SMART START GUIDE
mazda **CX-3**

zoom-zoom

This easy-to-use **SMART START GUIDE** provides important information about some unique features and functions of your new vehicle. Additional features are available at **mymazda.com** and the **MyMazda app -> VEHICLE HOW TO**. Complete information on features and functions is available in your Owner's Manual.

TABLE OF CONTENTS

DRIVER'S VIEW

PASS AIRBAG OFF

[1] This indicator light turns on to remind you that the front passenger's front/side airbags and seat belt pretensioner will not deploy during a collision. The reason for this is that the sensor has determined that an adult is not sitting in the front passenger seat.

NOTE: If a smaller adult sits on the front passenger seat, the sensors

might detect the adult as being a child depending on the person's physique and may deactivate the front passenger's front/side airbags and seat belt pretensioner. Always wear your seat belt and secure children in the rear seats in appropriate child restraints. See the Owner's Manual for important information on this safety feature.

ADVANCED KEYLESS ENTRY

(IF EQUIPPED)

ADVANCED KEYLESS ENTRY SYSTEM

This system allows you to lock and unlock the doors without taking the key out.

CAUTION:

Make sure the engine is OFF and take the key with you when leaving the vehicle.

When locking the doors using the inside door switches, be careful not to leave the key inside the vehicle to prevent lock-out.

While Carrying the Advanced Key:

- Unlock the driver's door by pushing the driver's door request switch once.

- Unlock all doors by pushing the driver's door request switch once or twice (depending on personalization setting, p. 10) OR by pushing the passenger's door request switch once.

- Lock all doors (and liftgate) by pushing any request switch once.

- To open the liftgate from outside the vehicle: Open the power liftgate using the liftgate opener.

NOTE: Only vehicles equipped with the Advanced Keyless Entry System allow you to lock and unlock the doors with the door request switches (without taking the key out of your purse or pocket).

Vehicles equipped with the Keyless Entry System do not have request switches on the doors/liftgate. To lock and unlock the doors, the corresponding transmitter button must be pushed.

Refer to your Owner's Manual for additional details about "Personalization Features".

Lock

Unlock

Liftgate opener
STARTING THE ENGINE

STARTING THE ENGINE
WITH ACCELERATED WARM-UP SYSTEM (AWS)

The CX-3 is equipped with SKYACTIV combustion technology. This technology includes AWS for optimal emission performance during cold-start conditions.

While Carrying the Advanced Key:

START/STOP ENGINE button

- START THE ENGINE by pushing the START/STOP ENGINE button while pushing the brake pedal.

- WHAT WILL YOU NOTICE? On start-up, the engine speed and sound are elevated (1500 RPM) for less than one minute to quickly bring the catalyst to efficient operating temperature. The RPM will reduce to idle once the temperature is achieved. This is normal engine operation under cold-start conditions.

- WHAT DOES THIS DO? This reduces emissions and allows Mazda to improve efficiency.

- SHUT THE ENGINE OFF by making sure the vehicle is in Park and setting the electric parking brake, then push the START/STOP ENGINE button.

- ACTIVATE ACCESSORIES (ACC) by pushing the START/STOP ENGINE button once without pushing the brake pedal.

- TURN THE IGNITION TO THE ON POSITION by pushing the START/STOP ENGINE button twice without pushing the brake pedal.

EMERGENCY ENGINE STOP

Pushing and holding the START/STOP ENGINE button or repeatedly pushing the START/STOP ENGINE button while the engine is running will turn the engine OFF. Use only in case of an emergency.

NOTE: You can drive the vehicle during AWS activation; there is no need to wait. The engine may not start if the key cannot be detected. The key indicator light may flash RED or "Key not detected" may be displayed if the key is placed in the cup holder.

If the START/STOP ENGINE button indicator light flashes AMBER, this could indicate a problem with the engine starting system. You may not be able to start the engine or switch the ignition to ACC or ON. Have your vehicle inspected at an Authorized Mazda Dealer as soon as possible.

TIRE PRESSURE MONITORING SYSTEM

TIRE PRESSURE MONITORING SYSTEM (TPMS)

For your safety, the CX-3 is equipped with TPMS that detects low tire pressure in one or more tires. If the tire pressure starts getting low in one or more tires, the system alerts the driver by turning on a light in the instrument cluster (p. 40-41) and sounding an alarm.

TPMS "Set Switch"

WHAT TO DO? Don't ignore the TPMS warning light. Stop and check your tire pressure (when tires are cold) and inflate the tires to the proper pressure. Properly inflated tires are safer, last longer, and increase fuel economy.

In the following cases, the TPMS must be "initialized" so the system can operate normally.

- The tire pressure is adjusted (up or down) in one or more tires.

- A tire rotation is performed.

- Any tire or wheel is replaced.

- The vehicle's battery is disconnected, replaced or completely dead.

INITIALIZATION PROCESS
(TPMS WARNING LIGHT IS ILLUMINATED)

1 Park the vehicle in a safe place and firmly apply the parking brake.

2 Let the tires cool, then adjust the tire pressure to the specified pressure (see tire label located on the driver's side door jamb area) on all four tires.

3 Switch the ignition ON, but leave the vehicle parked.

4 Push and hold the TPMS "Set Switch" (left side of dash) until the TPMS warning light in the instrument cluster flashes twice and a beep sound is heard once.

NOTE: Drastic changes in temperature or altitude can affect the air pressure in the tires and may cause the TPMS warning light to turn on. Verify the tire pressures when driving through extreme temperature or altitude changes.

SEATS

FOLDING REAR SEATS

Push the button to fold down the seatback.
(Left rear seat release is shown.)

