on the map**

Scroll the map and change the map scale if necessary.

2

**Select**

Set as...

3

**Select Destination.**

Route calculation will be carried out and the entire route will be displayed on the map.

Select **Way Point** (Way point) to set the address as a way point on your route (page 34). You can set up to 5 way-points per trip.

4

**Select Guide.**

Route guidance begins using displayed route.

**Note**

- If your desired route cannot be found, **Route Opt.** (Route Options) allows the route option settings to be changed. (page 30)
- Selecting **Guide** for five seconds or more will launch the Demo mode.

## Selecting Route

Operate after Step 3 of [Direct Destination Input]

4

The calculation route can be selected from one of three types namely, Quick (the fastest route), Altern. (the standard route), or Short (the shortest route).

5

**Select Info. (Information).**

Details regarding the individual routes (i.e., required time total distance, roads used, etc.)

**Select either Quick, Altern., or Short, and then select Guide when you have decided on the route to be used.**

INFO FOR 3 ROUTES			
	Quick	Altern.	Short
🕒	0h 27m	0h 35m	0h 33m
📏	20 miles	29 miles	20 miles
🛣️	0.0 miles	0.0 miles	0.0 miles
🚧	8.3 miles	19 miles	0.0 miles
🚦	0.0 miles	0.0 miles	0.0 miles
🚚	0.0 miles	0.0 miles	0.0 miles

- You can alter the map display conditions, the route guidance conditions and show the system information.

Warning

■ **Stop your vehicle before the following operations.**

Do not change the settings and destination locations while driving. Minimize the time spent viewing the monitor screen and listening to the voice guidance while driving. Operating the system will distract the driver from looking ahead of the vehicle and may cause an accident. Always stop the vehicle in a safe location and put the parking brake on before operating the system.

# Navigation Set Up

## User Setting

Open the [USER SETTINGS] screen

### Map Color

Select a screen color from 1 to 3 options.

### Map Mode

- Auto : The display will automatically switch between Day and Night illumination mode when the headlights are turned off and on respectively.
- Day : The display will be presented in Day illumination mode regardless of whether the headlights are on or off.
- Night : The display will be presented in Night illumination mode regardless of whether the headlights are on or off.

### Distance

Select the distance unit from km or Miles.

### Average Speed

Set the average speed for each road to be driven. (This function sets the standard speed (average vehicle speed for each route) used for calculating the estimated arrival time when calculating the route time.)

◀ ▶ Average speed setting  
Default :Changes back to default

### Road Restriction Warnings

The display of warnings during route guidance when passing through areas with traffic restrictions can be turned on or off.

Navigation Set Up

# Navigation Set Up

User Setting

Navigation Set Up

Open the [USERSETTINGS] screen

## Arrival Time

The time which is displayed until reaching the destination or a way point can be set as an estimated arrival time or the remaining time.

Select to display the estimated arrival time, or to display the remaining time.

## Keyboard Layout

The layout of input keys can be selected as or .

## Clock

Allows selection of whether clock is to be displayed.

## Beep

Allows selection of whether beep will sound.

# Navigation Set Up Quick POI Selection

This function allows you set the categories on the area displayed when the (Point of Interest) menu is selected on the map. Quick POI enables you store up to six different kinds of categories which you use most regularly.

## Open the [QUICK POI SELECTION] screen

Select the button for Quick POI storage.

### Note

- Select the category to be changed

**Default** : This button allows you to restore the factory settings.

Select a category.

Once selected, subcategories will be displayed.

**List All Categories** : Subcategories from all of the individual categories will be displayed together.

Select the subcategories to be displayed on the map.

Repeat the above steps to add further POI markers displayed on the menu.

# Navigation Set Up

## Calibration

This function allows you to correct any error in the position or direction of your vehicle display.

Before Steps

MENU

ENTER

select

Navigation Set Up

### Adjusting Current Position and Direction

ENTER

select

Position / Direction

ENTER

Open the [Calibrate Position] screen

Move to the correct position and select **ENTER**.

Use or to adjust the direction in which you are heading, and select **OK**.

Navigation Set Up

### Set Clock

The current time is set by a GPS satellite.

