IN ANY EVENT BROTHER'S LICENSOR'S LIABILITY TO YOU FOR ACTUAL DAMAGES FROM ANY CAUSE WHATSOEVER, AND REGARDLESS OF THE FORM OF THE ACTION (WHETHER IN CONTRACT, TORT (INCLUDING NEGLIGENCE), PRODUCT LIABILITY OR OTHERWISE), WILL BE LIMITED TO $50.

Compilation and Publication Notice

Under the supervision of Brother Industries Ltd., this manual has been compiled and published, covering the latest product descriptions and specifications.

The contents of this manual and the specifications of this product are subject to change without notice.

Brother reserves the right to make changes without notice in the specifications and materials contained herein and shall not be responsible for any damages (including consequential) caused by reliance on the materials presented, including but not limited to typographical and other errors relating to the publication.

Brother® One-Year Limited Warranty and Replacement Service (USA only)

Who is covered:

- This limited warranty ("warranty") is given only to the original end-use/retail purchaser (referred to in this warranty as "Original Purchaser") of the accompanying product, consumables and accessories (collectively referred to in this warranty as "this Product").
- If you purchased a product from someone other than an authorized Brother reseller in the United States or if the product was used (including but not limited to floor models or refurbished product), prior to your purchase you are not the Original Purchaser and the product that you purchased is not covered by this warranty.

What is covered:

- This Product includes a Machine and Consumable and Accessory Items. Consumable and Accessory Items include but are not limited to print heads, toner, drums, ink cartridges, print cartridges, refill ribbons, therma PLUS paper and thermal paper.
- Except as otherwise provided herein, Brother warrants that the Machine and the accompanying Consumable and Accessory Items will be free from defects in materials and workmanship, when used under normal conditions.
- This warranty applies only to products purchased and used in the United States. For products purchased in, but used outside, the United States, this warranty covers only warranty service within the United States (and does not include shipping outside the United States).

What is the length of the Warranty Periods:

- Machines: one year from the original purchase date.
- Accompanying Consumable and Accessory Items: 90 days from the original purchase date or the rated life of consumable, whichever comes first.

What is NOT covered:

This warranty does not cover:

(1) Physical damage to this Product;
(2) Damage caused by improper installation, improper or abnormal use, misuse, neglect or accident (including but not limited to transporting this Product without the proper preparation and/or packaging);
(3) Damage caused by another device or software used with this Product (including but not limited to damage resulting from use of non Brother®-brand parts and Consumable and Accessory Items);
(4) Consumable and Accessory Items that expired in accordance with a rated life; and,
(5) Problems arising from other than defects in materials or workmanship.
(6) Normal Periodic Maintenance Items, such as Paper Feeding Kit, Fuser and Laser Units.

This limited warranty is VOID if this Product has been altered or modified in any way (including but not limited to attempted warranty repair without authorization from Brother and/or alteration/removal of the serial number).

What to do if you think your Product is eligible for warranty service:

Report your issue to either our Customer Service Hotline at 1-800-284-4329 for Fax, MFC and DCP and 1-800-276-7746 for Printers, or to a Brother Authorized Service Center **within the applicable warranty period**. Supply Brother or the Brother Authorized Service Center with a copy of your dated bill of sale showing that this Product was purchased within the U.S. For the name of local Brother Authorized Service Center(s), call 1-800-521-2846.

What Brother will ask you to do:

After contacting Brother or a Brother Authorized Service Center, you may be required to deliver (by hand if you prefer) or send the Product properly packaged, freight prepaid, to the Authorized Service Center together with a photocopy of your bill of sale. **You are responsible for the cost of shipping, packing product, and insurance (if you desire). You are also responsible for loss or damage to this Product in shipping.**

What Brother will do:

If the problem reported concerning your Machine and/or accompanying Consumable and Accessory Items is covered by this warranty and if you first reported the problem to Brother or an Authorized Service Center within the applicable warranty period, Brother or its Authorized Service Center will repair or replace the Machine and/or accompanying Consumable and Accessory Items at no charge to you for parts or labor. The decision as to whether to repair or replace the Machine and/or accompanying Consumable and Accessory Items is made by Brother in its sole discretion. Brother reserves the right to supply a refurbished or remanufactured replacement Machine and/or accompanying Consumable and

Brother® One-Year Limited Warranty and Replacement Service (USA only)

Accessory Items and use refurbished parts provided such replacement products conform to the manufacturer's specifications for new product/parts. The repaired or replacement Machine and/or accompanying Consumable and Accessory Items will be returned to you freight prepaid or made available for you to pick up at a conveniently located Authorized Service Center.

If the Machine and/or accompanying Consumable and Accessory Items are not covered by this warranty (either stage), you will be charged for shipping the Machine and/or accompanying Consumable and Accessory Items back to you and charged for any service and/or replacement parts/products at Brother's then current published rates.

The foregoing are your sole (i.e., only) and exclusive remedies under this warranty.

What happens when Brother elects to replace your Machine:

When a replacement Machine is authorized by Brother, and you have delivered the Machine to an Authorized Service Center, the Authorized Service Center will provide you with a replacement Machine after receiving one from Brother. If you are dealing directly with Brother, Brother will send to you a replacement Machine with the understanding that you will, after receipt of the replacement Machine, supply the required proof of purchase information, together with the Machine that Brother agreed to replace. You are then expected to pack the Machine that Brother agreed to replace in the package from the replacement Machine and return it to Brother using the pre-paid freight bill supplied by Brother in accordance with the instructions provided by Brother. Since you will be in possession of two machines, Brother will require that you provide a valid major credit card number. Brother will issue a hold against the credit card account number that you provide until Brother receives your original Product and determines that your original Product is entitled to warranty coverage. Your credit card will be charged up to the cost of a new Product only if: (i) you do not return your original Product to Brother within five (5) business days; (ii) the problems with your original Product are not covered by the limited warranty; (iii) the proper packaging instructions are not followed and has caused damage to the product; or (iv) the warranty period on your original Product has expired or has not been sufficiently validated with a copy of the proof of purchase (bill of sale). The replacement Machine you receive (even if refurbished or remanufactured) will be covered by the balance of the limited warranty period remaining on the original Product, plus an additional thirty (30) days. You will keep the replacement Machine that is sent to you and your original Machine shall become the property of Brother. **Retain your original Accessory Items and a copy of the return freight bill, signed by the courier.**

Limitations:

Brother is not responsible for damage to or loss of any equipment, media, programs or data related to the use of this Product. Except for that repair or replacement as described above, Brother shall not be liable for any direct, indirect, incidental or consequential damages or specific relief. Because some states do not allow the exclusion or limitation of consequential or incidental damages, the above limitation may not apply to you. THIS WARRANTY IS GIVEN IN LIEU OF ALL OTHER WARRANTIES, WRITTEN OR ORAL, WHETHER EXPRESSED BY AFFIRMATION, PROMISE, DESCRIPTION, DRAWING, MODEL OR SAMPLE. ANY AND ALL WARRANTIES OTHER THAN THIS ONE, WHETHER EXPRESS OR IMPLIED, INCLUDING IMPLIED WARRANTIES OF MERCHANTABILITY AND FITNESS FOR A PARTICULAR PURPOSE, ARE HEREBY DISCLAIMED.

- This Limited Warranty is the only warranty that Brother is giving for this Product. It is the *final expression and the exclusive and only statement* of Brother's obligations to you. It replaces all other agreements and understandings that you may have with Brother or its representatives.
- This warranty gives you certain rights and you may also have other rights that may vary from state to state.
- This Limited Warranty (and Brother's obligation to you) may not be changed in any way unless you and Brother sign the same piece of paper in which we (1) refer to this Product and your bill of sale date, (2) describe the change to this warranty and (3) agree to make that change.

Important: *We recommend that you keep all original packing materials, in the event that you ship this Product.*

© 2004 Brother International Corporation

BROTHER MULTIFUNCTION CENTER/FACSIMILE MACHINE
LIMITED WARRANTY
(Canada only)

Pursuant to this limited warranty of 1 year from the date of purchase for labour and parts, Brother International Corporation (Canada) Ltd. ("Brother"), or its Authorized Service Centers, will repair this MFC/Facsimile machine free of charge if defective in material or workmanship. This Limited Warranty does not include cleaning, consumables (including, without limitation, print cartridges, print head, toner and drum) or damage caused by accident, neglect, misuse or improper installation or operation, any damage caused from service, maintenance, modifications, or tampering by anyone other than a Brother Authorized Service Representative, or from the use of supplies or consumable items that are non-Brother products. Operation of the MFC/Facsimile machine in excess of the specifications or with the Serial Number or Rating Label removed shall be deemed abuse and all repairs thereafter shall be the sole liability of the end-user/purchaser. In order to obtain warranty service, the MFC/Facsimile machine must be delivered or shipped freight prepaid by the end user/purchaser to a "Brother" Authorized Service Center, together with your Proof of Purchase in the form of a Sales Receipt.

For laser products: Failure to remove the Toner Cartridge (and Toner Drum Unit on applicable models) during shipping will cause severe damage to the MFC/Facsimile and will VOID the Warranty. (Refer to your User's Guide for proper packaging.)

For ink-jet products: Do not remove the ink cartridges during shipping. Damage to your print head resulting from packing without the ink cartridges will VOID your warranty. (Refer to your User's Guide for proper packaging.)

BROTHER DISCLAIMS ALL OTHER WARRANTIES EXPRESSED OR IMPLIED INCLUDING, WITHOUT LIMITATION, ANY IMPLIED WARRANTIES OF MERCHANTABILITY OR FITNESS FOR A PARTICULAR PURPOSE, EXCEPT TO THE EXTENT THAT ANY WARRANTIES IMPLIED BY LAW CANNOT BE VALIDLY WAIVED.

No oral or written information, advice or representation provided by Brother, its Authorized Service Centers, Distributors, Dealers, Agents or employees, shall create another warranty or modify this warranty. This warranty states Brother's entire liability and your exclusive remedy against Brother for any failure of the MFC/Facsimile machine to operate properly.

Neither Brother nor anyone else involved in the development, production, or delivery of this MFC/Facsimile machine shall be liable for any indirect, incidental, special, consequential, exemplary, or punitive damages, including lost profits, arising from the use of or inability to use the product, even if advised by the end user/purchaser of the possibility of such damages. Since some Provinces do not allow the above limitation of liability, such limitation may not apply to you.

This Limited Warranty gives you specific legal rights and you may also have other rights which vary from Providence to Providence.

Warranty Service is available at Brother Authorized Service Centers throughout Canada. For Technical Support or for the name and location of your nearest Authorized Service Center call 1-877-BROTHER.

Safety precautions

To use the MFC safely

Save these instructions for later reference.

⚠ WARNING

⚡	There are high voltage electrodes inside the MFC. Before you clean the MFC or clear a paper jam, make sure you have unplugged the power cord from the power outlet.	⚡	Do not handle the plug with wet hands. Doing this might cause an electrical shock.
🚫	After you use the MFC, some internal parts are extremely HOT! To prevent injuries, be careful not to put your fingers in the area shown in the illustration.		
🚫	To prevent injuries, be careful not to put your hands on the edge of the MFC under the document cover.	🚫	To prevent injuries, be careful not to put your fingers in the area shown in the illustration.

🚫	To prevent injuries, be careful not to put your fingers in the area shown in the illustration.
🚫	

- When you move the MFC, grasp the side handholds that are under the scanner. Do NOT carry the MFC by holding it at the bottom.

- Use caution when installing or modifying telephone lines. Never touch telephone wires or terminals that are not insulated unless the telephone line has been disconnected at the wall jack. Never install telephone wiring during a lightning storm. Never install a telephone jack in a wet location unless the jack is specifically designed for a wet location.

- Install equipment with a power cord near a socket/outlet that is easily accessible.

- To reduce the risk of shock or fire, use only a No. 26 AWG or larger telecommunication line cord.

- Do not use a telephone in the vicinity of gas leak to report leak.

- Do not use this product near appliances that use water, in a wet basement or near a swimming pool.

- Avoid using a telephone other than a cordless type during an electrical storm. There may be a remote risk of electric shock from lightning.

ⓘ Caution

- Lightning and power surges can damage this product! We recommend that you use a quality surge protection device on the AC power line and on the telephone line, or unplug the lines during a lightning storm.

Choosing a location

Place your MFC on a flat, stable surface that is free of vibration and shocks, such as a desk. Put the MFC near a telephone jack and a standard, grounded power outlet. Choose a location where the temperature remains between 50°F and 95.5°F (10°-32.5°C).

Caution

■ Avoid placing your MFC in a high-traffic area.

■ Do not place near heaters, air conditioners, water, chemicals, or refrigerators.

■ Do not expose the MFC to direct sunlight, excessive heat, moisture, or dust.

■ Do not connect your MFC to electrical outlets controlled by wall switches or automatic timers.

■ Disruption of power can wipe out information in the MFC's memory.

■ Do not connect your MFC to electrical outlets on the same circuit as large appliances or other Equipment that might disrupt the power supply.

■ Avoid interference sources, such as speakers or the base units of cordless phones.

Quick Reference Guide

Sending faxes

Automatic Transmission

1 If it is not illuminated in

green, press 🖼 (**Fax**).

2 Place the original face up in the ADF, or face down on the scanner glass.

3 Enter the fax number using One-Touch, Speed-Dial, Search or the dial pad.

4 Press **Start**.

5 If you are using the scanner glass, press **2** or **Start**.

Real Time Transmission

You can send faxes in real time.

1 If it is not illuminated in

green, press 🖼 (**Fax**).

2 Place the original face up in the ADF, or face down on the scanner glass.

3 Press **Menu**, **2**, **2**, **5**.

4 Press ◄ or ► to select On, and then press **Set**

—**OR**—

For the next transmission only, press ◄ or ► to select Next Fax Only, and then press **Set**.

5 For the next fax only, press ◄ or ► to select Next Fax:On , and then press **Set**.

6 Press **1** if you want to choose more settings and the LCD will return to the Setup send menu.

—**OR**—

Press **2** to fax.

7 Enter the fax number.

8 Press **Start**.

Receiving faxes

Select Receive Mode

1 Press **Menu**, **0**,**1**.

2 Press ◄ or ► to select Fax Only, Manual, Fax/Tel and External TAD and then press **Set**.

Storing numbers

Storing One-Touch Dial numbers

1 Press **Menu**, **2**, **3**, **1**.

2 Press the One-Touch key where you want to store the number.

3 Enter a number (up to 20 digits), and then press **Set**.

4 Enter a name (or leave it blank), and then press **Set**.

5 Press **Stop/Exit**.

Storing Speed-Dial numbers

1 Press **Menu**, **2**, **3**, **2**.

2 Enter a three-digit Speed-Dial number, and then press **Set**.

3 Enter a number (up to 20 digits), and then press **Set**.

4 Enter a name (or leave it blank), and then press **Set**.

5 Press **Stop/Exit**.

Dialing operations

One-Touch Dialing / Speed-Dialing

1 If it is not illuminated in green, press (**Fax**).

2 Place the original face up in the ADF, or face down on the scanner glass.

3 Press the One-Touch key of the number you want to call

—**OR**—

Press **Search/Speed Dial**, press **#**, and then press the three-digit Speed-Dial number.

4 Press **Start**.

Using Search

1 If it is not illuminated in green, press (**Fax**).

3 Press ⬅ or ➡ to search the memory.

4 Press **Start**.

Making copies

Single copy

1 Press (**Copy**) to illuminate it in green.

2 Place the original face up in the ADF, or face down on the scanner glass.

3 Press **Start**.

Sorting multiple copies (Using the ADF)

1 Press (**Copy**) to illuminate it in green.

2 Place the original face up in the ADF.

3 Use the dial pad to enter the number of copies you want (up to 99).

4 Press **Sort**.

Sort 🗗 icon appears on the LCD.

5 Press **Start**.

Table of contents

5 **Setup Receive 5-1**

1 Introduction

Using this Guide

Thank you for buying a Brother Multi-Function Center (MFC). Your MFC is simple to use, with LCD screen instructions to guide you through programming it. You can make the most of your MFC by taking a few minutes to read this Guide.