NOTE: For tall drivers and front passengers who adjust the front seats all the way back, the headrests on the rear seats need to be removed when folding the rear seatbacks down. If not removed, the rear headrest will push into the front seatback. In order to remove the headrest from the rear seat, the seatback needs to be tilted slightly forward.
Unlocked

Locked

RETURNING REAR SEATS TO UPRIGHT POSITION:

1 Install the headrest (if removed).

2 Raise the seatbacks until they lock into position.

3 Pull on the top of the seatbacks to make sure they are locked.

4 Check that all seat belts are routed properly for passenger use.

MEMORY SEAT SWITCH (IF EQUIPPED)

To Program the Driver's Seat and Active Driving Display position/brightness Memory Position.

1 Turn the ignition switch off.

2 Adjust seat to the desired position using the slide/tilt and recline switches. Adjust the Active Driving Display position/ brightness using the MAZDA CONNECT settings. Push and hold the memory seat SET button until a beep is heard.

Memory seat switch

3 Within 5 seconds:

- To program a memory seat button, push and hold memory button 1 or 2 until a beep sound is heard.

- To program a key, push and hold the key unlock button until a beep sound is heard (two registered keys can be programmed).

FUEL ECONOMY:

To achieve the best fuel economy, visit www.fueleconomy.gov for more information.

MAZDA CONNECT INFOTAINMENT SYSTEM

MAZDA CONNECT is designed to be operated using one of the following three interfaces:

1 The commander switch (p. 12).

2 Voice control (p. 13).

3 The touchscreen (if the vehicle is moving at speeds below 5 mph).

ENTERTAINMENT

This section is for music features. AM, FM, XM, Bluetooth®, Aha, Pandora, Stitcher, USB, CD, and AUX are available.

APPLICATIONS

This section is for vehicle maintenance features and driver's information.
COMMUNICATION

This section is for phone calls and text messaging (SMS) features. A MAZDA CONNECT-compatible Bluetooth® mobile phone needs to be connected.

NAVIGATION

Mazda Navigation requires an SD card. Otherwise, the compass is displayed.

SETTINGS

This section lets you customize your Mazda settings. See pages 10-11 for more information.

NOTE: In the interest of safety, the touchscreen is disabled at speeds over 5 mph. Use the commander switch or voice control to operate the infotainment system.

To purchase SD cards, please visit the nearest Authorized Mazda Dealer.

For assistance with MAZDA CONNECT, visit www.mazdausa.com/mazdaconnect or call 800-430-0153.

MAZDA CONNECT SETTINGS

MAZDA CONNECT SETTINGS

To view the different setting screens:

1 Move the commander switch (p. 12) to the left or right to change tabs.

2 Turn the commander switch to scroll down the list.

3 When the desired tab is highlighted, push the commander switch.

NOTE: If there is a scroll bar on the right side, there are more items farther down.

**ACTIVE DRIVING
DISPLAY SETTINGS**

SOUND SETTINGS

SAFETY SETTINGS
CLOCK SETTINGS

The **Clock** tab can be used to adjust the time, sync the clock with GPS, and change between 12-hour and 24-hour clock.

DISPLAY SETTINGS

Select **Turn Display Off** to only turn the display off. Touch the screen or use the commander switch to turn the display back on.

Use the **System** tab to change the brightness of the display between Day (bright), Night (dim), and Auto (switches from Day to Night when headlights are turned ON). See illumination dimmer (p. 40-41).

VEHICLE SETTINGS

SYSTEM SETTINGS

BLUETOOTH® DEVICE SETTINGS

COMMANDER SWITCH

COMMANDER SWITCH

The commander switch is the primary means for operating MAZDA CONNECT. It allows you to keep your eyes on the road while providing tactile feedback as you operate MAZDA CONNECT via the commander switch and buttons.
Five buttons are placed naturally beneath the fingers and mirror the on-screen icons for a more intuitive operation. Select a button around the commander switch to operate the desired function.

The following items can be stored as Favorites:

- 50 stations total for AM, FM and XM.
- 50 contacts in the system phonebook.
- 50 points of interest in navigation. (To edit or delete HOME, select HOME and push and hold the commander switch until the Edit/Delete HOME screen appears.)

Select an item on the screen by:

1 Moving the switch up or down, left or right, and/or turning the dial to move the cursor to the desired on-screen location.

2 Pushing the switch down (ENTER) to select your choice on the screen.

VOICE CONTROL

VOICE CONTROL

Voice control is activated by pushing the TALK 💬 button on the steering wheel and speaking a command. Voice commands usually contain a verb (action word) followed by a noun. Common verbs are "Go to" and "Play". See Audio Controls for some common voice commands (p. 35).

Talk

Voice control switch

USEFUL COMMANDS:

"CALL <phonebook contact name> <mobile/home/work>"
(Example: "Call John Smith mobile")

"DIAL <number>" (Example: "Dial 911")

"REDIAL" – This command makes a call to the last person you called (the top person listed on Outgoing call history).

"CALLBACK" – This command makes a call to the last person who called you (the top person listed on Incoming call history).

"DRIVE HOME" / "NAVIGATE HOME" / "TAKE ME HOME"
Any of these HOME commands sets the destination to your home address.

NOTE: Navigation commands are available only when navigation map is displayed.

OTHER COMMON VOICE COMMANDS:

"HELP" – This command lets you know the available VR commands per display.

"TUTORIAL" – MAZDA CONNECT overall introduction.

"ADDRESS" – This is a useful command for navigation to enter an address.

IMPORTANT:
• Make sure to say your command AFTER the beep sound.
• You can skip the system's prompt anytime by pushing the TALK 💬 button.
• You can end your voice recognition session either by pushing the hang-up ☎ button on the steering wheel or by operating the commander switch.