ENTER

Open the

### Note

Minutes are shown under the following conditions:  
● Driving at night  
● Daylight saving time

### Distance

This function automatically corrects any error in the display of the current position that might occur after tire replacement.

ENTER

select

Distance

ENTER

You will have to drive about 6 miles (10 km) before distance correction is complete.

### Map Version

The map version is updated.

ENTER

Map and so

ENTER → ENTER select Calibration → ENTER

### Set Clock

The current time is set using this function. Since time notification is provided by a GPS satellite.

ENTER select Set Clock → ENTER

Open the [SET CLOCK] screen

Select **24H** if you prefer 24-hour display; **12H** for 12-hour display.

Select **+1 hour** to move the setting ahead by one hour, and similarly, select **-1 hour** to move it back by one hour.

How to exit **OK**.

#### Note

Minutes are adjusted by the GPS, however, it is necessary to adjust hours under the following conditions:

- Driving across different time zones
- Daylight saving time start and end

### Map Version

The map and software version numbers can be confirmed using this function.

ENTER select Map Version → ENTER

Map and software versions are now displayed.

# Navigation Set Up Restore System Defaults

This function replaces all the settings in the mobile navigation system with the initial default settings.

## Open the [SYSTEM DEFAULTS] screen

Select **OK**.

If you execute Restore System Defaults, all of your stored setting data will be deleted.

Navigation Set Up

## Language

You can change the language of the menu and the voice guidance.

### Open the [LANGUAGE] screen

Select your preferred language from the list.

Navigation Set Up

# Navigation Set Up Map Configuration

Navigation Set Up

Open the [MAP CONFIGURATION] screen

## Map Screen

Select single or dual map display.

### Single map

### Dual map

## Turn Guidance

### Enlarged Junction Diagram

Before a fork in the road, an enlarged diagram of the junction automatically appears in a second screen. This is to make route guidance even clearer.

During route guidance, an enlarged diagram of an approaching fork or junction appears. When you drive past the junction, the enlarged diagram disappears.

During route guidance, an enlarged diagram of the freeway automatically appears in a second screen as you approach a fork on the freeway. This is to make route guidance even clearer.

### Turn List

While using route guidance, the directions for the next junction where you have to turn are shown as Turn List.

### Turn Arrow

While using route guidance, the directions for the next junction where you have to turn are shown as Turn Arrow.

## Junction Detail

Select whether the Enlarged Junction diagram screen is displayed automatically.

## Freeway Information

Allows selection of whether the guidance screen is to be displayed while driving on a freeway.

# Precautions/System Performance

## Voice Guidance

Warnings

- The navigation system is just a support system for the driver. The driver should always pay attention to the traffic situation to safely make decisions. You may be unable at times to arrive at your destination due to out-of-date information on a map disc. You should be especially careful when selecting an urgent destination such as a hospital or a police station.
- Your route may sometimes include roads that are not open to vehicles or are closed due to traffic regulations. Please comply with the local traffic regulations.
- Do not change the settings and destination locations while driving. Minimize the time spent viewing the monitor screen and listening to the voice guidance while driving. Operating the system will distract the driver from looking ahead of the vehicle and may cause an accident. Always stop the vehicle in a safe location and use the parking brake before operating the system.

Voice guidance has the following functions:

### ■ Intersection guidance

- The system voice announces the distance to an upcoming turn and the turning direction.
  - ➔ This guidance function is automatic. Therefore, you do not have to set it, and it cannot be disabled.
- The system vocally announces the distance to an upcoming highway branching point or junction.

When two intersections are close together, the voice guidance may be late.

When two roundabouts are close together, the voice guidance for the second may be late.

If necessary

## GPS

GPS is a position detecting system utilizing the signals from GPS satellites deployed by the U.S. Department of Defense. The Mobile Navigation System uses input from three or more satellites and calculates the vehicle position based on the principle of triangulation. The positioning accuracy of the system corresponds to the error display of the GPS which is from about 30 to 200 meters.

- If you are using the system for the first time, or if you have not used it for some time, it takes about 5 minutes (or about 2 minutes in open areas) to calculate your vehicle's position.

