SCHEDULED MAINTENANCE

Follow Schedule 1 if the vehicle is operated mainly where none of the following conditions apply:

- Repeated short-distance driving
- Driving in dusty conditions
- Driving with an extended use of brakes
- Driving in areas where salt or other corrosive materials are being used
- Driving on rough or muddy roads
- Extended periods of idling or low-speed operation
- Driving for long periods in cold temperatures or extremely humid climates
- Towing a trailer or using a car-top carrier

If any do apply, follow Schedule 2 (Canada and Puerto Rico residents follow Schedule 2).

NOTE: After the described period, continue to follow the described maintenance at the recommended intervals.

SCHEDULE 1

I: Inspect and repair, clean, adjust, or replace if necessary (Oil-permeated air filter cannot be cleaned using the air-blow method)

R: Replace L: Lubricate

	Maintenance Interval (Months or miles [km], whichever comes first)													
Maintenance Item	Months	6	12	18	24	30	36	42	48	54	60	66	72	
	x 1,000 Miles	7.5	15	22.5	30	37.5	45	52.5	60	67.5	75	82.5	90

²According to state and federal regulations, failure to perform maintenance on these items will not void your emissions warranties. However, Mazda recommends that all maintenance services be performed at the recommended time or miles (kilometers) period to ensure long-term reliability.

³If this component has been submerged in water, the oil should be changed.

⁴The wheel lug nuts must be retightened to the proper specifications at 500 miles (800 km) of new vehicle operation, at any wheel change, or at any other time the wheel lug nuts have been loosened. Refer to *Wheel lug nut torque specifications* in the *Tires*, *Wheels and Loading* chapter for the proper lug nut torque specification.

climates.

³According to state and federal regulations, failure to perform maintenance on these items will not void your emissions warranties.

However, Mazda recommends that all maintenance services be performed at the recommended time or miles (kilometers) period to ensure long-term reliability.

⁴If this component has been submerged in water, the oil should be changed.

⁵The wheel lug nuts must be retightened to the proper specifications at 500 miles (800 km) of new vehicle operation, at any wheel change, or at any other time the wheel lug nuts have been loosened. Refer to *Wheel lug nut torque specifications* in the *Tires, Wheels and Loading* chapter for the proper lug nut torque specification.

OWNER MAINTENANCE SCHEDULE

The owner or a qualified service technician should make these vehicle inspections at the indicated intervals to ensure safe and dependable operation.

Bring any problem to the attention of an authorized Mazda dealer or qualified service technician as soon as possible.

When refueling

- Brake and clutch fluid level
- Engine coolant level
- Engine oil level
- Washer fluid level

At least monthly

• Tire inflation pressures

At least twice a year (for example, every Spring and Fall)

- Automatic transmission fluid level
- Power steering fluid level

Retightening lug nuts

- Retighten the lug nuts to the specified torque at 500 miles (800 km) after any wheel disturbance (tire rotation, changing a flat tire, wheel removal, etc.).
- Refer to Wheel lug nut torque specifications in the Tires, Wheels and Loading chapter for the proper lug nut torque specification.