BLUETOOTH®

PAIRING YOUR BLUETOOTH® PHONE OR AUDIO DEVICE

Pairing instructions:

1 Manually turn on Bluetooth® on your mobile or audio device.

2 Select **Communication** from the Home screen.

3 Select **Settings**.

4 Turn Bluetooth® ON by selecting **Bluetooth**®.

5 Select **Add New Device**, and switch to the operation on your mobile device.

6 On your mobile device, select "Mazda".

7 Verify the displayed six-digit code both on the display and on your mobile device.

IMPORTANT: If your mobile device was once paired to another Mazda vehicle in the past, that "Mazda" should be deleted from the Bluetooth® device list on your mobile device.

For phones compatible with SMS and MMS:

8 On your mobile device, select "Allow" to let MAZDA CONNECT download your phonebook and text messages (SMS).

9 For iPhone, go to Settings > Bluetooth®. Select the "i" information icon for the connected device. Switch "Show Notifications" to ON.

NOTE:
- For safety reasons, you cannot pair a phone while driving.
- For customer service and device compatibility, visit **www.mazdausa.com/mazdaconnect** or call **800-430-0153**.
- When in range of another Wi-Fi device, the Bluetooth® connection between your phone and the system may disconnect for a short time if you have Wi-Fi enabled.
- Turn off Wi-Fi on your mobile device if needed.

TO MAKE OR RECEIVE A HANDS-FREE CALL

Talk

Receive/swap **Hang up**

Voice control switch

Push 📞 button: To receive/swap a call

Push 🗣 button: To talk

• To start a voice recognition session.
• To skip the voice recognition system voice prompts.

Push ☎ button: To end/reject a call

• To end voice recognition session.

Automatic Bluetooth® Reconnection:
• On engine start, the last connected device will automatically be re-connected after several seconds.
• To switch phones, go to Device Settings and select Bluetooth®.

For a stable Bluetooth® connection:
• Make sure there is no metal object nor any obstacle blocking Bluetooth® signal between the vehicle's display and your mobile device.
• Turn OFF unnecessary applications on your mobile device. When your mobile device is busy, it often drops Bluetooth® connection.
• Turn OFF energy saving mode on your mobile device.

NOTE: Some phone models do not support all features. If your phone or device does not pair, please visit **www.mazdausa.com/mazdaconnect** or contact **800-430-0153** for further assistance or to report a phone/audio device concern.

The following icons are displayed on the touchscreen during a call:

☎ Ends a call.

↰ Transfers a call from hands-free to the mobile phone.

↱ Transfers a call from the mobile phone to hands-free.

🎤 Mutes the microphone.

☏ Switches the call on hold.

▦ Allows access to the numeric keypad.

NAVIGATION SYSTEM

NAVIGATION SYSTEM

Planning A Route

IMPORTANT:
- In the interest of safety, plan a route before you start driving.
- To adjust the volume of the navigation system voice while driving, turn the VOL knob when voice guidance is being given. To prompt voice guidance, push the NAVI button to repeat the last instruction.
- For assistance with the navigation system, visit **www.mazdausa.com/mazdaconnect** or call **800-430-0153**.

ICON	VOICE CONTROL	PURPOSE
	Hide/Show Menu Bar	To open and close the Menu bar.
	Enter Destination	To enter an address or favorite destination, or select a place of interest or a location on the map.
	Navigation Information	To switch to the navigation information screen on which items such as traffic information and GPS reception conditions are located.
	Cancel	To cancel an existing way point/route.
	Point of Interest	To find places nearby.
	Route Options	To display the route parameters and full length of the route. Perform route-related actions such as edit or cancel, pick route alternatives, avoid parts, or add destination to Favorites.
	View Mode	To change the map mode (2-D north up/2-D heading up/3-D).
	Settings	To adjust the navigation settings.

To plan a route on your navigation system:

1 Push the **NAV** button on the commander switch.

2 Select **ENTER DESTINATION**.

3 Select **Find Address**.

NOTE: By default, the navigation system detects the country and city/town you are in. If needed, you can change the country or state setting by selecting **Country** or a new city/town by selecting **City** or **Zip code**.

---

4 Enter the street name.

5 Enter the house number, then select the ✔.

6 The system transitions to a screen where the input location can be checked. To transition to the next screen, select ✔ Select, or to transition to the previous screen, select ↰.

NOTE:
 • Select **Places Nearby** for **Points Of Interest (POI)** around the selected location, or select **Add to Favorites** to register the selected location to **Favorites**.
 • The route can be edited by selecting other options.

---

7 If ✔ Start is selected or if no operation is performed for 10 seconds, the route guidance is started. The set route can be checked by selecting MAP.

(Continued on next page)

NAVIGATION SYSTEM

PLANNING A ROUTE USING VOICE COMMANDS

To plan a route to an address using your voice:

1 Push the TALK ⚇ button on the steering wheel.

2 When you hear the tone, say "Address".

3 When on the address screen, say the full address (without zip code) for your destination, for example "123 Main St., Los Angeles, California". The system does not recognize zip codes.

4 Say "Yes" if the address is correct. If shown a list of addresses, say the list number for the correct address or say "None of these".

NOTE:
- For best results, say the full address without pausing between words.
- Voice guidance can be skipped by pushing the TALK ⚇ button.
- When prompt voice guidance is muted, you will need to go into Navigation Settings to turn the volume back on for the NAVI button to repeat the last instructions.

To remove or insert the MAP SD card (to update the map database):

1 Turn the ignition OFF.

2 Locate the SD card slot located in the center console.

Remove card:
Open the cover and push the card once, then pull it out.

Insert card:
Push the card in (label-side up), then close the cover.