Finding information

All the chapter headings and subheadings are listed in the Table of Contents. You will be able to find information about a specific feature or operation by checking the Index at the back of this Guide.

Symbols used in this Guide

Throughout this Guide you'll see special symbols alerting you to important warnings, notes and actions. To make things clearer and to help you press the correct keys, we used special fonts and added some of the messages that will appear in the LCD.

Bold	Bold typeface identifies specific keys on the MFC control panel.
Italics	Italicized typeface emphasizes an important point or refers you to a related topic.
`Courier New`	Courier New typeface identifies the messages on the LCD of the MFC.

⚠️ Warnings inform you what to do to avoid possible personal injury.

🛈 Cautions specify procedures you must follow or avoid to prevent possible damage to the machine.

📝 Notes tell you how you should respond to a situation that may arise or give tips about how the current operation works with other features.

🚫 Improper Setup alerts you to devices and operations that are not compatible with the MFC.

Fax Test Sheet and Product Registration (USA only)

After setting your Station ID, please fill in the Test Sheet included with your MFC and fax it to Brother's Automated Fax Response System as your first transmission. This will check that your MFC is working properly.

To get a response, you must have set up your Station ID.

(See *Setting the Station ID* on page 4-2.)

In USA Only: 1-877-268-9575

When your Test Sheet is received, a Confirmation Sheet and Product Registration form will be sent back to your MFC.

Please fill in the form and return it to complete your registration.

On-Line Registration (USA and Canada)

1 Insert the MFL-Pro Suite CD-ROM into your CD-ROM drive.

2 Click **Online Registration** to register your product.

Control panel overview

MFC-8440, MFC-8640D, MFC-8840D and MFC-8840DN have similar control panel keys.
1 Shift

To access memory locations 21 through 40 in the One-Touch keys hold down the Shift key.

2 One-Touch keys

These 20 keys give you instant access to 40 previously stored dial numbers.

3 Print keys:

Secure

Lets you print out data saved in memory by entering your four-digit password.

Job cancel

Clears data from the printer memory.

4 ☼ Status LED

(Light-Emitting Diode)

The LED will flash and change color depending on the MFC status.

5 5-Line Liquid Crystal Display (LCD)

Displays messages on the screen to help you to set up and use your MFC.

6 **Mode keys:**

Fax

Lets you access Fax mode.

Copy

Lets you access Copy mode.

Scan

Lets you access Scan mode.

7 **Fax and telephone keys:**

Hook

Press before dialing if you want to make sure a fax machine will answer, and then press **Start**.

Resolution

Sets the resolution when you send a fax.

Search/Speed Dial

Lets you look up numbers that are stored in the dialing memory. It also lets you dial stored numbers by pressing **#** and a three-digit number.

Redial/Pause

Redials the last number you called. It also inserts a pause in auto dial numbers.
⑧ **Navigation keys:**

Menu

Lets you access the Menu to program.

Set

Lets you store your settings in the MFC.

Clear/Back

Deletes entered data or lets you exit the menu by pressing repeatedly.

◀ or ▶

Press to scroll forward or backward to a menu selection.

When using the speaker or ring, you can press these keys to adjust the volume in fax mode.

▲ or ▼
Press to scroll through the menus and options.

Also, you can use these keys to do a numerial search for the names of stored numbers in fax mode.

⑨ **Copy keys**

(Temporary settings):

Enlarge/Reduce

Lets you reduce or enlarge copies depending upon the ratio you select.

Contrast

Lets you make a copy that is lighter or darker than the original.

Quality

Lets you select the copy quality for your type of original.

Tray Select

You can select which tray you would like to use for the next copy.

Sort

Lets you sort multiple copies using the ADF.

N in 1 (For MFC-8440)

N in 1 lets you copy 2 or 4 pages onto one page.

Duplex/N in 1 (For MFC-8640D, MFC-8840D and MFC-8840DN)

You can choose Duplex to copy on both sides of the paper or N in 1 to copy 2 or 4 pages onto one page.

⑩ **Dial Pad**

Use these keys to dial telephone and fax numbers and as a keyboard for entering information into the MFC.

The **#** key lets you temporarily switch the dialing mode during a telephone call from Pulse to Tone.

⑪ Stop/Exit **Stop/Exit**

Stops a fax, copy and scan operation or exits from the menu.

⑫ Start **Start**

Lets you start sending faxes, making copies or scanning.

Status LED indications

The **Status** LED (Light Emitting Diode) will flash and change color depending on the MFC status.
The LED indications shown in the table below are used in the illustrations in this chapter.

LED				LED status
○				LED is off.
	● Green	● Yellow	● Red	LED is on.
	☀ Green	☀ Yellow	☀ Red	LED is blinking.

LED	MFC status	Description
○	Sleep Mode	The power switch is off or the MFC is in Sleep mode.
☀ Green	Warming Up	The MFC is warming up for printing.
● Green	Ready	The MFC is ready to print.
☀ Yellow	Receiving Data	The MFC is either receiving data from the computer, processing data in memory or printing data.
● Yellow	Data Remaining in Memory	Print data remains in the MFC memory.

LED	MFC status	Description
☀ (red flashing symbol) Red	Service error	Follow the steps below. 1. Turn off the power switch. 2. Wait a few seconds, and then turn it back on and try to print again. If you cannot clear the error and see the same service call indication after turning the MFC back on, please call Brother Customer Service at: 1-800-284-4329 (in USA) or 1-877-BROTHER (in Canada).
● Red	Cover open	The cover is open. Close the cover. (See *Error messages* on page 12-1.)
	Toner empty	Replace the toner cartridge with a new one. (See *Replacing the toner cartridge* on page 12-28.)
	Paper error	Put paper in the tray or clear the paper jam. Check the LCD message. (See *Troubleshooting* on page 12-1.)
	Scan lock	Check that the scanner lock lever is released. (See *Scanner Lock Lever* on page 1-5.)
	Others	Check the LCD message. (See *Troubleshooting* on page 12-1.)
	Out of memory	Memory is full. (See *Error messages* on page 12-1.)

When the power switch is off or the MFC is in Sleep mode, the LED is off.

About fax machines

Custom features

Do you have Voice Mail on the phone line?

If you have Voice Mail on the phone line where you will install your new MFC, *there is a strong possibility that Voice Mail and the MFC may conflict with each other while receiving incoming calls.*

Why should there be problems?

Since both the MFC and Voice Mail will pick up the call, after the number of rings you have set, each of them has the ability to keep the other from receiving calls.

For example, if your Voice Mail is set to answer after two rings and your MFC is set to answer after four, your Voice Mail will stop your MFC from receiving faxes.

If you set Voice Mail and the Brother MFC to answer after the same number of rings, there is no way of knowing which one will answer first. It is important to remember that neither Voice Mail nor the MFC can pass the call back to the other after the call has been answered.

How can you avoid possible problems?

A very good way to avoid problems like the one mentioned, *is to get a second phone number on your present phone line*.

Many people with Voice Mail choose an alternative service, which is called "Distinctive Ring", and they are very satisfied with it.
(See *Distinctive Ring* on page 5-11.)

Another way to avoid possible problems is to replace your Voice Mail with an answering machine. Your Brother MFC is designed to work with an answering machine or TAD (telephone answering device).

(See *Connecting an external telephone answering device (TAD)* on page 1-16.)

Fax tones and handshake

When someone is sending a fax, the MFC sends fax calling tones (CNG tones). These are quiet, intermittent beeps every 4-seconds. You'll hear them after you dial and press **Start** and they will continue for about 60 seconds after dialing. During that time, the sending machine must begin the "handshake", or connection, with the receiving machine.

Each time you use automatic procedures to send a fax, you are sending CNG tones over the phone line. You'll soon learn to listen for these quiet beeps each time you answer a phone on your fax line, so you will know if you are receiving a fax message.

The receiving fax responds with fax receiving tones, which are loud, chirping sounds. A receiving fax chirps for about 40 seconds over the phone line, and the LCD shows Receiving.

If your MFC is set to the Fax Only mode, it will answer every call automatically with fax receiving tones. If the other person hangs up, your MFC will continue to send the "chirps" for about 40 seconds, and the LCD continues to show Receiving. To cancel receiving, press **Stop/Exit**.

The fax 'handshake' is the time in which the sending machine's CNG tones and the receiving machines "chirps" overlap. This must be for at least 2 to 4 seconds, so both machines can understand how each is sending and receiving the fax. The handshake cannot begin until the call is answered, and the CNG tones only last for about 60 seconds after the number is dialed. So it is important for the receiving machine to answer the call in as few rings as possible.

When you have an external Telephone Answering Device (TAD) on your fax line, your TAD will decide the number of rings before the call is answered.
Pay special attention to the directions for connecting a TAD in this chapter. (See *Connecting an external telephone answering device (TAD)* on page 1-16.)

ECM (Error Correction Mode)

The Error Correction Mode (ECM) is a way for the MFC to check a fax transmission while it is in progress. If the MFC detects errors during fax transmission, if resends the pages of the fax that had an error. ECM transmissions are only possible between fax machines that both have this feature. If they do, you may send and receive fax messages that are continuously being checked by the MFC.

Your MFC must have enough memory for this feature to work.

Connecting the MFC

Connecting an external telephone

Although your MFC does not have a handset, you can connect a separate telephone (or telephone answering device) directly to your MFC as shown in the diagram below.

Connect the modular plug on the telephone's line cord to the jack labeled EXT. in the back of the MFC.
Whenever this phone (or TAD) is in use, the LCD shows `Telephone`.

Connecting an external telephone answering device (TAD)

Sequence

You may choose to connect an answering device. However, when you have an **external** TAD on the same telephone line as the MFC, the TAD answers all calls and the MFC "listens" for fax calling (CNG) tones. If it hears them, the MFC takes over the call and receives the fax. If it doesn't hear CNG tones, the MFC lets the TAD continue playing your outgoing message so your caller can leave you a voice message.

The TAD must answer within four rings (the recommended setting is two rings). The MFC cannot hear CNG tones until the TAD has answered the call, and with four rings there are only 8 to 10 seconds of CNG tones left for the fax "handshake". Make sure you carefully follow the instructions in this guide for recording your outgoing message. We do not recommend using the toll saver feature on your external answering machine if it exceeds five rings.

■ If you do not receive all your faxes, reduce the Ring Delay setting on your external TAD, to one or two rings.

■ *If You Subscribe to your Telephone Company's Distinctive Ring Service:*
  You may connect an external TAD to a separate wall jack only if you subscribe to your telephone company's Distinctive Ring service, have registered the distinctive ring pattern on your MFC, and use that number as a fax number. The recommended setting is four rings on the external TAD when you have the telephone company's Distinctive Ring Service.

■ *If You Do Not Subscribe to Distinctive Ring Service:*
  You must plug your TAD into the EXT. jack of your MFC. If your TAD is plugged into a wall jack, both your MFC and the TAD will try to control the phone line. (See illustration on the next page.)

Do not connect a TAD elsewhere on the same phone line
(unless you have the Distinctive Ring service).
Connections

The external TAD must be plugged into the back of the MFC, into the jack labeled EXT. Your MFC cannot work properly if you plug the TAD into a wall jack (unless you are using Distinctive Ring).

1 Plug the telephone line cord from the wall jack into the back of the MFC, in the jack labeled LINE.

2 Plug the telephone line cord from your external TAD into the back of the MFC, in the jack labeled EXT. (Make sure this cord is connected to the TAD at the TAD's telephone *line* jack, and not its telephone jack.)

3 Set your external TAD to four rings or less. (The MFC's Ring Delay setting does not apply.)

4 Record the outgoing message on your external TAD.

5 Set the TAD to answer calls.

6 Set the Receive Mode to External TAD.
(See *Choosing the Receive Mode* on page 5-1.)

Recording outgoing message (OGM) on an external TAD

Timing is important in recording this message. The message sets up the ways to handle both manual and automatic fax reception.

1 Record 5 seconds of silence at the beginning of your message. (This allows your MFC time to listen for the fax CNG tones of automatic transmissions before they stop.)

2 Limit your speaking to 20 seconds.

3 End your 20-second message by giving your Fax Receive Code for people sending manual faxes. For example:
"After the beep, leave a message or send a fax by pressing ✱ *51 and Start."*

We recommend beginning your OGM with an initial 5-second silence because the MFC cannot hear fax tones over a resonant or loud voice. You may try omitting this pause, but if your MFC has trouble receiving, then you must rerecord the OGM to include it.

Special line considerations

Roll-over phone lines

A roll-over phone system is a group of two or more separate telephone lines that pass incoming calls to each other if they are busy. The calls are usually passed down or "rolled over" to the next available phone line in a preset order.

Your MFC can work in a roll-over system as long as it is the last number in the sequence, so the call cannot roll away. Do not put the MFC on any of the other numbers; when the other lines are busy and a second fax call is received, the fax call would be transferred to a line that does not have a fax machine. **Your MFC will work best on a dedicated line.**

Two-line phone system

A two-line phone system is nothing more than two separate phone numbers on the same wall outlet. The two phone numbers can be on separate jacks (RJ11) or combined into one jack (RJ14). Your MFC must be plugged into an RJ11 jack. RJ11 and RJ14 jacks may be equal in size and appearance and both may contain four wires (black, red, green, yellow). To test the type of jack, plug in a two-line phone and see if it can access both lines. If it can, you must separate the line for your MFC. (See *Easy Receive* on page 5-4.)

Converting telephone wall outlets

There are three ways to convert to an RJ11 jack. The first two ways may require assistance from the telephone company. You can change the wall outlets from one RJ14 jack to two RJ11 jacks. Or, you can have an RJ11 wall outlet installed and slave or jump one of the phone numbers to it.

The third way is the easiest: Buy a triplex adapter. You can plug a triplex adapter into an RJ14 outlet. It separates the wires into two separate RJ11 jacks (Line 1, Line 2) and a third RJ14 jack (Lines 1 and 2). If your MFC is on Line 1, plug the MFC into L1 of the triplex adapter. If your MFC is on Line 2, plug it into L2 of the triple adapter.

Triplex Adapter
Installing MFC, external two-line tad and two-line telephone

When you are installing an external two-line telephone answering device (TAD) and a two-line telephone, your MFC must be isolated on one line at both the wall jack and at the TAD. The most common connection is to put the MFC on Line 2, which is explained in the following steps. The back of the two-line TAD must have two telephone jacks: one labeled L1 or L1/L2, and the other labeled L2. You will need at least three telephone line cords, the one that came with your MFC and two for your external two-line TAD. You will need a fourth line cord if you add a two-line telephone.

1 Place the two-line TAD and the two-line telephone next to your MFC.

2 Plug one end of the telephone line cord for your MFC into the L2 jack of the triplex adapter. Plug the other end into the LINE jack on the back of the MFC.

3 Plug one end of the first telephone line cord for your TAD into the L1 jack of the triplex adapter. Plug the other end into the L1 or L1/L2 jack of the two-line TAD.

4 Plug one end of the second telephone line cord for your TAD into the L2 jack of the two-line TAD. Plug the other end into the EXT. jack on the left side of the MFC.
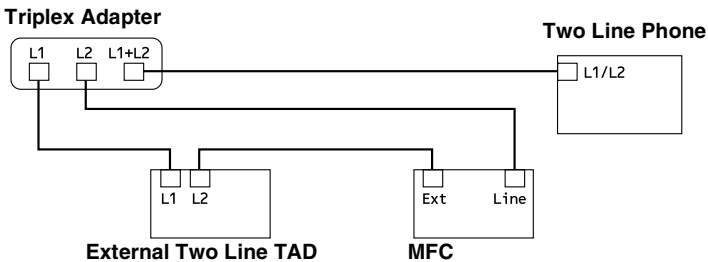

You can keep two-line telephones on other wall outlets as always. There are two ways to add a two-line telephone to the MFC's wall outlet. You can plug the telephone line cord from the two-line telephone into the L1+L2 jack of the triplex adapter. Or, you can plug the two-line telephone into the TEL jack of the two-line TAD.