### ■ GPS signal reception is poor in the following places

In tunnels

Among high-rise buildings

Under elevated roads

In wooded areas

- The GPS satellites are controlled by the U.S. Defense Department, which may intentionally lower positioning accuracy. In such cases, there may be vehicle position deviations.
- There may be vehicle position deviations for some time until GPS signals are received after turning on the ignition.

If necessary

## Map Matching

This function compares your vehicle's tracking data with the road data on the map disc, applies dead reckoning to determine the road you are driving on, and displays your vehicle on that road on the map.

- Intelligent map matching addresses the following problems to achieve high accuracy in vehicle positioning.

### Position Correction for Elevated Roads

Position accuracy is improved by detecting if the vehicle is running on or under an elevated road.

### Position Correction for Parking Garages

Position accuracy is improved by detecting if the vehicle is driving in an elevated or underground parking garage.

### High-precision Gyrosensor

A gyro detects turns with an accuracy of 0.05° per second. Combined with a speed sensor, it enables the system to display the current vehicle position even where GPS signals may be blocked.

- Using a spare tire in place of the regular one may cause vehicle position deviations.
- Any difference between the direction which your vehicle actually travels and that shown on the map is automatically eliminated by azimuth correction.

# Precautions/System Performance

## Positioning Accuracy

In the following situations, your vehicle position may not be displayed correctly on the map. But, as you keep driving, your vehicle position will be automatically corrected utilizing map matching and GPS data.

Running on an elevated road

Making a turn after driving on a long straight road

Running on a steep mountain road

Running on a spiral road

Entering an intersection where a road branches off at a small angle

Running on gridiron layout of roads

Running on a slippery road with tire chains

Snaking on a wide road

When your vehicle is on a turntable with the ignition turned off

After getting off a ferryboat or vehicle train

If necessary

## Route Guide

Although you may encounter the following problems in route guide, there is nothing wrong with the system.

For certain intersection shapes, the upcoming turn or the name of the intersection may not be announced.

For certain intersection shapes, you may be prompted to turn right or left when you should actually stay on the same road.

Voice guidance for the planned route may continue even after you have deviated from that route such as having turned too early.

Some points where the road divides on highways or toll roads may not be displayed or announced.

The Intersection Zoom Map may not always agree with the actual shape of the intersection.

The announced distance to an upcoming turn may differ slightly from reality.

The navigation system is just a support system for the driver. The driver should always pay attention to the traffic situation to safely make decisions. You may be unable to arrive at your destination due to out-of-date information on a map disc. You should be especially careful when selecting an urgent destination such as a hospital or a police station.

## Route Search

Although you may encounter the following problems in a route search, there is nothing wrong with the system.

# Troubleshooting

## Verification First

### Note

There may be some problems due to operational errors or mistakes. Please read this manual again and verify that there really is a problem before calling an Expert Dealer, we recommend an Authorized Mazda Dealer to ask for repair services.

Symptom	Check point
<p><b>No picture</b></p>	<ul style="list-style-type: none"> <li>● Check if a fuse has blown.                             <ul style="list-style-type: none"> <li>➔ Consult an Expert Dealer, we recommend an Authorized Mazda Dealer.</li> </ul> </li> <li>● Check if the voltage level of the vehicle battery is low.                             <ul style="list-style-type: none"> <li>➔ Recharge the battery or change batteries.</li> </ul> </li> </ul>
<p><b>Display does not open or close</b></p>

# Maintenance

## Care of the Product

### ■ Cleaning this product

Use a dry, soft cloth to wipe it.

### ■ Cautions for cleaning

Never use solvents such as benzene and thinners, they could mar the surface of the unit.

### ■ Map disc

If you require the latest map disc, consult an Expert Dealer, we recommend an Authorized Mazda Dealer.

## Handling and Care of Map Discs

### ■ How to hold the disc

- Do not touch the underside of the disc.
- Do not scratch the disc.
- Do not bend the disc.
- When not in use, keep the disc in the case.

Label side

### ■ Disc Cleaning

- Use a dry, soft cloth to wipe from the center outward.

<Right>

<Wrong>

### ■ Do not leave discs in the following places:

- Direct sunlight
- Near car heaters
- In dirty, dusty and damp areas
- On seats and dashboards

If necessary