SD card slot

NOTE:
- Visit **www.mazdausa.com/navigation** and download the most recent map available for your device for free for three years from vehicle delivery.
- For assistance with the navigation system, visit **www.mazdausa.com/mazdaconnect** or call **800-430-0153**.
- Only use your MAP SD card for operating and updating your navigation system. DO NOT insert the MAP SD card into another vehicle or into any other device such as a camera.
- DO NOT put other SD cards in this slot.

ACTIVE DRIVING DISPLAY

ACTIVE DRIVING DISPLAY

To change the settings/adjustments for the Active Driving Display:

1 Select the Settings icon on the Home screen.

2 Select the AD-Disp tab.

3 Select the desired item to change.

   HEIGHT: Adjust the position of the virtual image of the Active Driving Display up or down.

   BRIGHTNESS CONTROL: Method for adjusting screen brightness (automatically with instrument cluster illumination or manually).

   CALIBRATION: Brightness initialization setting (when selecting automatic adjustment).

   BRIGHTNESS: Brightness adjustment (when selecting manual adjustment).

   NAVIGATION: On/Off.

   ACTIVE DRIVING DISPLAY: On/Off.

   RESET: Reset to default settings.

NOTE:
- If the display does not operate, switch the ignition OFF and then switch it back ON. If it still does not operate even with the ignition switched ON, have the vehicle inspected at an Authorized Mazda Dealer.
- It may be difficult to view the display when wearing sunglasses. Take off your sunglasses or adjust the luminosity.
- If the battery has been removed and re-installed or the battery voltage is low, the adjusted position may deviate.
- The display may be difficult to view or be temporarily affected by weather conditions such as rain, snow, light, and temperature.

Icon	Description
0 MPH	Vehicle Speed Setting using cruise control
⬈	Navigation Turn-By-Turn (TBT) direction, distance and lane guidance
STOP	Traffic Sign Recognition (TSR) using navigation
55	Speed Limit

IF EQUIPPED	
	Lane Departure Warning System (LDWS) operation conditions and warnings
BRAKE!	Smart Brake Support (SBS) warnings
	Vehicle Speed Setting using cruise control

CAUTION:
Always adjust the display using the Settings screen (AD-Disp tab). DO NOT try to adjust the angle or open/close the display by hand. Fingerprints on the display will make it difficult to view and manual operation could cause damage.

MAZDA RADAR CRUISE CONTROL

(IF EQUIPPED)

MAZDA RADAR CRUISE CONTROL (MRCC) SYSTEM

The MRCC system maintains vehicle speed and following distance using a radar sensor to detect a vehicle ahead. The driver simply presets the vehicle speed between 19 mph and 90 mph and the system will maintain a safe following distance without having to turn the cruise control off.

Vehicle ahead

MRCC set vehicle speed

Active Driving Display

MRCC distance between vehicles
MRCC WARNING:

MRCC shuts off when it reaches the low mph limit. The vehicle will not brake/stop by itself. Switch the MRCC system off when not in use.

SETTING THE MRCC:

When the MODE switch is pushed, the vehicle speed and the distance between vehicles while in headway control can be set. The MRCC indication is shown in the Active Driving Display.

NOTE: The radar for the MRCC is located behind the Mazda emblem in the grille. Keep this area clean to avoid the system not working properly.

OPERATION MODES	
MODE	DISPLAY
Constant Speed	
Headway Control	

How to set the speed:

1 Adjust the vehicle to the desired speed using the accelerator pedal.

2 Push the SET + or SET – switch. The set speed and the inter-vehicle distance display filled with white lines are displayed in the Active Driving Display and the MRCC indicator light (green) turns on simultaneously.

Distance control (Longer ▲ / Shorter ▼)

Cruise control (SET+/ RESUME/ SET –)

MODE (ON)

CANCEL/OFF

MRCC SET switch

How to set the distance between vehicles:

The distance between vehicles is increased by pushing the ▲ switch and decreased by pushing the ▼ switch. The distance between vehicles can be set to four levels.

Switching to conventional cruise control function:
When the MODE switch is pushed while the MRCC system is turned on, the system is switched to conventional cruise control function.

NOTE: The MRCC may apply the brakes when encountering a semi truck (tractor trailer). This is normal. Simply push the accelerator pedal to override the system.

DISTANCES BETWEEN VEHICLES (at 50 mph)	DISPLAY
Long (about 164 ft)	
Medium (about 131 ft)	
Short (about 98 ft)	
Extremely Short (about 82 ft)	

CLOSE PROXIMITY WARNING

BRAKE! While traveling in headway control, if your vehicle rapidly closes in on a vehicle ahead because the other driver applied his or her brakes suddenly, a warning sound activates and the BRAKE! warning is indicated in the display. Always verify the safety of the surrounding area and depress the brake pedal while keeping a safe distance from the vehicle ahead. Additionally, always keep a safe distance from the vehicles behind you.

SMART CITY BRAKE SUPPORT

SMART CITY BRAKE SUPPORT (SCBS) SYSTEM

WARNING:
SCBS is only a supplementary system to reduce damage in the event of a collision; however, the SCBS has limitations. Do not rely solely on the SCBS. Always keep your eyes on the road.

Between speeds of 2 mph and 50 mph, the SCBS attempts to minimize damage if a collision is unavoidable. SCBS will alert the driver of a possible collision when driven at speeds of 2 to 50 mph. SCBS may be able to stop the vehicle automatically to avoid a collision with the vehicle ahead when driven at speeds 2 to 18 mph.

Partial list of operating conditions:

• Driver alert during vehicle speeds of 2 to 50 mph.

• Vehicle automatic brake control during vehicle speeds of 2 to 18 mph.