Multi-line connections (PBX)

Most offices use a central telephone system. While it is often relatively simple to connect the MFC to a key system or a PBX (Private Branch Exchange), we suggest that you contact the company that installed your telephone system and ask them to connect the MFC for you. It is advisable to have a separate line for the MFC. You can then leave the Receive Mode set to FAX Only to receive faxes any time of the day or night.

If the MFC is to be connected to a multi-line system, ask your installer to connect the unit to the last line on the system. This prevents the unit from being activated each time a telephone call is received.

🚫 As with all fax units, this MFC must be connected to a two wire system. If your line has more than two wires, proper connection of the MFC cannot be made.

If you are installing the MFC to work with a PBX

1 It is not guaranteed that the unit will operate correctly under all circumstances with a PBX. Any cases of difficulty should be reported first to the company that handles your PBX.

2 If all incoming calls will be answered by a switchboard operator, it is recommended that the Receive Mode be set to `Manual`. All incoming calls should initially be regarded as telephone calls.

Custom features on your phone line

If you have Voice Mail, Call Waiting, Call Waiting/Caller ID, RingMaster, an answering service, an alarm system or other custom feature on one phone line it may create a problem with the operation of your MFC. (See *Custom features* on page 1-13 and *Custom features on a single line.* on page 12-14.)

2 **Paper**

About paper

Type and size of paper

The MFC loads paper from the installed paper tray, manual feed tray, multi-purpose tray or optional lower tray.

Tray Type	Model name
Paper tray (Tray #1)	MFC-8440, MFC-8640D, MFC-8840D and MFC-8840DN
Manual feed tray	MFC-8440
Multi-purpose tray (MP tray)	MFC-8640D, MFC-8840D and MFC-8840DN
Optional lower tray (Tray #2)	Option for MFC-8440, MFC-8640D, MFC-8840D and MFC-8840DN

Recommended paper

Plain Paper:	Xerox 4200DP 20 lb
	Hammermill Laser Paper 24 lb
Transparency:	3M CG 3300
Labels:	Avery laser label #5160

- Before you buy a large amount of paper, please test some to make sure that the paper is suitable.
- Use paper that is made for plain-paper copying.
- Use paper that is 20 to 24 lb (75 to 90 g/m^2).
- Use neutral paper. Do not use acidic or alkaline paper.
- Use long-grain paper.
- Use paper with a moisture content of approximately 5%.

Caution

Do not use ink jet paper. It may cause a paper jam and damage your MFC.

The output quality depends on the paper type and paper brand. Visit us at http://solutions.brother.com and check the latest recommendations for paper that can be used with the MFC-8440, MFC-8640D, MFC-8840D and MFC-8840DN.

Choosing acceptable paper

We recommend that you test paper (especially special sizes and types of paper) on the MFC before purchasing large quantities.

- Avoid feeding label sheets that are partly used or your MFC will be damaged.
- Avoid using coated paper, such as vinyl coated paper.
- Avoid using preprinted or highly textured paper, or paper with an embossed letterhead.

For optimum printing, use a recommended type of paper, especially for plain paper and transparencies. For more information on paper specifications, call your nearest authorized sales representative or the place where you purchased your MFC.

- Use label or transparencies that are designed for use in *laser* printers.
- For the best print quality, we recommend using long-grained paper.
- If you are using special paper and the paper has problems feeding from the paper tray, try again using the manual feed tray or multi-purpose tray.
- You can use recycled paper in this MFC.

Paper capacity of the paper trays

	Paper size	Number of sheets
Multi-purpose tray (MP tray) **(MFC-8640D, MFC-8840D and MFC-8840DN)**	Width: 2.75 to 8.66 in. (69.8 to 220 mm) Height: 4.57 to 16.0 in. (116 to 406.4 mm)	50 sheets (20 lb or 80 g/m^2)
Manual feed tray (MFC-8440)	Width: 2.75 to 8.66 in. (69.8 to 220 mm) Height: 4.57 to 16.0 in. (116 to 406.4 mm)	Single sheet
Paper tray (Tray #1)	A4, Letter, Legal, B5 (ISO), B5 (JIS), Executive, A5, A6, B6 (ISO)	250 sheets (20 lb or 80 g/m^2)
Optional lower tray (Tray #2)	A4, Letter, Legal, B5 (ISO), B5 (JIS), Executive, A5, B6 (ISO)	250 sheets (20 lb or 80 g/m^2)
Duplex printing (MFC-8640D, MFC-8840D and MFC-8840DN)	A4, Letter, Legal	—

Paper specifications for each paper tray

Model		MFC-8440	MFC-8640D, MFC-8840D and MFC-8840DN
Paper types	Multi-purpose tray	N/A	Plain paper, Bond paper, Recycled paper, Envelope[*1], Labels[*2], and Transparency[*2]
	Manual feed tray	Plain paper, Bond paper, Recycled paper, Envelope, Labels, and Transparency	N/A
	Paper tray	Plain paper, Recycled paper, and Transparency[*2]	
	Optional Lower tray	Plain paper, Recycled paper, and Transparency[*2]	
Paper weights	Multi-purpose tray	N/A	16 to 43 lb (60 to 161 g/m^2)
	Manual feed tray	16 to 43 lb (60 to 161 g/m^2)	N/A
	Paper tray	16 to 28 lb (60 to 105 g/m^2)	
	Optional Lower tray	16 to 28 lb (60 to 105 g/m^2)	
Paper sizes	Multi-purpose tray	N/A	Width: 2.75 to 8.66 in. (69.8 to 220 mm) Height: 4.57 to 16.0 in. (116 to 406.4 mm)
	Manual feed tray	Width: 2.75 to 8.66 in. (69.8 to 220 mm) Height: 4.57 to 16.0 in. (116 to 406.4 mm)	N/A
	Paper tray	A4, Letter, Legal, B5 (ISO), B5 (JIS), Executive, A5, A6, B6 (ISO)	
	Optional Lower Tray	A4, Letter, Legal, B5 (ISO), B5 (JIS), Executive, A5, B6 (ISO)	

*1 Up to 3 envelopes

*2 Up to 10 sheets

When printing transparencies, remove each one from the face-down output tray after it exits the MFC.

How to load paper

To load paper or other media in the paper tray

1 Pull the paper tray completely out of the MFC.
2 While pressing the paper guide release lever, slide the adjusters to fit the paper size.

Check that the guides are firmly in the slots.

📝 For Legal size paper, press the universal guide release button and pull out the back of the paper tray.

Universal Guide Release Button

3 Fan the stack of paper well to avoid paper jams and misfeeds.

**4** Put paper in the paper tray.

Check that the paper is flat in the tray, below the maximum paper mark, and that the paper guide is flush against the paper stack.

Up to here.
5 Put the paper tray firmly back in the MFC and unfold the support flap before you use the MFC.

Support Flap with Extension
When you put paper in the paper tray, please remember the following:

■ The side to be printed on must be face down.

■ Put the leading edge (top of the paper) in first and push it gently into the tray.

■ To copy or receive faxes on Legal size paper, unfold the support flap extension, too.

To load paper or other media in the manual feed tray (For MFC-8440)

When printing envelopes and labels you should only use the manual feed tray.

1 Open the manual feed tray. Slide the paper guides to fit the paper size.

2 Using both hands put paper in the manual feed tray until the front edge of the paper touches the paper feed roller. Hold the paper in this position until the MFC automatically feeds the paper in for a short distance, and then let go of the paper.

When you put paper in the manual feed tray, please remember the following:

■ The side to be printed on must be face up.

■ Put the leading edge (top of the paper) in first and push it gently into the tray.

■ Make sure that the paper is straight and in the proper position on the manual feed tray. If it is not, the paper may not be fed properly, resulting in a skewed printout or a paper jam.

■ Do not put more than one sheet of paper or envelope in the manual feed tray at any one time, or it may cause a jam.

To load paper or other media in the multi-purpose tray (MP tray) (For MFC-8640D, MFC-8840D and MFC-8840DN)

When printing envelopes and labels you should only use the multi-purpose tray.

1 Open the MP tray and lower it gently.

2 Pull out and unfold the MP tray support flap.

MP tray support flap
3 When loading paper in the MP tray, make sure it touches the back of the tray.
Make sure that the paper is straight and in the proper position on the MP tray. If it is not, the paper may not be fed properly, resulting in a skewed printout or a paper jam.

You can place up to 3 envelopes or up to 50 sheets of 20 lb or 80 g/m^2 paper in the MP tray.

**4** While pressing the paper-guide release lever, slide the paper guide to fit the paper size.
When you put paper in the MP tray, please remember the following:

■ The side to be printed on must be face up.

■ During printing, the inside tray rises to feed paper into the MFC.

■ Put the leading edge (top of the paper) in first and push it gently into the tray.

To use Automatic Duplexing for fax, copy and print operations
(For MFC-8640D, MFC-8840D and MFC-8840DN)

If you want to print on both sides of the paper using the Duplex feature for fax, copy or print, you will need to set the Paper Adjustment Lever to the size of paper you are using.

This feature is available for A4, Letter or Legal size paper. (See *Setting Duplex printing for Fax mode (For MFC-8640D, MFC-8840D and MFC-8840DN)* on page 5-10, *Duplex/N in 1* on page 10-11 and *Two-sided printing (Duplex Printing)* in Software User's Guide on the CD-ROM.)

1 Load paper in the Paper Tray or Multi-purpose Tray.

2 Set the Paper Adjustment Lever for Duplex Printing, in the back of the MFC, to match your paper size.

Letter/Legal

A4
3 Your MFC is now ready to print two-sided pages.

3 On-screen programming

User-friendly programming

Your MFC is designed to be easy to use with LCD on-screen programming using the navigation keys. User-friendly programming helps you take full advantage of all the menu selections your MFC has to offer.

Since your programming is done on the LCD, we have created step-by-step on-screen instructions to help you program your MFC. All you need to do is follow the instructions as they guide you through the menu selections and programming options.

Menu table

You can probably program your MFC without the User's Guide. But to help you understand the menu selections and options that are found in the MFC programs, use the Menu table on page 3-4.

You can program your MFC by pressing **Menu** followed by the menu numbers.
For example to set Fax Resolution to Fine:
Press **Menu**, **2**, **2**, **2** and ⬅ or ➡ to select Fine.
Press **Set**.

Memory Storage

If there is a power failure, you will not lose your menu settings because they are stored permanently. Temporary settings (such as Contrast, Overseas Mode, and so on) will be lost. You may also have to reset the date and time.

Navigation keys
Menu
* Access the menu

Set
* Go to the next menu level
* Accept an option

Clear/Back
* Exit the menu by pressing repeatedly
* Go back to the previous menu level

* Scroll through the current menu level

* Go back to the previous menu level

* Go forward to the next menu level

Stop/Exit
* Exit the menu

You can access the menu mode by pressing **Menu**.
When you enter the menu, the LCD scrolls.

Press **1** for General Setup menu
—**OR**—
Press **2** for Fax menu
—**OR**—
Press **3** for Copy menu
—**OR**—
Press **4** for Printer menu
—**OR**—
Press **5** for Print Reports menu
—**OR**—
Press **6** for LAN menu
(Only for MFC-N or if the optional LAN board (NC-9100h) is installed.)
—**OR**—
Press **0** for Initial Setup menu
—**OR**—

```
1.General Setup
2.Fax
3.Copy
4.Printer
Select ▲▼ & Set
```

```
4.Printer
5.Print Reports
6.LAN
0.Initial Setup
Select ▲▼ & Set
```

You can scroll more quickly through each menu level by pressing the arrow for the direction you want: ▲ or ▼ .

Then set an option by pressing **Set** when that option appears on the LCD.

The LCD will then show the next menu level.

Press ⬅ or ➡ to scroll to your next menu selection.

Press **Set**.

When you finish setting an option, the LCD shows Accepted.

📝 Use ⬅ to scroll backward if you passed your choices or want to save keystrokes.
The current setting is always the option with "✳".

To access the menu, press ⬤ **Menu**.

Press the Menu numbers.
(ex. Press **1**, **1** for Mode Timer)
—**OR**—

4 Getting started

Initial Setup

Setting the Date and Time

Your MFC displays the date and time and if you set up the Station ID it prints on every fax you send. If there is a power failure, you may have to reset the date and time. All other settings will not be affected.

1 Press **Menu**, **0**, **2**.

2 Enter the last two digits of the year.
   Press **Set**.

3 Enter two digits for the month.
   Press **Set**.
   (For example, enter 09 for September, or 10 for October.)

```
02.Date/Time

  Year:20XX
Enter & Set Key
```

4 Enter two digits for the day.
   Press **Set**.
   (For example, enter 06 for 6th.)

5 Enter the time in 24-Hour format.
   Press **Set**.
   (For example, enter 15:25 for 3:25 P.M.)

6 Press **Stop/Exit**. The LCD now shows the date and time whenever the MFC is in Standby mode.

Setting the Station ID

You should store your name or company name and fax number and telephone number to be printed on all fax pages that you send.

1 Press **Menu**, **0**, **3**.

2 Enter your fax number (up to 20 digits).
Press **Set**.

```
03.Station ID

  Fax:
Enter & Set Key
```

3 Enter your telephone number (up to 20 digits).
Press **Set**.
(If your telephone number and fax number are the same, enter the same number again).

■ The telephone number you enter is only used for Cover Page features. (See *Composing the electronic Cover Page* on page 6-12.)

■ You can not enter a hyphen.

4 Use the dial pad to enter your name (up to 20 characters).
Press **Set**.
(See *Entering text* on page 4-3.)

5 Press **Stop/Exit**.
The LCD will show the date and time.

If the Station ID has already been programmed, the LCD will ask you to press **1** to make a change or **2** to exit without changing.

Entering text

When you are setting certain functions, such as the Station ID, you may need to type text into the MFC. Most number keys have three or four letters printed above them. The keys for **0**, **#** and ✳ do not have printed letters because they are used for special characters.

By pressing the appropriate number key repeatedly, you can access the character you want.

Press Key	one time	two times	three times	four times
2	A	B	C	2
3	D	E	F	3
4	G	H	I	4
5	J	K	L	5
6	M	N	O	6
7	P	Q	R	S
8	T	U	V	8
9	W	X	Y	Z

Inserting spaces

To enter a space, press ⟩ once between numbers and twice between characters.

Making corrections

If you entered a letter incorrectly and want to change it, press ⟨ to move the cursor under the incorrect character. Then press **Clear/Back**. The letter above the cursor will be deleted. Re-enter the correct character.

Repeating letters

If you need to enter a character that is on the same key as the previous character, press ⟩ to move the cursor to the right before you press the key again.

Special characters and symbols

Press ✳, **#** or **0**, and then press ◀ or ▶ to move the cursor under the special character or symbol you want. Then press **Set** to select it.

Press ✳	for	(space) ! " # $ % & ' ( ) ✳ + , - . /€
Press **#**	for	: ; < = > ? @ [ ] ^ _
Press **0**	for	É À È Ê Î Ç Ë Ö 0

NOTICE (For USA)
The Telephone Consumer Protection Act of 1991 makes it unlawful for any person to use a computer or electronic device to send any message via a telephone fax machine unless such messages clearly contain, in a margin at the top or bottom of each transmitted page, or on the first page of the transmission, the date and time it is sent and an identification of the business or other entity or other individual sending the message and the telephone number of the sending machines or such business, other entity or individual.
In order to program this information into your MFC, complete the steps described on page 4-2.

Setting Tone and Pulse dialing mode (For Canada only)

1 Press **Menu**, **0**, **4**.
2 Press ⬆ or ⬇ to select Pulse (or Tone).
  Press **Set**.
3 Press **Stop/Exit**.

```
04.Tone/Pulse

▲      Tone
▼      Pulse
Select ▲▼ & Set
```

General Setup

Setting the Mode Timer

The MFC has three temporary mode keys on the control panel: Fax, Copy and Scan. You can change the number of seconds or minutes the MFC takes after the last Copy or Scan operation before it returns to Fax mode. If you select Off, the MFC stays in the mode you used last.
1 Press **Menu**, **1**, **1**.