• SCBS system has not been turned off.

NOTE: It may be possible to avoid a collision if the relative speed between your vehicle and the vehicle ahead is less than 12 mph.

Refer to your Owner's Manual for a complete list of SCBS operating conditions and system details.

Forward Sensing Camera
SAFETY SETTINGS

SCBS can be turned off using Safety Settings in MAZDA CONNECT (p. 10).

SMART BRAKE SUPPORT

(IF EQUIPPED)

SMART BRAKE SUPPORT (SBS)

At speeds of 10 mph or higher, the SBS alerts the driver of a possible collision and attempts to reduce the severity of an imminent collision with the vehicle ahead. SBS operates when the vehicle is traveling at speeds higher than the range of the SMART CITY BRAKE SUPPORT (SCBS).

Partial list of operating conditions:

• During vehicle speeds of 10 mph or higher.

• The SBS system has not been turned off.

SBS system can be turned off using Safety Settings in MAZDA CONNECT (p. 10).

Refer to your Owner's Manual for a complete list of SBS operating conditions and system details.

WARNING:
SBS is only a supplementary system to reduce damage in the event of a collision; however, the SBS has limitations. Do not rely solely on the SBS. Always keep your eyes on the road.

Forward Sensing Camera

Radar sensor
COLLISION WARNING

BRAKE!

If there is the possibility of a collision with a vehicle ahead, the beep sounds continuously and a warning is indicated in the multi-information display.

LANE DEPARTURE WARNING SYSTEM
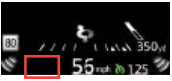

(IF EQUIPPED)

LANE DEPARTURE WARNING SYSTEM (LDWS)

The LDWS recognizes the painted lane lines using the Forward Sensing Camera (FSC) installed on the windshield.

If the vehicle deviates from its lane at speeds above 44 mph, the system alerts the driver using the active driving display, flashing the LDWS warning light and a warning beep to help the driver stay within the lines.

Forward Sensing Camera
ACTIVE DRIVING DISPLAY	CONDITION
	The painted road lane lines are not recognized OR one side is recognized OR the vehicle speed is less than 37 mph.
	Both side painted road lane lines are recognized at vehicle speeds of 37 mph or more.
	Warning is triggered when vehicle deviates from its lane (depending on personalization setting).
	LDWS OFF

NOTE: Any driver vehicle input (e.g., turn signal, steering or acceleration, hands off, Traction Control System switch off) will cancel warning and steering assist.

LDWS can be turned off. Refer to the Owner's Manual for further information.

Use the LDWS switch to turn the system ON or OFF.

LDWS switch

DISTANCE RECOGNITION SUPPORT SYSTEM

DISTANCE RECOGNITION SUPPORT SYSTEM (DRSS)

The DRSS measures the distance between your vehicle and a vehicle ahead using a radar sensor (front) while the vehicle speed is 19 mph or faster and indicates a recommended distance to maintain between the vehicles. Furthermore, if your vehicle approaches a vehicle ahead more closely than the appropriate distance to maintain between the vehicles, the vehicle ahead indication in the display is illuminated in amber to advise the driver to keep a safe distance from the vehicle ahead.

Active Driving Display

Vehicle ahead
DISTANCE-BETWEEN-VEHICLES GUIDELINES*		
DISPLAY	Traveling at 25 mph	Traveling at 50 mph
	About 32 ft or less	About 65 ft or less
*The distance between vehicles differs depending on vehicle speed.		

TRAFFIC SIGN RECOGNITION

(IF EQUIPPED)

TRAFFIC SIGN RECOGNITION (TSR) SYSTEM

The TSR system helps prevent the driver from overlooking traffic signs and provides support for safe driving by displaying traffic signs on the Active Driving Display. TSR recognizes traffic signs using the Forward Sensing Camera (FSC) or the navigation system while driving.

When vehicle speed exceeds the speed limit sign displayed in the Active Driving Display, the system notifies the driver with an indication in the Active Driving Display and a warning sound.

The TSR displays the SPEED LIMIT 🔟 , DO NOT ENTER ⊖, and traffic STOP ⊛ signs.

SPEED LIMIT SIGN
DISPLAYED

SPEED LIMIT SIGN
RECOGNIZED

STOP SIGN RECOGNIZED
AND DISPLAYED
NOTE: The TSR system is not supported in some countries or regions. For more information, consult an Authorized Mazda Dealer. The TSR system operates only if the navigation system SD card (Mazda Genuine) is inserted into the SD card slot. Consult an Authorized Mazda Dealer for details.

BLIND SPOT MONITORING SYSTEM

BLIND SPOT MONITORING (BSM)

The BSM system is designed to assist the driver by monitoring blind spots on the left and right sides of the vehicle in certain situations, such as lane changes.

WARNING:
BSM is only a supplementary system to help aid in monitoring blind spots; however, BSM has limitations. The system may not detect all vehicles, especially a motorcycle. Do not rely solely on the BSM. Relying solely on the BSM may cause an unexpected accident resulting in death or serious injury. Make sure to look over your shoulder before changing lanes.

• The BSM detects vehicles approaching from the rear while traveling in the forward direction at a speed of 6.3 mph or more and notifies the driver by turning on the BSM warning indicator light and displaying the vehicle detection screen (vehicles with Active Driving Display).

• If the turn signal lever is operated to signal a turn in the direction in which the BSM warning indicator light is illuminated while the approaching vehicle is detected, the BSM warns the driver by turning on the BSM warning indicator light, and by activating the warning sound and the warning screen indicator display (vehicles with Active Driving Display).

• The detection area on this system covers the driving lanes on both sides of the vehicle and from the rear part of the front doors to about 164 ft behind the vehicle.