2 Press ⬇ or ⬆ to select
0 Sec, 30 Secs, 1 Min,
2 Mins, 5 Mins or Off.

```
11.Mode Timer
▲      0 Sec
      30 Secs
▼      1 Min
Select ▲▼ & Set
```

3 Press **Set**.

Setting the Paper Type

To get the best print quality, set the MFC for the type of paper you are using.

For MFC-8440

1 Press **Menu**, **1**, **2**.

—**OR**—

If you have the optional paper tray, press **Menu**, **1**, **2**, **1** to set the paper type for Tray #1 or **Menu**, **1**, **2**, **2** to set the paper type for Tray #2.

```
12.Paper Type
▲      Plain
       Thick
▼      Thicker
Select ▲▼ & Set
```

```
12.Paper Type

  1.Tray #1
  2.Tray #2
Select ▲▼ & Set
```

2 Press ⬇ or ⬆ to select Thin, Plain, Thick, Thicker or Transparency.

3 Press **Set**.

4 Press **Stop/Exit**.

For MFC-8640D, MFC-8840D and MFC-8840DN

1 Press **Menu**, **1**, **2**, **1** to set the paper type for MP Tray.

—**OR**—

Press **Menu**, **1**, **2**, **2** to set the paper type for Tray #1.

—**OR**—

If you have the optional paper tray, press **Menu**, **1**, **2**, **3** to set the paper type for Tray #2.

```
12.Paper Type
 1.MP Tray
 2.Tray #1
 3.Tray #2
Select ▲▼ & Set
```

2 Press ⬐ or ⬎ to select Thin, Plain, Thick, Thicker or Transparency.

```
12.Paper Type
 1.MP Tray
▲      Plain
▼      Thick
Select ▲▼ & Set
```

3 Press **Set**.

4 Press **Stop/Exit**.

> You can select Transparency for Tray #1 and Tray #2 only when A4, Letter or Legal is selected in **Menu**, **1**, **3**.

Setting the Paper Size

You can use eight sizes of paper for printing copies: A4, letter, legal, executive, A5, A6, B5 and B6 and three sizes of paper for printing faxes: A4, letter and legal. When you change the size of paper in the MFC, you will need to change the setting for Paper Size at the same time so your MFC can fit an incoming fax or reduced copy on the page.

1 Press **Menu**, **1**, **3**.

2 Press ⬐ or ⬎ to select A4, Letter, Legal, Executive, A5, A6, B5 or B6.
Press **Set**.

```
13.Paper Size
▲      A4
       Letter
▼      Legal
Select ▲▼ & Set
```

3 Press **Stop/Exit**.

With optional paper tray (LT-5000)

1 Press **Menu**, **1**, **3**, **1** to set the paper size for Tray #1.

—**OR**—

Press **Menu**, **1**, **3**, **2** to set the paper size for Tray #2

```
13.Paper Size

 1.Tray #1
 2.Tray #2
Select ▲▼ & Set
```

2 Press ◁ or ▷ to select A4, Letter, Legal, Executive, A5, A6, B5 and B6.

Press **Set**.

3 Press **Stop/Exit**.

■ If you are using the optional paper tray, paper size A6 is not available.

■ If you select Transparency in **Menu**, **1**, **2**, you can only select A4, Letter or Legal.

Setting the Ring Volume

You can adjust the ring volume when your MFC is idle (not being used). You can turn the ring Off or you can select the ring volume level.

1 Press **Menu**, **1**, **4**, **1**.

2 Press ⬠ or ⬠ to select (Low, Med, High or Off). Press **Set**.

```
14.Volume
  1.Ring
▲     Med
▼     High
Select ▲▼ & Set
```

3 Press **Stop/Exit**.

—**OR**—

In Fax mode, press ◀ or ▶ to adjust the volume level. Every time you press these keys, the MFC will ring so you can hear the active setting as the LCD shows it. The volume changes with each key press. The new setting will stay until you change it again.

Setting the Beeper Volume

You can change the beeper volume. The default (factory) setting is Med. When the beeper is on, the MFC beeps every time you press a key or make a mistake and after a fax is sent or received.

1 Press **Menu**, **1**, **4**, **2**.

2 Press ⬠ or ⬠ to select your option. (Low, Med, High or Off) Press **Set**.

```
14.Volume
  2.Beeper
▲     Med
▼     High
Select ▲▼ & Set
```

3 Press **Stop/Exit**.

Setting the Speaker Volume

You can adjust the MFC's one-way speaker volume.

1 Press **Menu**, **1**, **4**, **3**.

2 Press ⬅ or ➡ to select
(Low, Med, High or Off).
Press **Set**.

3 Press **Stop/Exit**.

```
14.Volume
  3.Speaker
▲     Med
▼     High
Select ▲▼ & Set
```

—**OR**—

In Fax mode, you can adjust the speaker volume by pressing **Hook**, and then selecting a speaker volume level.

Press ◀ or ▶ to adjust the volume level. The LCD shows the setting you are choosing. Each key press changes the volume to the next setting. The new setting will remain until you change it again.

Turning on Automatic Daylight Savings Time

You can set the MFC to change automatically for Daylight Savings Time. It will reset itself forward one hour in the Spring and backward one hour in the Fall. Make sure you have set the correct day and time in the Date/Time setting.

1 Press **Menu**, **1**, **5**.

2 Press ⬅ or ➡ to select On (or Off).
Press **Set**.

3 Press **Stop/Exit**.

```
15.Auto Daylight

▲     On
▼     Off
Select ▲▼ & Set
```

Toner Save

You can conserve toner using this feature. When you set Toner Save to On, print appears somewhat lighter. The default setting is Off.

1 Press **Menu**, **1**, **6**, **1**.

2 Press ⬅ or ➡ to select On (or Off).

3 Press **Set**.

4 Press **Stop/Exit**.

```
16.Ecology
  1.Toner Save
▲     On
▼     Off
Select ▲▼ & Set
```

Sleep Time

Setting the Sleep Time reduces power consumption by turning off the fuser inside the MFC, while it is idle. You can choose how long the MFC is idle (from 00 to 99 minutes) before it goes into sleep mode. The timer is automatically reset when the MFC receives a Fax or PC data, or makes a copy. The factory setting is 05 minutes. While the MFC is in sleep mode, you will see Sleep on the LCD. If you try to print or copy in sleep mode, there will be a short delay while the fuser warms up to working temperature.

1 Press **Menu**, **1**, **6**, **2**.

2 Use the dial pad to enter the length of time the MFC is idle before it goes into sleep mode (00 to 99).

3 Press **Set**.

4 Press **Stop/Exit**.

■ If you want to turn sleep mode off, press **Secure** and **Job Cancel** simultaneously in Step 2.

■ If the MFC is in Sleep Mode when you change the Sleep Time, the new setting will take effect the next time the MFC copies or prints is restarted.

Turning off the Scanner Lamp

The scanner lamp stays on for 16 hours before automatically switching off to preserve the life of the lamp. You can turn off the scanner lamp manually if you wish by pressing the 	 and 	 keys simultaneously. The scanner lamp will remain turned off until the next time you use the scanning feature.

Turning off the scanner lamp will also reduce the power consumption.

Please note that turning the lamp off regularly will reduce the lamp's life. Some people prefer to turn the lamp off as they leave the office, or late at night at home. This is not necessary for normal day to day use.

Setting the Tray Use for Copy mode

📝 If your MFC is a MFC-8440 without the optional tray #2, you can skip this setting.

MFC-8440

The default setting of `Auto` allows[*1] your MFC to choose the optional Tray #2 when paper is out in Tray #1 or[*2] when the size of the original will fit best on the paper in Tray #2.

1 Press **Menu**, **1**, **7**.

2 Press ⬅ or ➡ to select
`Tray#1 Only`, `Tray#2 Only`, or `Auto`.

3 Press **Set**.

4 Press **Stop/Exit**.

```
17.Tray Use: Copy
▲    Tray#1 Only
     Tray#2 Only
▼    Auto
Select ▲▼ & Set
```

MFC-8640D, MFC-8840D and MFC-8840DN

The default setting of `Auto` allows[*1] your MFC to choose the optional Tray #2 or the MP tray when paper is out in Tray #1 or[*2] when the size of the original will fit best on the paper in Tray #2.

1 Press **Menu**, **1**, **7**.

2 Press ⬅ or ➡ to select
`Tray#1 Only`, `MP Only`, or `Auto`.

```
17.Tray Use: Copy
▲    Tray#1 Only
     MP Only
▼    Auto
Select ▲▼ & Set
```

—**OR**—

If you have the optional paper tray, press ⬅ or ➡ to select
`Tray#1 Only`, `Tray#2 Only`, `MP Only` or `Auto`.

```
17.Tray Use: Copy
▲    Tray#1 Only
     Tray#2 Only
▼    MP Only
Select ▲▼ & Set
```

3 Press **Set**.

4 Press **Stop/Exit**.

📝 *1 Copies will automatically be printed from Tray #2 only if the Paper Size setting for Tray #2 is the same as Tray #1.

*2 When using the ADF, copies will automatically be printed from Tray #2 if the Paper Size setting for Tray #2 is different than Tray #1 and this paper size is more suitable for the scanned original.

Setting the Tray Use for Fax mode

If your MFC doesn't have the optional tray #2, you can skip this setting.

The default setting of Auto allows your MFC to choose the optional Tray #2 if Tray #1 is out of paper or if incoming faxes will fit best on the paper in Tray #2.

1 Press **Menu**, **1**, **8**.

2 Press ⬅ or ➡ to select
Tray#1 Only, Tray#2 Only, or
Auto.

```
18.Tray Use: Fax
▲     Tray#1 Only
      Tray#2 Only
▼     Auto
Select ▲▼ & Set
```

3 Press **Set**.

4 Press **Stop/Exit**.

📝 If Auto Reduction is turned on, incoming faxes will be printed from the tray that is set for Auto Reduction. (See *Printing a reduced incoming fax (Auto Reduction)* on page 5-5.)

Setting the LCD Contrast

You can change the contrast to help the LCD look lighter or darker.

1 (MFC-8440)

Press **Menu**, **1**, **7**.

(MFC-8640D/8840D/8840DN)

Press **Menu**, **1**, **8**.

```

2 Press 🔸 to increase the contrast.

—**OR**—

Press 🔹 to decrease the contrast.

Press **Set**.

3 Press **Stop/Exit**.

5 Setup Receive

Basic receiving operations

Choosing the Receive Mode

There are four different Receive Modes for your MFC. You can choose the mode that best suits your needs.

LCD	How it works	When to use it
Fax Only (automatic receive)	The MFC automatically answers every call as a fax.	For dedicated fax lines.
Fax/Tel* (fax and telephone) (with an external or extension telephone)	The MFC controls the line and automatically answers every call. If the call is a fax it will receive the fax. If the call is not a fax it will ring (pseudo/double ring) for you to pick up the call.	Use this mode if you expect to receive lots of fax messages and few telephone calls. You cannot have an answering machine on the same line, even if it is on a separate wall jack/phone socket on the same line. You cannot use the telephone company's Voice Mail in this mode.
External TAD (with an external answering machine)	The external answering machine (TAD) automatically answers every call. Voice messages are stored on the external TAD. Fax messages are printed.	Use this mode if you have an external answering machine on your phone line. The TAD setting works only with an external answering machine. Ring Delay and F/T Ring Time do not work in this setting.
Manual (manual receive) (with an external or extension telephone or with Distinctive Ring)	You control the phone line and must answer every call yourself.	Use this mode if you don't receive many fax messages, use Distinctive Ring, or if you are using a computer on the same line. If you answer and hear fax tones, wait until the MFC takes over the call, then hang up. (See *Easy Receive* on page 5-4.)

* In Fax/Tel mode you must set the Ring Delay and F/T Ring Time. If you have extension phones on the line, keep the Ring Delay set to four rings.

The MP tray is not available with Fax Receive.

To select or change your Receive Mode

1 Press **Menu**, **0**, **1**.

2 Press ◁ or ▷ to select
Fax Only, Fax/Tel,
External TAD or Manual.
Press **Set**.

```
01.Receive Mode
▲     Fax Only
      Fax/Tel
▼     External TAD
Select ▲▼ & Set
```

3 Press **Stop/Exit**.

📝 If you are changing the Receive Mode while in another
operation, the LCD will return to that operation.

```

External TAD
Dial & Start
```

```
Fax Only
Fax/Tel
External TAD
Manual
```

Setting the Ring Delay

The Ring Delay sets the number of times the MFC rings before it
answers in Fax Only or Fax/Tel mode. If you have extension
phones on the same line as the MFC or subscribe to the telephone
company's Distinctive Ring service, keep the Ring Delay setting of 4.

(See *Easy Receive* on page 5-4 and *Operation from extension
telephones* on page 5-7.)

1 If it is not illuminated in green, press 📠 (**Fax**).

2 Press **Menu**, **2**, **1**, **1**.

3 Press ◁ or ▷ to select how
many times the line rings before
the MFC answers (00-04).
Press **Set**.
(If you select 00, the line won't ring at all.)

```
21.Setup Receive
  1.Ring Delay
▲     03
▼     04
Select ▲▼ & Set
```

4 Press **Stop/Exit**.

Setting the F/T Ring Time (Fax/Tel mode only)

If you set the Receive Mode to Fax/Tel, you'll need to decide how long the MFC will signal you with its special pseudo/double-ring when you have a *voice* call. (If it's a fax call, the MFC prints the fax.)

This pseudo/double-ring happens after the initial ringing from the phone company. Only the MFC rings (for 20, 30, 40 or 70 seconds) and no other phones on the same line will ring with the special pseudo/double-ring. However, you can still answer the call on any extension phone (in a separate wall jack/phone socket) on the same line as the MFC. (See *Operation from extension telephones* on page 5-7.)

1 If it is not illuminated in green, press ⌂ (**Fax**).

2 Press **Menu**, **2**, **1**, **2**.

3 Press ◛ or ◛ to select how long the MFC will ring to alert you that you have a voice call.
Press **Set**.

```
21.Setup Receive
  2.F/T Ring Time
▲      20
▼      30
Select ▲▼ & Set
```

4 Press **Stop/Exit**.

Even if the caller hangs up during the pseudo/double-ringing, the MFC will continue to ring for the set time.

Easy Receive

When you use this feature, you don't have to press **Start** or the Fax Receive Code ✳ **51** when you answer a fax call. Selecting On allows the MFC to receive fax calls automatically, even if you lift the handset of an extension or external phone. When you see Receiving on the LCD or when you hear 'chirps' through the handset of an extension phone connected to another wall jack/phone socket, just replace the handset and your MFC will do the rest. Selecting Off means you'll have to activate the MFC yourself by lifting the handset of an external or extension phone, and then press **Start** on the MFC —**OR**—by pressing ✳ **51** if you are not at your MFC. (See *Operation from extension telephones* on page 5-7.)

> If this feature is set to On, but your MFC doesn't connect a fax call when you lift a extension or external phone handset, press the Fax Receive Code ✳ **51**.
> If you send faxes from a computer on the same phone line and the MFC intercepts them, set Easy Receive to Off.

1 If it is not illuminated in green, press 📠 (**Fax**).

2 Press **Menu**, **2**, **1**, **3**.

3 Use ⌃ or ⌄ to select On (or Off).
Press **Set**.

```
21.Setup Receive
  3.Easy Receive
▲      On
▼      Off
Select ▲▼ & Set
```

4 Press **Stop/Exit**.

Printing a reduced incoming fax (Auto Reduction)

If you choose `On`, the MFC automatically reduces an incoming fax to fit on one page of letter, legal or A4 size paper, regardless of the paper size of the original. The MFC calculates the reduction ratio by using the page size of the original and your Paper Size setting (**Menu**, **1**, **3**).

1 If it is not illuminated in green, press 🖨 (**Fax**).

2 Press **Menu**, **2**, **1**, **5**.

3 If you have the optional paper tray #2, press ◁ or ▷ to select `Tray #1` or `Tray #2`. Press **Set**.