• BSM sensors are located under the left and right rear bumper areas. The BSM system may not operate properly if the rear bumper is dirty, so keep the rear bumper area clean and free of bumper stickers.

ACTIVE DRIVING DISPLAY	
WHITE	Vehicle Detected
AMBER	Vehicle Detected with Turn Signal On

Detection areas
NOTE:
• The BSM can assist the driver in confirming the safety of the surroundings, but is not a complete substitute.
• The driver is responsible for ensuring safe lane changes and other maneuvers.
• Always pay attention to the direction in which the vehicle is traveling and the vehicle's surroundings.

BSM switch

Turning BSM System Off:
Turning the BSM system off will turn off both the light and sound indicators. To turn the BSM system off, push the BSM OFF switch on the dash.

The BSM OFF indicator in the instrument cluster will turn on to indicate the BSM system is off.

NOTE: Turning the BSM system off will also turn off the Rear Cross Traffic Alert system.

REAR CROSS TRAFFIC ALERT

REAR CROSS TRAFFIC ALERT (RCTA)

The RCTA is designed to alert the driver of oncoming traffic when backing out of a parking spot. RCTA is active when the vehicle is in reverse and the vehicle speed is between 0 mph and 6 mph.

When the BSM sensors detect a moving object, the RCTA will notify the driver with indicators and sound:

• Rear view monitor and outside mirror flashing indications.

Refer to your Owner's Manual for complete details.

BSM/RCTA (Left)

BSM/RCTA (Right)

WARNING:
RCTA is only a supplementary system to help aid when backing up; however, RCTA has limitations. The system does not detect all vehicles, especially motorcycles. Do not rely solely on the RCTA. Relying solely on the RCTA may cause an unexpected accident resulting in serious injury. Always back up slowly.

LIGHTING CONTROL / TURN SIGNAL LEVER

AUTO (IF EQUIPPED)

The light sensor automatically determines when to turn the headlights on or off.

Push for high beams

Pull to flash high beams

≡D◯≡

Turns tail, parking, and dashboard lights on.

≢◯

Turns fog lights on only when headlights are on.

≡◯

Turns tail, parking, dashboard, and headlights on.

THREE-FLASH SIGNAL

To signal a lane change, push the turn signal lever up or down halfway and release. The turn signal indicator will only flash three times. See "Personalization Features" to activate.

Lighting control/turn signal lever

NOTE: The Daytime Running Lights (DRL) automatically turn on when the ignition is switched ON. To disable/enable this feature, see your Authorized Mazda Dealer.

NOTE: You can adjust the timing of the Auto Headlights OFF and the sensitivity of the Auto Light Control. See MAZDA CONNECT Settings (p. 10).

WIPER / WASHER CONTROL

WINDSHIELD WIPER / WASHER CONTROL LEVER

MIST

Pull to dispense windshield washer fluid

1 **AUTO**

2 **LO**

3 **HI**

Windshield wiper/washer control lever

AUTO (IF EQUIPPED)

The rain sensor senses the amount of rainfall and turns the wipers on or off. Rotating the inner ring clockwise (away from you) creates greater wiper sensitivity and makes the wipers move faster. The **+** position increases wiper speed. Rotating the inner ring counterclockwise (toward you) makes the wipers move slower. The **-** position decreases wiper speed.

REAR WINDOW WIPER/WASHER
(hold as desired)

INT
Intermittent

ON
Normal speed

> **CAUTION:**
>
> If the ignition is ON, turn the AUTO wipers OFF when going through a car wash or while cleaning or touching the windshield.

NOTE: Vehicles not equipped with AUTO wipers will have INT wipers. Set the lever to INT and choose an interval timing by rotating the ring between fast and slow.

ADAPTIVE FRONT-LIGHTING SYSTEM

(IF EQUIPPED)

ADAPTIVE FRONT-LIGHTING SYSTEM (AFS)

AFS automatically turns the headlight beam to the right or left in conjunction with the direction of the steering wheel to improve the direction of headlight illumination while cornering. AFS only works when the vehicle is moving.

Without AFS

With AFS

Without AFS
With AFS

NOTE: With AFS, it is normal to see the headlights move and hear the sound of the headlight leveling motors at the front of the vehicle when the ignition is ON.

The system will need to be reset if the vehicle battery has been disconnected or the system fuse has been replaced. Please refer to your Owner's Manual for easy-to-follow resetting instructions.

VEHICLE SETTINGS

AFS can be turned off using Vehicle Settings in MAZDA CONNECT (p. 10).

HIGH BEAM CONTROL

HIGH BEAM CONTROL (HBC)

With HBC, the headlights are switched to high beams at speeds above 18 mph when there are no vehicles in front of your vehicle or approaching in the opposite direction.

The HBC system switches to low beam when:

- You are approaching a vehicle or a vehicle is approaching in the opposite direction.
- Driving on roads lined with street lights or well-lit cities and towns.
- At speeds lower than 12 mph.

To turn HBC on:

1 Turn the headlight switch to the AUTO position.

2 Push the headlight lever forward to the High Beam position.

NOTE: When the HBC system is on, the HBC indicator light in the instrument cluster will illuminate (green). The High Beam indicator light will turn on (blue) when the HBC system switches to high beam and will turn off when the HBC system switches to low beam.

AUDIO CONTROLS

AUDIO OPERATION

The following icons are displayed on the screen:

🎵 **Sources:** Displays the Audio menu to change the audio source (AM, FM, XM, Bluetooth®, Aha, Pandora, Stitcher, USB, AUX).

📶 **Auto Memory:** Displays a list of the 10 strongest radio stations. Because station strength changes as you drive, select the Update Station List icon to re-scan for strong stations.