```
21.Setup Receive
  5.Auto Reduction
▲      On
▼      Off
Select ▲▼ & Set
```

4 Use ◁ or ▷ to select `On` (or `Off`). Press **Set**.

5 Press **Stop/Exit**.

📝 If you receive faxes that are split onto two pages, turn on this setting.

Printing a fax from the memory

If you set Fax Storage to ON for Remote Retrieval, you can still print a fax from the memory when you are at your MFC. (See *Setting Fax Storage* on page 8-3.)

1 Press **Menu**, **2**, **5**, **4**.

2 Press **Start**.

3 After printing has finished, press **Stop/Exit**.

```
25.Remote Fax Opt
  4.Print Fax

Press Start
```

Setting the Print Density

You can adjust print density, making your printed pages darker or lighter.

1 If it is not illuminated in green, press ⊞ (**Fax**).
2 Press **Menu**, **2**, **1**, **6**.

3 Press ▶ to make the print darker.

—**OR**—

Press ◀ to make the print lighter.

Press **Set**.

4 Press **Stop/Exit**.

```
21.Setup Receive
  6.Print Density

     -□□■□□+
Select ◀▶ & Set
```

Advanced receiving operations

Operation from extension telephones

If you answer a fax call on an extension telephone, or an external telephone in the EXT. jack, you can make your MFC take the call by using the Fax Receive Code. When you press the Fax Receive Code ✱ **51**, the MFC starts to receive a fax.
(See *Easy Receive* on page 5-4.)
If the MFC answers a voice call and pseudo/double-rings for you to take over, use the Telephone Answer Code **#51** to take the call at an extension phone. (See *Setting the F/T Ring Time (Fax/Tel mode only)* on page 5-3.)

If you answer a call and no one is on the line, you should assume that you're receiving a manual fax.

■ At an extension phone (on a separate telephone wall jack/phone socket), press ✱ **51**, wait for fax-receiving tones (chirps), and then hang up.

■ At an external phone (connected to the MFC's EXT jack), press ✱ **51** and wait for the phone to be disconnected before you hang up (the LCD shows Receiving).

Your caller will have to press **Start** to send the fax.

For FAX/TEL mode only

When the MFC is in FAX/TEL mode, it will use the F/T Ring Time (pseudo/double-ringing) to alert you to pick up a voice call.

Lift the external telephone's handset, and then press **Hook** to answer.

If you're at an extension phone, you'll need to lift the handset during the F/T Ring Time and then press **#51** between the double rings. If no one is on the line, or if someone wants to send you a fax, send the call back to the MFC by pressing ✱ **51**.

Using a cordless external handset

If your cordless telephone is connected to the EXT. jack of the MFC and you typically carry the cordless handset elsewhere, it is easier to answer calls during the Ring Delay. If you let the MFC answer first, you will have to go to the MFC so you can press **Hook** to transfer the call to the cordless handset.

Changing the remote codes

Remote Codes might not work with some telephone systems. The preset Fax Receive Code is ✱ **51**. The preset Telephone Answer Code is **# 51**.

📝 If you are always disconnected when accessing your external TAD remotely, try changing the Fax Receive Code and Telephone Answer Code to another three-digit code (such as **###** and **999**).

1 If it is not illuminated in green, press 📠 (**Fax**).

2 Press **Menu**, **2**, **1**, **4**.

3 Press ⬅ or ➡ to select On (or
Off).
Press **Set**.

```
21.Setup Receive
  4.Remote Code
▲      On
▼      Off
Select ▲▼ & Set
```

4 If you want to, enter a new Fax Receive Code.
Press **Set**.

5 If you want to, enter a new Telephone Answer Code.
Press **Set**.

6 Press **Stop/Exit**.

Polling

Polling is the process of retrieving faxes from another fax machine. You can use your MFC to 'poll' other machines, or you can have someone poll your MFC.

Everyone who is involved in Polling needs to set up their fax machines for Polling. When someone polls your MFC to receive a fax, they pay for the call. If you poll someone's fax machine to receive a fax, you pay for the call.

Some fax machines do not respond to the Polling feature.

Setting up Polling Receive

Polling Receive is when you call another fax machine to receive a fax from it.

1 If it is not illuminated in green, press ✍ (**Fax**).

2 Press **Menu**, **2**, **1**, **7**.

3 Press ◠ or ◡ to select On (or Off).
Press **Set**.

```
21.Setup Receive
  7.Polling RX
▲      On
▼      Off
Select ▲▼ & Set
```

4 Enter the fax number you are polling.

5 Press **Start**.
The LCD shows Dialing.

Setting up Sequential Polling Receive

Your MFC can ask for faxes from several fax units in a single operation (Sequential Polling Receive). Afterwards, a Sequential Polling Report will be printed.

1 If it is not illuminated in green, press 📠 (**Fax**).

2 Press **Menu**, **2**, **1**, **7**.

3 Press ◁▷ or ◁▷ to select On (or Off).

Press **Set**.

```
21.Setup Receive
  7.Polling RX
▲     On
▼     Off
Select ▲▼ & Set
```

4 Enter the fax machines you want to poll using One-Touch, Speed-Dial, a Group or the dial pad. You must press **Set** between each fax number.

5 Press **Start**. Your MFC will poll each number or Group number in turn to receive a fax.

Setting Duplex printing for Fax mode (For MFC-8640D, MFC-8840D and MFC-8840DN)

If you set Duplex to On for fax receive, the MFC prints received faxes on both sides of the paper.

You can use three sizes of paper for this function - letter, legal and A4.

1 If it is not illuminated in green, press 📠 (**Fax**).

2 Press **Menu**, **2**, **1**, **8**.

3 Press ◁▷ or ◁▷ to select On (or Off).

Press **Set**.

```
21.Setup Receive
  8.Duplex
▲     On
▼     Off
Select ▲▼ & Set
```

4 Press **Stop/Exit**.

📝 While the Duplex printing for fax is working, auto reduction is also On temporarily.

Telephone services

Your MFC supports the Distinctive Ring telephone service that some telephone companies offer.

✎ If you have Voice Mail, RingMaster, an answering service, an alarm system or other custom features on your telephone line, it may affect the way your MFC works. (See *Custom features* on page 1-13 and *Custom features on a single line.* on page 12-14.) If you have Voice Mail on your phone line, please read the following carefully.

Distinctive Ring

Brother uses the term 'Distinctive Ring' but different telephone companies have other names for this service such as SmartRing, RingMaster, Teen-Ring, Indent-a-Call or Indent-a-Ring.

What does your telephone company's 'Distinctive Ring' do?

Your telephone company's Distinctive Ring service allows you to have more than one number on the same phone line. **If you need more than one phone number, it is cheaper than paying for an extra line.** Each phone number has its own distinctive ring pattern, so you will know which phone number is ringing. This is one way you can have a separate phone number for your MFC.

✎ Please call your telephone company for availability and rates.

What does Brother's 'Distinctive Ring' do?

The Brother MFC has a Distinctive Ring feature that allows you to use your MFC to take full advantage of the telephone company's Distinctive Ring service. The new phone number on your line can just receive faxes.

✎ You must pay for your telephone company's Distinctive Ring service before you program the MFC to work with it.

Do you have Voice Mail?

If you have Voice Mail on the phone line that you will install your new MFC on, *there is a strong possibility that Voice Mail and the MFC will conflict with each other while receiving incoming calls*. **However, the Distinctive Ring feature allows you to use more than one number on your line, so both Voice Mail and the MFC can work together without any problems.** If each one has a separate phone number, neither will interfere with the other's operations.

If you decide to get the Distinctive Ring service from the telephone company, you will need to follow the directions below to 'register' the new Distinctive Ring pattern they give you. This is so your MFC can recognize its incoming calls.

You can change or cancel the Distinctive Ring pattern at any time. You can switch it off temporarily, and turn it back on later. When you get a new fax number, make sure you reset this feature.

Before you choose the ring pattern to register

You can only register one Distinctive Ring pattern with the MFC. Some ring patterns cannot be registered. The ring patterns below are supported by your Brother MFC. Register the one your telephone company gives you.

Ring Pattern	Rings	
1	long-long	
2	short-long-short	
3	short-short-long	
4	very long (normal pattern)	

If the ring pattern you received is not on this chart, **please call your telephone company and ask for one that is shown**.

- The MFC will only answer calls to its registered number.
- The first two rings are silent on the MFC. This is because the fax must «listen» to the ring pattern (to compare it to the pattern that was 'registered'). (Other telephones on the same line will ring.)
- If you program the MFC properly, it will recognize the registered ring pattern of the 'fax number' within 2 ring patterns and then answer with a fax tone. When the 'voice number' is called, the MFC will not answer.

Registering the Distinctive Ring pattern

Very important!

After you have set the Distinctive Ring feature to ON, the receive mode is set to Manual automatically. Unless you have a TAD or Voice Mail set up on the Distinctive Ring number, Manual mode means you must answer all the calls yourself. You can not change the receive mode to the other mode while the Distinctive Ring is set to on.

1 Press **Menu**, **2**, **0**, **4**.

2 Press ⬅ or ➡ to select Set. Press **Set**.

3 Press ⬅ or ➡ to select the stored ring pattern you want to use. Press **Set**.
(You will hear each pattern as you scroll through the four patterns. Make sure you choose the pattern that the telephone company gave you.)

```
20.Miscellaneous
  4.Distinctive
▲     Off
▼     Set
Select ▲▼ & Set
```

4 Press **Stop/Exit**.
Distinctive Ring is now set to on.

Turning off the Distinctive Ring

1 Press **Menu**, **2**, **0**, **4**.

2 Press ⬅ or ➡ to select Off. Press **Set**.

3 Press **Stop/Exit**.

```
20.Miscellaneous
  4.Distinctive
▲     On
▼     Off
Select ▲▼ & Set
```

📝 If you turn off Distinctive Ring, the MFC will stay in Manual receive mode. You will need to set the Receive Mode again. (See *To select or change your Receive Mode* on page 5-2.)

Caller ID

The Caller ID feature lets you use the Caller ID subscriber service offered by many local telephone companies. This service provides you, by means of the LCD, the name or telephone number of your caller as the line rings.

After a few rings, the LCD shows the telephone number of your caller (or name, if available). Once you pick up the handset, the Caller ID information disappears from the LCD, but the call information remains stored in the Caller ID memory.

■ You will see the first 16 characters of the number (or name).

■ Out of Area display means call originated outside your Caller ID service area.

■ Private Call display means the caller has intentionally blocked transmission of information.

If both the name and number are received, the LCD shows only the name. You can print a list of Caller ID information received by your MFC. (See *Printing Caller ID List* on page 5-15.)

Caller ID service varies with different carriers. Call your local telephone company to determine the kind of service available in your area.

Viewing Caller ID List

Caller ID memory stores information for up to thirty calls. When the thirty-first call comes in, information about the first call is erased. You can scroll through Caller ID information to review those calls made to your MFC.

1 Press **Menu**, **2**, **0**, **5**.

2 Press ⬆ or ⬇ to select
Display#.
Press **Set**.
If the name was not received, it will
not be displayed.

```
20.Miscellaneous
  5.Caller ID
▲     Display#
▼     Print Report
Select ▲▼ & Set
```

3 Press ⬆ or ⬇ to scroll through the Caller ID memory to select the Caller ID you want to view, and then press **Set**. The LCD shows the caller's number and the date and time of the call.

4 Press ◀ to return to the Caller ID listing.
—**OR**—
Press **Stop/Exit**.

Clearing a Caller ID stored in the memory

For effective use of the memory, we recommend that you clear the Caller IDs stored in memory by pressing **Clear/Back** when the LCD shows each caller ID number or name.

Printing Caller ID List

1 Press **Menu**, **2**, **0**, **5**.

2 Press ⬆ or ⬇ to select
Print Report.
Press **Set**.

```
20.Miscellaneous
  5.Caller ID
▲     Display#
▼     Print Report
Select ▲▼ & Set
```

3 Press **Start**.

4 After printing has finished,
press **Stop/Exit**.

6 Setup Send

How to Fax
You can send faxes from the ADF (Automatic Document Feeder) or from the scanner glass.

Enter Fax mode

Before sending faxes, make sure (**Fax**) is illuminated in green. If not, press (**Fax**) to enter Fax mode. The default setting is Fax.

Faxing from the automatic document feeder (ADF)

The ADF can hold up to 50 pages and feeds each sheet individually. Use standard (20 lb or 75 g/m^2) paper and always fan the pages before putting them in the ADF.

DO NOT use paper that is curled, wrinkled, folded, ripped, stapled, paper clipped, pasted or taped.

DO NOT use cardboard, newspaper or fabric. (To fax this kind of original, see *Faxing from the scanner glass* on page 6-3.)

■ Make sure originals written with ink are completely dry.

■ The originals to be faxed must be from 5.8 to 8.5 inches wide and 5.8 to 14 inches long.

Faxing from the ADF

1 If it is not illuminated in

   green, press [Fax icon]

   (**Fax**). Pull out the ADF
   Document Support
   Extension.

ADF Document
Support Extension

ADF
Document
Output
Support
Flap

2 Unfold the ADF
   Document Output
   Support Flap.

3 Fan the pages well and
   stagger them at an angle. Make sure you put the originals **face
   up, top edge first** in the ADF until you feel them touch the feed
   roller.

4 Adjust the paper guides to fit the width of your originals.
**The originals are
Face Up
in the ADF**

Document Support

5 Dial the fax number.
   Press **Start**. The MFC starts scanning the first page.

Faxing from the scanner glass

You can use the scanner glass to fax pages of a book or one page at a time. The originals can be up to letter, A4 or legal size (8.5 inches to 14 inches). To cancel, press **Stop/Exit**.
1 If it is not illuminated in green, press ⌨ (**Fax**). Lift the document cover.

Document Guidelines

The originals are Face Down on the Scanner Glass

2 Using the document guidelines on the left, center the original face down on the scanner glass.

3 Close the document cover.

🛑 If the original is a book or is thick, do not slam the cover or press on it.

4 Dial the fax number.
Press **Start**.
The MFC starts scanning the first page.

5 To send a single page, press **2** (or press **Start** again). The MFC starts sending the original.

```
Flatbed Fax:
 Next Page?
▲  1.Yes
▼  2.No(Send)
Select ▲▼ & Set
```

—**OR**—

To send more than one page, press **1** and go to Step 6.

6 Place the next page on the scanner glass.

Press **Set**.
The MFC starts scanning. (Repeat Steps 5 and 6 for each additional page.)

```
Flatbed Fax:

Set Next Page
Then Press Set
```

📝 ■ If the memory is full and you are faxing a single page, it will be sent in real time.

■ If you need to cancel before the fax is sent, press **Stop/Exit**.

Faxing legal size originals from the scanner glass

When originals are legal size, you need to set the Glass Fax Size to
Legal. If you do not, the bottom portion of the faxes will be missing.

1 If it is not illuminated in green, press 📠 (**Fax**).

2 Press **Menu**, **2**, **2**, **0**.

3 Press ⬅ or ➡ to select Legal.

  Press **Set**.

4 Press **Stop/Exit**.

Out of Memory message

If you get an Out of Memory message while scanning the first page
of a fax, press **Stop/Exit** to cancel the scan. If you get an
Out of Memory message while scanning a subsequent page, you
will have the option to press **Start** to send the pages scanned so far,
or to press **Stop/Exit** to cancel the operation.

Manual transmission

Manual transmission lets you hear the dialing, ringing and
fax-receiving tones while sending a fax.

1 If it is not illuminated in green, press 📠 (**Fax**). Place the
  original face up in the ADF, or face down on the scanner glass.

2 Pick up the handset of the external phone and listen for a dial
  tone.
  —**OR**—
  Press **Hook** and listen for a dial tone.

3 On the external phone, dial the fax number you want to call. If
  you pressed **Hook**, dial using the MFC dial pad.

4 When you hear the fax tone,
  press **Start**.

  If you are using the ADF, go to
  Step 6.

  If you are using the scanner glass,
  go to Step 5.

```
Send or Receive?