⭐ **Favorites:** Displays a list of your favorite AM, FM, and XM radio stations.

HD Radio: Switches HD radio on/off.

Scan: Scans radio stations or songs (scanning stops at each one for five seconds). Select again to stop.

Tuner: Displays manual radio tuner.

🏷 **Tag:** Saves artist and title and sends them to your Apple device (for Apple devices with USB use only).

⏮⏭ **Seek Previous/Next:** Selects previous or next receivable radio station or song. Push and hold to change the radio station continually.

Settings: Adjusts the audio quality level (bass, treble, etc.).

The following icons are displayed on the USB and BT music screens only:

☰ **Track List:** Displays the track list.

🔁 **Repeat:** Repeats the current song. Select again to stop.

🔀 **Shuffle:** Plays the songs in random order. Select again to stop.

▶❚❚ **Play/Pause:** Plays and pauses the song.

(((SiriusXM)))
SATELLITE RADIO

New Mazda vehicles equipped with SiriusXM® Satellite Radio will receive an introductory four-month trial subscription that starts on the day the vehicle is sold. Enjoy over 150 channels including commercial-free music, plus sports, comedy, entertainment, news and much more.

To start listening to SiriusXM, select XM from audio sources, then push channel up and down to listen to over 150 channels. If you do not hear audio, please activate service to your radio with a simple refresh process.

1 Scroll to XM Radio, go to channel 1 and push "previous" to channel 0 to find your radio ID.

2 Go to **siriusxm.com/refresh** and enter radio ID or call **1-855-MYREFRESH** (1-855-697-3373).

HD RADIO

HD radio has a special receiver which allows it to receive digital broadcasts (where available) in addition to the analog broadcasts it already receives. Digital broadcasts have better sound quality than analog broadcasts as digital broadcasts provide free, crystal clear audio.

When the HD radio button is ON (red), there could be a noticeable difference in sound quality and volume when a change from digital to analog signals occurs. If the sound quality and volume become noticeably diminished or cut off, select the HD button to turn HD radio OFF (not red).

AUDIO OPERATION USING VOICE

Audio operation and media selection can be done using voice recognition. Push the TALK ⁍ button on the steering wheel, wait for a beep, then say a command in a clear, natural voice (not too fast or too slow). Some common commands are listed below.

Play (and any of the following):
AM, FM, XM, Bluetooth®, Aha, Pandora, Stitcher, USB, AUX

Play or Resume/Pause or Stop/Next or Previous Play (and any of the following when connected to USB port): Song, Playlist ‹playlist name›, Artist ‹artist name›, Album ‹album name›, Genre ‹genre name›, Folder ‹folder name›

Tune to Station: ‹FM or AM then frequency›

Tune to Channel Number (XM)

NOTE: Push the TALK ⁍ button and say "Help" at any time to hear a list of available commands.

BLUETOOTH® (BT) AUDIO

Bluetooth®-enabled phones and audio players provide an opportunity to play music through the audio system without wires.

Some phone models do not support all features.
Go to **www.mazdausa.com/mazdaconnect** or contact **(800) 430-0153** for further assistance or to report a phone/audio device concern.

NOTE: To use BT audio, make sure the musical icon is displayed by going to ♫ Bluetooth® in Device Settings. Some Bluetooth® audio devices need a certain amount of time before the icon is displayed.

PLAYING BLUETOOTH® AUDIO

1 Make sure the BT audio device is paired to your vehicle.

2 Turn on the BT audio device and open the audio app on the device.

3 Select Bluetooth® from Sources. See your Owner's Manual for further information on Pandora, Aha, and Stitcher operations.

NOTE: In order to use Aha, Pandora and Stitcher as audio sources, the app must be installed on your phone. These apps stream music using your data plan and listening to them counts toward your monthly cellular data usage.

AUDIO USB and AUX INPUTS

PORTABLE AUDIO PLAYER INTEGRATION USING THE USB PORT OR AUX JACK

Your vehicle is equipped with a USB port and AUX jack below the climate control unit that allow you to play your iPod, USB device, or portable audio player through the vehicle's audio system. Learn the system when parked and do not let it distract you while driving.
IMPORTANT:

- Set the volume level on your portable audio player to the highest level before distortion starts, then use the vehicle's audio system to adjust the volume.
- Unplug any device from the USB port and accessory socket before turning off the vehicle. Leaving devices plugged in can drain the battery and cause issues during the Bluetooth® pairing process at start-up. Wait about 15 seconds after starting the vehicle before plugging anything into the USB port.

NOTE: You will need an audio cable with an 1/8 inch (3.5 mm) mini stereo plug (available as a Genuine Mazda accessory) to connect your portable audio player into the AUX jack.

1 Locate the USB port or AUX jack.

2 Connect the device plug into the portable audio player and into the USB port or AUX jack.

3 Turn the vehicle audio system on.

4 Audio Controls: Select AUX or USB from the Sources menu.

5 USB Port: Use the vehicle's audio system or steering wheel controls to control the connected USB device.
AUX Jack: Use the portable audio player controls to play music.

NOTE: When using a USB memory stick, the system plays the first audio file when restarting the vehicle. It does not start where it left off when turning off the engine.

---

12 VOLT ACCESSORY SOCKET

The accessory socket is on with the ignition in ACC or ON. The accessory socket is located at the front of the vehicle.

NOTE: When using the accessory socket, make sure to disconnect any device from it when turning off the ignition; otherwise, the vehicle's battery could go dead.

AUTOMATIC CLIMATE CONTROL

Temperature control dial   **Fan control dial**   **Mode selector dial**

TEMPERATURE CONTROL DIAL

Rotate the dial for temperature control.

A/C Push to manually turn air conditioning on or off.

FAN CONTROL DIAL

Rotate the dial to set desired fan speed.

✖ Rotate dial to increase fan speed.

O Rotate dial to turn the climate control system off.

⬤ Push to recirculate cabin air.

AUTO Set the fan selector dial in the AUTO position. The airflow mode and amount will be automatically controlled in accordance with the set temperature.

MODE SELECTOR DIAL

Rotate the dial to set airflow mode.

⬀ Dashboard vents

⬀ Dashboard and floor vents

⬀ Floor vents

⬀ Defroster and floor vents

⬀ Push to defrost the windshield.

⬀ Push to defrost the rear window.

AUTO Set the mode selector dial in the AUTO position. The airflow mode and amount will be automatically controlled in accordance with the set temperature.

NOTE: Refer to Owner's Manual for Manual Climate Control system operation.

HEATED STEERING WHEEL

HEATED STEERING WHEEL

The areas of the steering wheel (shown below) will heat when the ignition is ON and the heated steering wheel switch is turned on.

To turn heated steering wheel on:

Push the switch and the light will illuminate.

To turn heated steering wheel off:

Push the switch and the light will turn off.

ENGINE COOLANT TEMPERATURE LIGHTS

Since this vehicle does not use an engine coolant temperature gauge, red and blue engine coolant temperature lights are used to indicate high and low coolant temperature.

Red Coolant Temperature

FLASHING: Engine is starting to run hot. Drive slowly to reduce engine load.

ON: Engine is overheating. Safely pull over to the side of the road and turn the engine off. Refer to the Owner's Manual for more information.

Blue Coolant Temperature

ON: Engine coolant is cold and no warm air is available for heater/defroster.

OFF: Engine coolant is warm and warm air is available for heater/defroster. The light may stay on for a few minutes after start-up when the engine is cold, but the vehicle can be driven with the light on or off.

TRIP COMPUTER

The following information can be selected by pushing the ▲ or ▼ of the INFO button on the steering wheel.

• Approximate distance you can travel on the available fuel (RANGE)

• Average fuel economy   • Current fuel economy   • Average vehicle speed

To reset, push and hold the INFO button for more than 1.5 seconds.

OUTSIDE TEMPERATURE DISPLAY

The outside temperature unit can be switched between °C and °F using System Settings in the Infotainment System.

IMPORTANT: When your MAZDA CONNECT display setting is set on "AUTO", the instrument cluster and display may become dimmer when the headlights are on. If the display and instrument cluster become too dim or too bright when the headlights are on, simply rotate the dimmer knob located on your instrument cluster to adjust the brightness.

TPMS NOTE: Low ambient temperature and/or high altitude may cause tire pressures to change and turn the TPMS warning light on. If the warning light comes on, see p. 6.

See your Owner's Manual for more details and explanations.

1 Rotate the knob to adjust the brightness of the instrument cluster and other dashboard illuminations.
2 Push to toggle between trip meter (A & B). When a trip meter is selected, push and hold to reset to zero. Push the knob for 1.5 seconds or more to change the speed units between mph.

TRANSMISSION

MANUAL SHIFT MODE

Manual Shift Mode gives you the feel of driving a manual transmission by allowing you to manually shift to control engine rpm and torque when more control is desired.

To Use Manual Shift Mode:
Shift the lever from D to M.

To Shift Up To A Higher Gear:
Tap the shift lever back (+) once.

To Shift Down To A Lower Gear:
Tap the shift lever forward (-) once.

DRIVE SELECTION

SPORT mode will choose a lower gear for increased acceleration response. It will also hold a lower gear/delay upshifting when it detects you are braking or cornering because it anticipates that you will want to accelerate out of the turn more quickly.

Push the SPORT button to switch to SPORT mode and the SPORT mode indicator light in the instrument cluster turns on. Push again to turn off.

SPORT button

NOTE: If the SET button of the cruise control is pushed while in SPORT mode, SPORT mode is switched off. SPORT mode cannot be turned on or off when cornering.
• When the ignition is switched OFF, SPORT mode is also switched off.
• Fuel consumption increases slightly when using SPORT mode.

ACTIVE ADAPTIVE SHIFT (AAS) CONTROL

AAS will automatically adjust how and when the transmission shifts gears based on road conditions and your driving style. The transmission may stay in a lower gear longer than usual when going up or down hills or driving around corners. This feature gives you better control and a more connected driving experience.

ACCELERATOR PEDAL KICKDOWN SWITCH

The accelerator pedal is equipped with a kickdown switch designed to allow optimal engine performance while accelerating.

When you depress the accelerator 95% of the way, you will feel an increase in resistance. Push harder, and you will feel a click as you activate the kickdown switch. The transmission will usually downshift (depending on engine speed) and the engine will switch to maximum power mode. This kickdown switch function is the same in both Manual Shift Mode and in "D".
HILL LAUNCH ASSIST (HLA)

HLA helps assist you when accelerating the vehicle from a stop while on a hill or slope.

When the brake pedal is released and the accelerator pedal is pushed, HLA prevents the vehicle from rolling forward or backward. It operates on a downward slope when the shift lever is in the reverse (R) position and on an upward slope when the shift lever is in a position other than the reverse (R) position.

IMPORTANT: The HLA system will hold the vehicle for a maximum of two seconds while the driver is changing from the brake pedal to the accelerator pedal.

PERSONALIZE YOUR CX-3

PERSONALIZE YOUR CX-3 WITH GENUINE MAZDA ACCESSORIES

Go to **www.MyMazda.com**, then select "Accessories" below the MyMazda Home header for a complete listing of available accessories for your CX-3.