▲    1.Send
▼    2.Receive
Select ▲▼ & Set
```

5 Press **1** to send a fax.

6 If you picked up the handset of the external phone, replace it.

Automatic transmission

This is the easiest way to send a fax.

🚫 You must not pick up the handset of the external phone or press **Hook** to listen for a dial tone.

1 If it is not illuminated in green, press 📠 (**Fax**). Place the original face up in the ADF, or face down on the scanner glass.

2 Enter the fax number using the dial pad, One-Touch, Speed-Dial or Search.
(See *One-Touch Dialing* on page 7-5 and *Speed-Dialing* on page 7-6.)

3 Press **Start**.

4 If you are using the scanner glass, press **2** or **Start**.

Sending a fax at the end of a conversation

At the end of a conversation you can send a fax to the other party before you both hang up.

1 Ask the other party to wait for fax tones (beeps) and then to press **Start** before hanging up.

2 If it is not illuminated in green, press 📠 (**Fax**). Place the original face up in the ADF, or face down on the scanner glass.
Press **Start**.
The LCD shows:

3 Press **1** to send the fax.

4 Replace the external handset.

```
Send or Receive?

▲    1.Send
▼    2.Receive
Select ▲▼ & Set
```

Basic sending operations

Sending faxes using multiple settings

When you send a fax you can choose any combination of these settings: cover page, contrast, resolution, overseas mode, delayed fax timer, polling transmission or real time transmission. After each setting is accepted, the LCD will ask if you want to enter more settings:

Press **1** to select more settings. The LCD will return to the Setup Send menu.

—**OR**—

Press **2** if you have finished choosing settings and go to the next step.

```
22.Setup Send
  Other Settings?
▲     1.Yes
▼     2.No
Select ▲▼ & Set
```
Contrast

If your original is very light or very dark, you may want to set the contrast.

Use Light to make the fax darker.

Use Dark to make the fax lighter.

1 If it is not illuminated in green, press ⊠ (**Fax**). Place the original face up in the ADF, or face down on the scanner glass.

2 Press **Menu**, **2**, **2**, **1**.

3 Press ◁ or ▷ to select Auto, Light or Dark. Press **Set**.
```
22.Setup Send
  1.Contrast
▲     Auto
▼     Light
Select ▲▼ & Set
```

4 Press **1** if you want to choose more settings and the LCD will return to the Setup Send menu.

—**OR**—

Press **2** if you have finished choosing settings for this page, and then go to Step 5.

5 Enter a fax number.

6 Press **Start** to send the fax from the ADF.

The MFC starts scanning the first page.

If you are using the scanner glass, go to Step 7.

7 To send a single page, press **2** (or press **Start** again).

The MFC starts sending the original.

—**OR**—

To send more than one page, press **1** and go to Step 8.

8 Place the next page on the scanner glass.

Press **Set**.

The MFC starts scanning and returns to Step 7. (Repeat Step 7 and 8 for each additional page).

Fax Resolution

When you have an original in the ADF or on the scanner glass you can use the **Resolution** key to change the setting temporarily (for this fax only). If it is not illuminated in green, press ✒ (**Fax**). Press **Resolution** repeatedly until the LCD shows the setting you want.

—**OR**—

You can change the default setting.

1 If it is not illuminated in green, press ✒ (**Fax**).

2 Press **Menu**, **2**, **2**, **2**.

3 Press ⌒ or ⌒ to select the resolution you want.

Press **Set**.

```
22.Setup Send
  2.Fax Resolution
▲     Standard
▼     Fine
Select ▲▼ & Set
```

4 Press **Stop/Exit**.
Standard: Suitable for most typed originals.

Fine: Good for small print and transmits a little slower than Standard resolution.

S.Fine: Good for small print or artwork and transmits slower than Fine resolution.

Photo: Use when the original has varying shades of gray. This has the slowest transmission time.

Manual and automatic fax Redial

If you are sending a fax manually and the line is busy, press **Redial/Pause**, and then press **Start** to try again. If you want to make a second call to the last number dialed, you can save time by pressing **Redial/Pause** and **Start**.

Redial/Pause only works if you dialed from the control panel.
If you are sending a fax automatically and the line is busy, the MFC will automatically redial one time after five minutes.

Dual Access

You can dial a number, and begin scanning the fax into memory—
even when the MFC is receiving, sending or printing a fax from
memory. The LCD shows the new job number.

If you get a Out Of Memory message while scanning the first
page of a fax, press **Stop/Exit** to cancel scanning. If you get a
Out Of Memory message while scanning a subsequent page,
you can press **Start** to send the pages scanned so far, or press
Stop/Exit to cancel the operation.

1 If it is not illuminated in green, press ⎙ (**Fax**). Place the
   original face up in the ADF, or face down on the scanner glass.

2 Enter the fax number.

3 Press **Start** to send the fax.

   The MFC starts scanning the first page and the LCD shows the
   job number (#XXX) of the fax. You can repeat Steps 1 to 3 for
   the next fax.

   —**OR**—

   If you are using the scanner glass, go to Step 4.

4 To send a single page,
   press **2** (or press **Start** again).

   The MFC starts sending the
   original.
   —**OR**—
   To send more than one page,
   press **1** and go to Step 5.

```
Flatbed Fax:
 Next Page?
▲   1.Yes
▼   2.No(Send)
Select ▲▼ & Set
```

5 Place the next page on the
   scanner glass. Press **Set**.

   The MFC starts scanning, and
   then returns to Step 4. (Repeat
   Steps 4 and 5 for each additional
   page). To send the next fax, go to Step 1.

```
Flatbed Fax:

Set Next Page
Then Press Set
```

Real Time Transmission

When you are sending a fax, the MFC will scan the originals into the memory before sending. Then, as soon as the phone line is free, the MFC will start dialing and sending.

If the memory becomes full, the MFC will send the original in real time (even if Real Time TX is set to Off).

Sometimes, you may want to send an important original immediately, without waiting for memory transmission. You can set Real Time TX to On for all originals or for the next fax only.

If you want to fax multiple pages, use ADF.

1 If it is not illuminated in green, press ✐ (**Fax**). Place the original face up in the ADF, or face down on the scanner glass.

2 Press **Menu**, **2**, **2**, **5**.

3 To change the default setting, press ⌒ or ⌒ to select On (or Off).
Press **Set**.
Go to Step 5.
—**OR**—
For the next fax transmission only, press ⌒ or ⌒ to select Next Fax Only.
Press **Set**.

```
22.Setup Send
  5.Real Time TX
▲     Next Fax Only
▼     On
Select ▲▼ & Set
```

4 Press ⌒ or ⌒ to select Next Fax:On
(or Next Fax:Off).
Press **Set**.

5 Press **1** if you want to choose more settings and the LCD will return to the Setup Send menu.
—**OR**—
Press **2** if you have finished choosing settings for this page, and then go to Step 6.

6 Enter the fax number.

7 Press **Start** to send the fax.

In Real Time Transmission using the scanner glass, the auto redial function doesn't work.

Checking job status

Check which jobs are still waiting in the memory to be sent. (If there are no jobs, the LCD shows No Jobs Waiting.)

1 Press **Menu**, **2**, **6**.

2 If you have more than one job waiting, press ⬅ or ➡ to scroll through the list.

```
26.Remaining Jobs
▲ #001 12:34 BROTHER
  #002 15:00 BIC
▼ #003 17:30 ABCDEFG
Select ▲▼ & Set
```

3 Press **Stop/Exit**.

Canceling a job while scanning the original

You can cancel a job while you are scanning it into memory by pressing **Stop/Exit**.

Canceling a scheduled job

You can cancel a fax job that is stored and waiting in memory. (See *Checking job status* on page 6-11.)

1 Press **Menu**, **2**, **6**.

Any jobs that are waiting will appear on the LCD.

```
26.Remaining Jobs
▲ #001 12:34 BROTHER
  #002 15:00 BIC
▼ #003 17:30 ABCDEFG
Select ▲▼ & Set
```

2 If you have more than two jobs waiting, press ⬅ or ➡ to select the job you want to cancel.

Press **Set**.
—**OR**—
If you only have one job waiting, go to Step 3.

3 Press **1** to cancel.
—**OR**—
Press **2** to exit without canceling.
To cancel another job go to Step 2.

4 Press **Stop/Exit**.

Advanced sending operations

Composing the electronic Cover Page

The Cover Page is created at the receiving machine. Your Cover Page includes the name stored in the One-Touch or Speed-Dial memory. If you're dialing manually, the name is left blank.

The Cover Page shows your Station ID and the number of pages you're sending. (See *Setting the Station ID* on page 4-2.) If you have Cover Page set to ON (**Menu**, **2**, **2**, **7**), the number of pages is left blank.

You can select a comment to include on your Cover Page.

```
1.Comment Off
2.Please Call
3.Urgent
4.Confidential
```

Instead of using one of the preset comments, you can enter two personal messages of your own, up to 27 characters long. Use the chart on page 4-3 for help entering characters.
(See *Composing your own comments* on page 6-13.)

```
5.(User Defined)
6.(User Defined)
```

Most of the Setup Send settings are temporary to allow you to make changes for each fax you send. However, when you set up your Cover Page and Cover Page Comments, you are changing the default settings so they will be available while faxing.

Composing your own comments

You can set up two comments of your own.

1 If it is not illuminated in green, press 📠 (**Fax**).

2 Press **Menu**, **2**, **2**, **8**.

3 Press ⬅ or ➡ to choose 5 or
6 for your own comment.
Press **Set**.

```
22.Setup Send
  8.Coverpage Msg
▲    5.
▼    6.
Select ▲▼ & Set
```

4 Use the dial pad to enter your
customized comment.
Press **Set**.
(See *Entering text* on page 4-3.)

5 Press **1** if you want to choose more settings and the LCD will
return to the Setup Send menu
—**OR**—
Press **2** to exit.
Cover page for the next fax only

This feature does not work without the Station ID. So make sure it has been set. (See *Setting the Station ID* on page 4-2.) If you only want to send a Cover Page with a particular fax, this Cover Page will include the number of pages in your original.

1 If it is not illuminated in green, press ✍ (**Fax**). Place the original face up in the ADF, or face down on the scanner glass.

2 Press **Menu**, **2**, **2**, **7**.

3 When LCD shows
Next Fax Only.
Press **Set**.

```
22.Setup Send
  7.Coverpg Setup
▲    Next Fax Only
▼    On
Select ▲▼ & Set
```

4 Press ◀ or ▶ to select Next Fax:On
(or Next Fax:Off).
Press **Set**.

5 Press ◀ or ▶ to select one of the standard or your own comments.
Press **Set**.

6 Enter two digits to show the number of pages you are sending.
Press **Set**.
(For example, press **0**, **2** for 2 pages or enter **0 0** to leave the number of pages blank. If you make a mistake, press ◀ to back up and re-enter the number of pages.)

7 Press **1** if you want to choose more settings and the LCD will return to the Setup Send menu
—**OR**—
Press **2** if you have finished choosing settings.

8 Enter the fax number you're calling.

9 Press **Start**.

Send a cover page for all faxes

This feature does not work without the Station ID. Please be sure it has been set before continuing. (See *Setting the Station ID* on page 4-2.)

You can set the MFC to send a cover page whenever you send a fax. The number of pages in your fax is not included when you use this setting.

1 If it is not illuminated in green, press ✏️ (**Fax**).

2 Press **Menu**, **2**, **2**, **7**.
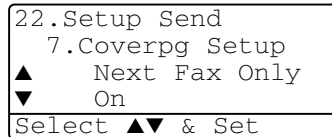

3 Press ⬅ or ➡ to select On.
   Press **Set**.

```
22.Setup Send
  7.Coverpg Setup
▲     Next Fax Only
▼     On
Select ▲▼ & Set
```

4 If you selected On, press ⬅ or ➡ to select one of the standard or your own comments.
   Press **Set**.

5 Press **1** if you want to choose more settings and the LCD will return to the Setup Send menu

   —**OR**—

   Press **2** to exit if you have finished choosing settings.

Using a printed cover page

If you prefer to use a printed cover page that you can write on, you can print the sample page and attach it to your fax.
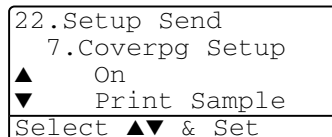

1 If it is not illuminated in green, press ✏️ (**Fax**).

2 Press **Menu**, **2**, **2**, **7**.

3 Press ⬅ or ➡ to select Print Sample.
   Press **Set**.

```
22.Setup Send
  7.Coverpg Setup
▲     On
▼     Print Sample
Select ▲▼ & Set
```

4 Press **Start**. Your MFC prints a copy of your cover page.

5 Press **Stop/Exit**.

Broadcasting

Broadcasting is when the same fax message is automatically sent to more than one fax number. Using the **Set** key, you can include Groups, One-Touch, Speed-Dial numbers and up to 50 manually dialed numbers. If you did not use up any of the numbers for Groups, access codes or credit card numbers, you can 'broadcast' faxes to as many as 290 different numbers (MFC-8640D) or 390 different numbers (MFC-8440/8840D/8840DN). However, the available memory will vary depending on the types of jobs in the memory and the number of locations used for broadcasting. If you broadcast to the maximum numbers available, you will not be able to use Dual Access and Delayed fax.

To include One-Touch or Speed-Dial numbers and manually dialed numbers in the same broadcast, you must press **Set** between each of the numbers. Use **Search/Speed Dial** to help you choose the numbers easily.

(See *Setting up Groups for Broadcasting* on page 7-4.)

After the broadcast is finished, a Broadcast Report will be printed to let you know the results.

■ Enter the long dialing sequence numbers as you would normally, but remember that each One-Touch and Speed-Dial number counts as one number, so the number of locations you can store becomes limited.

■ If the memory is full, press **Stop/Exit** to stop the job or if more than one page has been scanned, press **Start** to send the portion that is in the memory.

1 If it is not illuminated in green, press (**Fax**). Place the original face up in the ADF, or face down on the scanner glass.

2 Enter a number using One-Touch, Speed-Dial, a Group number, Search or manual dialing using the dial pad. (Example: Group number)

3 When the LCD displays the fax number of the other party, press **Set**.
You will be asked to press the next number.

4 Enter the next number.
(Example: Speed-Dial number)

5 When the LCD displays the fax number of the other party, press **Set**.

6 Enter another fax number.
(Example: Manual dialing using the dial pad.)

7 Press **Start**.

If you are using the scanner glass, go to Step 8.

8 To send a single page,
press **2** (or press **Start** again).

The MFC starts sending the fax.
—**OR**—
To send more than one page, press **1** and go to Step 9.

9 Place the next page on the scanner glass.

Press **Set**.

The MFC starts scanning and returns to Step 8. (Repeat Step 8 and 9 for each additional page).

Overseas Mode

If you are having difficulty sending a fax overseas due to possible interference on the phone line, we recommend that you turn on the Overseas Mode. After you send a fax using this feature, the feature will turn itself off.

1 If it is not illuminated in green, press ⌨ (**Fax**). Place the original face up in the ADF, or face down on the scanner glass.

2 Press **Menu**, **2**, **2**, **9**.

3 Press ⌾ or ⌾ to select On (or Off).
   Press **Set**.

```
22.Setup Send
  9.Overseas Mode
▲     On
▼     Off
Select ▲▼ & Set
```

4 Press **1** if you want to choose more settings and the LCD will return to the Setup Send menu.
   —**OR**—
   Press **2** if you have finished choosing settings, and then go to Step 5

5 Enter the fax number you're calling.

6 Press **Start**.

   If you are using the scanner glass, go to Step 7.

7 To send a single page,
   press **2** (or press **Start** again).

   The MFC starts sending the fax.
   —**OR**—
   To send more than one page, press **1** and go to Step 8.

8 Place the next page on the scanner glass.

   Press **Set**.

The MFC starts scanning and returns to Step 7. (Repeat Steps 7 and 8 for each additional page).

Delayed Fax

During the day you can store up to 50 faxes in the memory to be sent within 24 hours. These faxes will be sent at the time of day you enter in Step 3. Press **Set** to accept it, or enter another time for the faxes to be sent.

1 If it is not illuminated in green, press [✎] (**Fax**). Place the original face up in the ADF, or face down on the scanner glass.

2 Press **Menu**, **2**, **2**, **3**.

3 Enter the time you want the fax to be sent (in 24-hour format). Press **Set**. (For example, enter 19:45 for 7:45 PM.)

```
22.Setup Send
  3.Delayed Fax

  Set Time=00:00
Enter & Set Key
```

4 Press **1** if you want to choose more settings and the LCD will return to the Setup Send menu.
—**OR**—
Press **2** if you have finished choosing settings, and then go to Step 5.

5 Enter the fax number.

6 Press **Start**.

If you are using the scanner glass, go to Step 7.

7 To send a single page, press **2** (or press **Start** again).

The MFC starts scanning the fax.
—**OR**—
To send more than one page, press **1** and go to Step 8.

8 Place the next page on the scanner glass.

Press **Set**.

The MFC starts scanning and returns to Step 7 (Repeat Step 7 and 8 for each additional page).

The number of pages you can scan into the memory depends on the amount of data that is printed on each page.

Delayed Batch Transmission

Before sending the delayed faxes, your MFC will help you economize by sorting all the faxes in the memory by destination and scheduled time. All delayed faxes that are scheduled to be sent at the same time to the same fax number will be sent as one fax to save transmission time.

1 If it is not illuminated in green, press 🖾 (**Fax**).

2 Press **Menu**, **2**, **2**, **4**.

3 Press ◠ or ◡ to select On (or Off).
Press **Set**.

```
22.Setup Send
  4.Batch TX
▲     On
▼     Off
Select ▲▼ & Set
```

4 Press **Stop/Exit**.

Setting up Polled Transmission

Polled Transmission is when you set up your MFC to wait with a paper original so another fax machine can call and retrieve it.

1 If it is not illuminated in green, press 📠 (**Fax**). Place the original that is going to be retrieved face up in the ADF, or face down on the scanner glass.

2 Press **Menu**, **2**, **2**, **6**.

3 Press ◄ or ► to choose On (or Off). Press **Set**.

```
22.Setup Send
  6.Polled TX
▲     On
▼     Off
Select ▲▼ & Set
```

4 Press **1** if you want to choose more settings and the LCD will return to the Setup Send menu.
—**OR**—
Press **2** if you have finished choosing settings, and go to step 5.

5 Press **Start**. The MFC starts scanning the document.

6 If you place the original in the ADF, wait for the fax to be polled.
—**OR**—
If you are using the scanner glass, go to Step 7.

7 To send a single page, press **2** (or press **Start** again), wait for the fax to be polled.
—**OR**—
To send more than one page, press **1** and go to Step 8.

8 Place the next page on the scanner glass.
Press **Set**.
The MFC starts scanning and returns to Step 7 (Repeat Step 7 and 8 for each additional page).

The document will be stored and can be retrieved from any other fax machine until you delete the fax in memory by using the Cancelling a Job function. (See *Canceling a scheduled job* on page 6-11.)

Memory Security

Memory Security lets you prevent unauthorized access to the MFC. You will not be able to continue to schedule Delayed Faxes or Polling jobs. However, any pre-scheduled Delayed Faxes will be sent when you turn Memory Security On, so they won't be lost.

If Fax Storage is On *before* you turn Memory Security On, then Fax Forwarding and Remote Retrieval will continue to work.

While Memory Security is On the following operations are available:

■ Receiving faxes into memory (limited by memory capacity)
■ Fax Forwarding (If Fax Storage was already On)
■ Remote Retrieval

While Memory Security is On the following operations are NOT available:

■ Sending faxes
■ Printing received faxes
■ Copy
■ PC printing
■ PC scanning

To print the faxes in memory, turn Memory Security Off.

Setting up the password

If you forget the Memory Security password, please call Brother Customer Service. (See *For Customer Service* on page i.)

1 Press **Menu**, **2**, **0**, **1**.

2 Enter a 4-digit number for the password.

Press **Set**.

```
20.Miscellaneous
  1.Mem Security

  New Passwd=xxxx
Enter & Set Key
```

If you are entering the password for the first time, the LCD shows Verify.

3 Re-enter the password.

Press **Set**.

Turning Memory Security on

1 Press **Menu**, **2**, **0**, **1**.

2 Press ⬠ or ⬠ to select
Set Security.

Press **Set**.

```
20.Miscellaneous
 1.Mem Security
▲    Set Security
▼    Set Password
Select ▲▼ & Set
```

3 Enter the registered 4-digit password.

Press **Set**.

The MFC goes offline and the LCD shows Secure Mode.

📝 If there is a power failure, the data in the memory will remain for up to 4 days.

Turning Memory Security off

1 Press **Menu**.

Enter the registered 4-digit password and press **Set**.

2 Memory Security is automatically turned off and the LCD shows the Date and Time.

📝 If you enter the wrong Password, the LCD shows
Wrong Password and stays offline. The MFC will stay in Secure Mode until the registered password is entered.

7 Auto Dial numbers and dialing options

Storing numbers for easy dialing

You can set up your MFC to do three types of easy dialing:
One-Touch, Speed-Dial and Groups for Broadcasting faxes.

If you lose electrical power, the auto dial numbers that are in the memory will not be lost.

Storing One-Touch Dial numbers

Your MFC has 20 One-Touch keys where you can store 40 fax or phone numbers for automatic dialing. To access numbers 21 to 40, hold down **Shift** as you press the One-Touch key. When you press a One-Touch key the LCD shows the name, if you stored it, or the number. (See *One-Touch Dialing* on page 7-5.)
One-Touch keys are the 20 keys (numbers 01–40) located on the left side of the control panel.

(For USA only) The Brother fax back system number has been preprogrammed on One-Touch key **1**.

1 Press **Menu**, **2**, **3**, **1**.

2 Press the One-Touch key where you want to store a number.

```
23.Set Auto Dial
  1.One-Touch Dial

  One-Touch:
Select One-Touch
```

If you have not installed the optional LAN board (NC-9100h), go to Step 4.

—**OR**—

If you are using the MFC-8840DN or have installed the optional LAN board (NC-9100h), the MFC will ask you if the One-Touch key is for a fax/telephone number or an e-mail address. Go to Step 3.

3 Press ⏴⏵ or ⏷ to select Fax/Tel. Press **Set**.

```
23.Set Auto Dial
  *007
▲     Fax/Tel
▼     E-Address
Select ▲▼ & Set
```

4 Enter a number (up to 20 digits).
Press **Set**.

- If you want to enter a pause in the dialing sequence (for example, to access an outside line), press **Redial/Pause** as you are entering the digits.
  Each key press of **Redial/Pause** enters a 3.5 second pause when the number is dialed, and a dash appears on the screen.

5 Use the dial pad to enter the name (up to 15 characters).
Press **Set**.
(You can use the chart on page 4-3 to help you enter letters.)
—**OR**—
Press **Set** to store the number without a name.

6 Go to Step 2 to store another One-Touch number
—**OR**—
Press **Stop/Exit**.
When you dial an auto dial number, the LCD shows the name and number you've stored, or, if you haven't stored a name, only the number you've stored.

Storing Speed-Dial numbers

You can store Speed-Dial numbers, so that when you dial you will only have to press a few keys (**Search/Speed Dial**, **#**, the three-digit number, and **Start**). The MFC-8640D can store 200 Speed-Dial numbers and the MFC-8440/8840D/8840DN can store 300 Speed-Dial numbers.

1 Press **Menu**, **2**, **3**, **2**.

2 Use the dial pad to enter a three-digit Speed-Dial number (001-200 for MFC-8640D, 001-300 for MFC-8440/8840D/8840DN). (For example, press **005**.)
Press **Set**.
If you have not installed the optional LAN board (NC-9100h), go to Step 4.
—**OR**—
If you are using the MFC-8840DN or have installed the optional LAN board (NC-9100h), the MFC will ask you if the Speed-Dial is for a fax/telephone number or an e-mail address. Go to Step 3.

```
23.Set Auto Dial
  2.Speed-Dial

  Speed-Dial? #
Enter & Set Key
```

3 Press ⬯ or ⬯ to select
Fax/Tel. Press **Set**.

4 Enter the phone or fax number (up
to 20 digits). Press **Set**.

```
23.Set Auto Dial
  #005
▲      Fax/Tel
▼      E-Address
Select ▲▼ & Set
```

5 Use the dial pad to enter the name (up to 15 characters).
Press **Set**.
(You can use the chart on page 4-3 to help you enter letters.)
—**OR**—
Press **Set** to store the number without a name.

6 Go to Step 2 to store another Speed-Dial number.
—**OR**—
Press **Stop/Exit**.

Changing One-Touch and Speed-Dial numbers

If you try to store a One-Touch or Speed-Dial number where a
number has already been stored, the LCD will show the name that
has been stored there (or number) and will ask you to do one of the
following:

1 Press **1** to change the stored
number.

—**OR**—

Press **2** to exit without making a
change.

```
23.Set Auto Dial
  *005:MIKE
▲      1.Change
▼      2.Exit
Select ▲▼ & Set
```

2 Enter a new number.
Press **Set**.

■ To erase the whole number or whole name, press

Clear/Back repeatedly until all digits or letters are deleted.

To erase one digit or letter, use ⬮ or ⬯ to position the

cursor under it, and then press **Clear/Back**.

■ If you want to insert characters, use ⬮ or ⬯ to position the
cursor where you want to insert them, and then type.

3 Follow the directions beginning at Step 5 in Storing One-Touch
Dial numbers and Storing Speed-Dial numbers. (See *Storing
One-Touch Dial numbers* on page 7-1 and *Storing Speed-Dial
numbers* on page 7-2.)

Setting up Groups for Broadcasting

Groups, which can be stored on a One-Touch key or a Speed-Dial location, allow you to send the same fax message to many fax numbers by pressing only a One-Touch key and **Start** or **Search/Speed Dial**, **#**, the three-digit location and **Start**.

First, you'll need to store each fax number as a One-Touch or Speed-Dial number. Then, you can combine them into a Group, *Each Group uses up a One-Touch key or a Speed-Dial location.* Finally, you can have up to six small Groups, or you can assign up to 239 numbers (MFC-8640D) or up to 339 numbers (MFC-8440/8840D/8840DN) to one large Group.

(See *Storing Speed-Dial numbers* on page 7-2 and *Changing One-Touch and Speed-Dial numbers* on page 7-3.)

1 Press **Menu**, **2**, **3**, **3**.

2 Decide where you wish to store the Group

```
23.Set Auto Dial
 3.Setup Groups

 Group Dial:
Press Speed-Dial...
```

—**AND**—

Press a One-Touch key

—**OR**—

Press **Search/Speed Dial** and enter the three-digit location, and then press **Set**.

(For example, press One-Touch key 2 for Group 1.)

3 Use the dial pad to enter the Group number.

Press **Set**.

```
23.Set Auto Dial
 *002

 Group#:0
Enter No. & Set
```

(For example, press **1** for Group 1.)

4 To include One-Touch or Speed-Dial numbers in the Group, enter them as if you were dialing.

For example, for One-Touch key **05**, press One-Touch key **05**. For Speed-Dial location 009, press **Search/Speed Dial**, then press **009** on the dial pad. The LCD shows ✳005, #009.

5 Press **Set** to accept the numbers for this Group.

6 Use the dial pad and the chart on page 4-3 to enter a name for the Group.

Press **Set**.

(For example, NEW CLIENTS)

7 Press **Stop/Exit**.

You can print a list of all One-Touch and Speed-Dial numbers. (See *Printing reports* on page 9-3.) Group numbers will be marked in the column of 'Group'.

Dialing options

When you dial using an auto dial number, the LCD shows the name you've stored, or if you haven't stored a name, the fax number you've stored.

Search

You can search for names you have stored in the One-Touch and Speed-Dial memory.

(See *Storing One-Touch Dial numbers* on page 7-1 and see *Storing Speed-Dial numbers* on page 7-2.)

1 If it is not illuminated in green, press ⬛ (**Fax**). Place the original face up in the ADF, or face down on the scanner glass.

2 Press **Search/Speed Dial**.

3 Press ◀ or ▶.

To search alphabetically through the names that are stored, enter the first letter of the name you're looking for and press ◀ or ▶.

—**OR**—

Press ◀ or ▶.

To search for numbers numerically, press ◀ or ▶.

4 When the LCD shows the name you want to call, Press **Start**.

One-Touch Dialing

1 If it is not illuminated in green, press ⬛ (**Fax**). Place the original face up in the ADF, or face down on the scanner glass.

2 Press the One-Touch key of the location you want to call.

3 Press **Start**.

Speed-Dialing

1 If it is not illuminated in green, press ⬚ (**Fax**). Place the
   original face up in the ADF, or face down on the scanner glass.

2 Press **Search/Speed Dial**, **#**, and then the three-digit
   Speed-Dial number. (See *Storing Speed-Dial numbers* on page
   7-2.)

3 Press **Start**.

   If you try to use a One-Touch or Speed-Dial location with no
   number stored in it, you hear a warning sound, and LCD shows
   Not Registered. The LCD returns to normal after 2 seconds.

Manual dialing

Manual dialing means pressing all of the digits of the phone number.

Using an external telephone

The easiest way to use your external telephone is to pick up the
handset and dial the number on the external telephone as you
normally would.

1 Pick up the handset of the external telephone.

2 Dial the number on the external telephone.

3 To hang up, replace the handset.

Access codes and credit card numbers

Sometimes you may want to choose from several long distance carriers when you make a call. Rates may vary depending on the time and destination. To take advantage of low rates, you can store the access codes or long-distance carriers and credit card numbers as One-Touch and Speed-Dial numbers. You can store these long dialing sequences by dividing them and setting them up on separate keys in any combination. You can even include manual dialing using the dial pad.

The combined number will be dialed in the order that you entered it as soon as you press **Start**.
(See *Storing One-Touch Dial numbers* on page 7-1.)

For example, you can store '555' on One-Touch key 03 and '7000' on One-Touch key 02. If you press One-Touch key **03**, One-Touch key **02**, and **Start**, you will dial '555-7000'.

To temporarily change a number, you can substitute part of the number with manual dialing using the dial pad.
For example, to change the number to 555-7001 you could press One-Touch key **03** and then press **7001** using the dialing pad.

If you must wait for another dial tone or signal at any point in the dialing sequence, store a pause there in the number by pressing **Redial/Pause**. Each key press adds a 3.5-second delay.

Pause

Press **Redial/Pause** to insert a 3.5-second pause between numbers. If you are dialing overseas, you can press **Redial/Pause** as many times as needed to increase the length of the pause.

Tone or Pulse (Canada only)

If you have a Pulse dialing service, but need to send Tone signals (for example, for telephone banking), follow the instructions below. If you have Touch Tone service, you will not need this feature to send tone signals.

1 Lift the handset of an external phone.

2 Press **#** on the control panel of your MFC. Any digits dialed after this will send tone signals.

3 When you hang up, the MFC will return to the Pulse dialing service.

8 Remote Fax Options

Fax Forwarding/Paging

You cannot use Paging and Fax Forwarding at the same time. After you have selected the Paging or Fax Forwarding feature, Fax Storage is set to On automatically.

Programming a Fax Forwarding number

When Fax Forwarding is set to On, your MFC stores the received fax in the memory. Then it dials the fax number you've programmed and forwards the fax message.

1 Press **Menu**, **2**, **5**, **1**.

2 Press ⬤ or ⬤ to select

Fax Forward.

Press **Set**.

```
25.Remote Fax Opt
 1.Fax Fwd/Paging
▲    Off
▼    Fax Forward
Select ▲▼ & Set
```

The LCD will ask you to enter the fax number to which faxes will be forwarded.

3 Enter the forwarding number (up to 20 digits).

Press **Set**.

4 Press **Stop/Exit**.

Programming your pager number

When Paging is selected, your MFC dials the pager number you've programmed, and then dials your Personal Identification Number (PIN). This activates your pager so you will know that you have a fax message in the memory.

1 Press **Menu**, **2**, **5**, **1**.

2 Press ⬅ or ➡ to select Paging.
Press **Set**.

```
25.Remote Fax Opt
 1.Fax Fwd/Paging
▲     Off
▼     Fax Forward
Select ▲▼ & Set
```

3 Enter your pager phone number followed by # # (up to 20 digits).
Press **Set**.
Do not include the area code if it is the same as that of your MFC.
For example, press **1 8 0 0 5 5 5 1 2 1 2 # #**.

4 If your pager needs a PIN, enter the PIN, press **#**, press **Redial/Pause**, enter your fax number followed by **# #**.
Press **Set**.
(For example, press **1 2 3 4 5 # Redial/Pause 1 8 0 0 5 5 5 1 2 1 2 # #**)
—**OR**—
If you do not need a PIN, press **Redial/Pause**, enter your fax number followed by **# #**.
Press **Set**.
(For example, press **Redial/Pause 1 8 0 0 5 5 5 1 2 1 2 # #**)

5 Press **Stop/Exit**.

✎ You cannot change a Paging number or PIN remotely.

Setting Fax Storage

If you set Fax Storage to ON, you will be able to retrieve fax messages from another location using Fax Forwarding, Paging, or Remote Retrieval operations. The LCD will show when you have a fax stored in memory.

1 Press **Menu**, **2**, **5**, **2**.
The LCD will ask you to choose a fax setting.

```
25.Remote Fax Opt
  2.Fax Storage
▲     On
▼     Off
Select ▲▼ & Set
```

2 Press ⬬ or ⬭ to select On (or Off).
Press **Set**.

3 Press **Stop/Exit**.

If there are faxes in the memory when you turn Fax Storage OFF, the LCD will ask if you want to erase the faxes in the memory.

If you press **1**, all fax data is erased and Fax Storage is turned off.

If you press **2**, faxes are not erased and Fax Storage stays on. (See *Printing a fax from the memory* on page 5-5.)

■ After you have selected Paging or Fax Forwarding feature, Fax Storage is set to On automatically. If you bring Paging or Fax Forwarding feature back to Off, Fax Storage stays on.

■ If there is a power failure, the data in the memory will remain for up to 4 days.

Setting your Remote Access Code

The remote access code lets you access the Remote Retrieval features when you are away from your MFC. Before you use the remote access and retrieval features, you have to set up your own code. The default code is inactive code (--- ✶).

1 Press **Menu**, **2**, **5**, **3**.

2 Enter a three-digit code using numbers **0-9**, ✶ or **#**. Press **Set**. (The preset ' ✶ ' cannot be changed.)

```
25.Remote Fax Opt
  3.Remote Access

  Access Code:---*
Enter & Set key
```

Do not use the same digits that appear in your Fax Receive Code (✶ **51**) or Telephone Answer Code (**#51**). (See *Operation from extension telephones* on page 5-7.)

3 Press **Stop/Exit**.

■ You can change your code at any time by entering a new one. If you want to make your code inactive, press **Clear/Back** in Step 2 to restore the inactive setting (--- ✶).

Remote Retrieval

You can call your MFC from any telephone or fax machine using touch tone, then use the Remote Access Code and remote commands to retrieve fax messages. Be sure to cut out the Remote Retrieval Access Card on the last page and keep it with you at all times.

Using your Remote Access Code

1 Dial your fax number from a telephone or another fax machine using touch tone.

2 When your MFC answers, immediately enter your Remote Access Code (3 digits followed by ✳).

3 The MFC signals if it has received fax messages:

   1 long beep — Fax messages
   No beeps — No fax messages

4 The MFC gives two short beeps, which tells you to enter a command. The MFC will hang up if you wait longer than 30 seconds to enter a command. The MFC will beep three times, if you enter an invalid command.

5 Press **90** to reset the MFC when you've finished.

6 Hang up.

Remote commands

Follow the commands below to access features when you are away from the MFC. When you call the MFC and enter your Remote Access Code (3 digits followed by ✳), the system will give two short beeps and you must enter a remote command.

Remote commands		Operation details
95	**Change the Fax Forwarding or Paging settings**	
	1 OFF	If you hear one long beep, the change has been accepted. If you hear three short beeps, you cannot change it because the conditions have not been met (for example, registering a fax forwarding or paging number). You can register your Fax Forwarding number by entering 4. (See *Changing your Fax Forwarding number* on page 8-7.) Once you have registered the number, Fax Forwarding will be set to `On`.
	2 Fax Forwarding	
	3 Paging	
	4 Fax Forwarding number	
	6 Fax Storage ON	You can turn `Fax Storage` to `On` (or `Off` after you have retrieved or erased all your messages).
	7 Fax Storage OFF	
96	**Retrieve a fax**	
	2 Retrieve all faxes	Enter the number of a remote fax machine to receive stored fax messages. (See *Retrieving fax messages* on page 8-7.)
	3 Erase faxes from the memory	If you hear one long beep, you can erase fax messages from the memory.
97	**Check the receiving status**	
	1 Fax	You can check whether your MFC has received any faxes. If it has, you will hear one long beep. If it hasn't, you will hear three short beeps.
98	**Change the Receive Mode**	
	1 External TAD	If you hear one long beep, you can change the Receive Mode.
	2 Fax/Tel	
	3 Fax Only	
90	**Exit**	After a long beep, you can exit Remote Retrieval.

Retrieving fax messages

1 Dial your fax number.

2 When your MFC answers, immediately enter your Remote Access Code (3 digits followed by ✳). If you hear one long beep, you have messages.

3 As soon as you hear two short beeps, use the dial pad to press **962**.

4 Wait for the long beep, and then use the dial pad to enter the number of the remote fax machine where you want your fax messages sent to followed by **##** (up to 20 digits).

You cannot use ✳ and **#** as dial numbers. However, press **#** if you want to store a pause.

5 Hang up after you hear your MFC beep. Your MFC will call the other machine, which will then print your fax messages.

Changing your Fax Forwarding number

You can change the default setting of your fax forwarding number from another telephone or fax machine using Touch Tone.

1 Dial your fax number.

2 When your MFC answers, immediately enter your Remote Access Code (3 digits followed by ✳). If you hear one long beep, you have messages.

3 When you hear two short beeps, use the dial pad to press **954**.

4 Wait for the long beep, and then use the dial pad to enter the new number of the remote fax machine where you want your fax messages forwarded followed by **##** (up to 20 digits).

You cannot use ✳ and **#** as dial numbers. However, press **#** if you want to store a pause.

5 Hang up after you hear your MFC beep.

9 **Printing reports**

MFC settings and activity

You need to set up the Transmission Verification Report and Activity Report Interval in the menu table.

Press **Menu**, **2**, **4**, **1**.

—**OR**—

Press **Menu**, **2**, **4**, **2**.

```
24.Setup Reports

 1.Transmission
 2.Act.Interval
Select ▲▼ & Set
```

Customizing the Transmission Verification Report

You can use the Transmission Report as proof that you sent a fax. This report lists the time and date of transmission and whether the transmission was successful (OK). If you select `On` or `On+Image`, the report will print for every fax you send.

If you send a lot of faxes to the same place, you may need more than the job numbers to know which faxes you must send again. Selecting `On+Image` or `Off+Image` will print a section of the fax's first page on the report to help you remember.

When the feature is `Off`, the Report will only print it there is a transmission error. (NG).

1 Press **Menu**, **2**, **4**, **1**.

2 Press ⬅ or ➡ to select `Off`, `Off+Image`, `ON` or `On+Image`. Press **Set**.

```
24.Setup Reports
 1.Transmission
▲    Off
▼    Off+Image
Select ▲▼ & Set
```

3 Press **Stop/Exit**.

Setting the Fax Activity Report Interval

You can set the MFC to print activity reports at specific intervals (every 50 faxes, 6, 12 or 24 hours, 2 or 7 days). If you set the interval to Off, you can print the report by following the Steps on the next page.
The default setting is Every 50 Faxes.

1 Press **Menu**, **2**, **4**, **2**.

2 Press ⬆ or ⬇ to choose an interval. Press **Set**.
(If you choose 7 days, the LCD will ask you to choose a day on which to begin the 7-day countdown.)

```
24.Setup Reports
  2.Act.Interval
▲     Every 50 Faxes
▼     Every 6 hours
Select ▲▼ & Set
```

3 Enter the time to begin printing in 24-hour format. Press **Set**.
(For example: enter 19:45 for 7:45 PM.)

4 Press **Stop/Exit**.

📝 If you select 6, 12, 24 hours, 2 or 7 days, the MFC will print the report at the selected time and then erase all jobs from its memory. If the MFC's memory becomes full with 200 jobs before the time you selected has passed, the MFC will print the Activity Report early and then erase all jobs from memory. If you want an extra report before it is due to print, you can print it without erasing the jobs from memory.

📝 If you select Every 50 Faxes, the MFC will print the Activity Report when the MFC has stored 50 jobs.

Printing reports

Five reports are available:

1.Help List	Prints the Help List so you can see at-a-glance how to quickly program your MFC.
2.Auto Dial	Lists names and numbers stored in the One-Touch and Speed-Dial memory, in numerical order.
3.Fax Activity	Lists information about the last incoming and outgoing faxes. (TX means Transmit.) (RX means Receive.)
4.Transmission	Prints a Transmission Verification Report for your last transmission.
5.User Settings	Lists your settings.

To print a report

1 Press **Menu**, **5**.

2 Press ◁ or ▷ to select the report you want.
Press **Set**.
—**OR**—
Enter the number of the report you want to print.
For example, press **1** to print the Help List.

3 Press **Start**.

10 Making copies

Using the MFC as a copier

You can use your MFC as a copier, making up to 99 copies at a time.

Enter Copy mode

Before making copies, make sure that ⬛ (**Copy**) is illuminated
in green. If it is not, press ⬛ (**Copy**) to enter **Copy** mode. The
default setting is Fax. You can change the number of seconds or
minutes that the MFC stays in Copy mode after a copy operation.
(See *Setting the Mode Timer* on page 4-5.)
The printable area of your MFC begins at approximately 0.14 in.
(3.64 mm) from both sides and 0.12 in. (3 mm) from the top or bottom
of the paper.

Ex: Letter (Original) → Letter (Paper)

0.14" (3.64mm) ─

─ **Unprintable area**

0.12" (3mm)
Temporary copy settings

You can improve your copies by using the Temporary Copy Keys: **Enlarge/Reduce**, **Contrast**, **Quality**, **Tray Select**, **Sort** and **N in 1** (For MFC-8440) or **Duplex/N in 1** (For MFC-8640D, MFC-8840D and MFC-8840DN). These settings are *temporary*, and the MFC returns to Fax mode 1 minute after it finishes copying. If you want to use these temporary settings again, place the next original in the ADF or on the scanner glass within that time. However, if you have set the Mode Timer for Copy and Scan modes to 0 to 30 seconds, the MFC returns to the default settings after the number of seconds that has been set for Mode Timer. (See *Setting the Mode Timer* on page 4-5 and see *Using the copy keys (Temporary settings)* on page 10-6.)

Temporary Copy Keys
While the MFC is copying, incoming faxes will be received into the memory instead of being printed.

Making a single copy from the ADF

1 Press (**Copy**) to illuminate it in green. Place the original face up in the ADF.

2 Press **Start**.

Do **NOT** pull on the original while copying is in progress.

To stop copying and eject the original, press **Stop/Exit**.

Making multiple copies from the ADF

1 Press (**Copy**) to illuminate it in green. Insert the original face up in the ADF.

2 Use the dial pad to enter the number of copies you want (up to 99).

3 Press **Start**.

To sort the copies, press the **Sort** key.

Single or multiple copies using the scanner glass

You can make multiple copies using the scanner glass. Multiple copies will be stacked (all copies of page 1, then all copies of page 2, and so on). Use the Temporary Copy keys to choose more settings. (See *Using the copy keys (Temporary settings)* on page 10-6.)

1 Press $\boxed{\text{📠}}$ (**Copy**) to illuminate it in green. Lift the Document Cover.
Document Guidelines

Place the originals Face Down on the Scanner Glass

2 Using the document guidelines on the left, center the original face down on the scanner glass and close the document cover.

3 Using the dial pad, enter the number of copies you want (up to 99).
For example, press **3 8** for 38 copies.

4 Press **Start**.

The MFC will start scanning the original.

📝 If you want to sort multiple copies, use the ADF.

(See *Making a single copy from the ADF* on page 10-3.)

Out of Memory message

If the Out Of Memory message appears, press **Stop/Exit** to cancel or **Start** to copy scanned pages. You will need to clear some jobs from the memory before you can continue.

```
Out of Memory
Copy:Press Start
Quit:Press Stop
```

✎ To gain extra memory, you can turn off Fax Storage. (See *Setting Fax Storage* on page 8-3.)
—**OR**—
Print the faxes that are in the memory. (See *Printing a fax from the memory* on page 5-5.)

When you get an Out Of Memory message, you may be able to make copies if you first print incoming faxes in the memory to restore the memory to 100%.

✎ Then if this error message appears more than once you may wish to consider increasing the memory size. For more information on how to increase the memory size, See *Memory board* on page 13-1.

Using the copy keys (Temporary settings)

When you want to change the settings only for the next copy, use the Temporary Copy Keys.

Temporary Copy keys ⎯
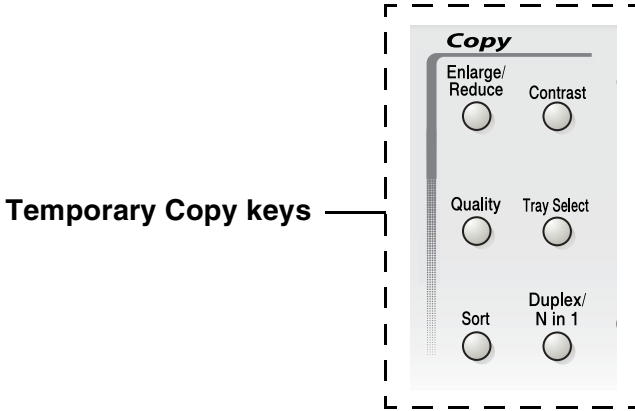

You can use different combinations. The large LCD shows your current Copy mode settings.
Example of Copy mode LCD

Enlarge/Reduce

You can select the following enlargement or reduction ratios.

`Auto` sets the MFC to calculate the reduction ratio that fits the size of your paper.

`Custom` allows you to enter a ratio from 25% to 400%.

Press **Enlarge/Reduce**	100%
Enlarge/Reduce	104% (EXE → LTR)
	141% (A5 → A4)
	200%
	Auto
	Custom (25 - 400%)
	50%
	70% (A4 → A5)
	78% (LGL → LTR)
	83% (LGL → A4)
	85% (LTR → EXE)
	91% (Full Page)
	94% (A4 → LTR)
	97% (LTR → A4)

✎ `Auto` appears only when you place the original in the ADF.

1 Press (**Copy**) to illuminate it in green. Place the original face up in the ADF, or face down on the scanner glass.

2 Use the dial pad to enter the number of copies you want (up to 99).

3 Press **Enlarge/Reduce**.

4 Press **Enlarge/Reduce** or .

```
Enlg/Red:100%
Quality :Auto
Contrast:-□□■□□+
Tray    :#1(LTR)
                  01
```

5 Press ⏶ or ⏷ to select the enlargement or reduction ratio you want.
Press **Set**.
—**OR**—
You can select Custom and press **Set**.
Use the dial pad to enter an enlargement or reduction ratio from 25% to 400%.
Press **Set**.
(For example, press **5 3** to enter 53%.)

6 Press **Start**.
—**OR**—
Press other temporary copy keys for more settings.

- Special Copy Options (2in1, 4in1 or Poster) are not available with **Enlarge/Reduce**.

- Auto is not available with the scanner glass.

Quality (type of original)

You can select the Quality for your type of original. The default setting is Auto, which is used for originals that contain both text and photographs. Text is used for originals containing only text. Photo is used for copying photographs.

1 Press 🖘 (**Copy**) to illuminate it in green. Place the original face up in the ADF, or face down on the scanner glass.

2 Use the dial pad to enter the number of copies you want (up to 99).

3 Press **Quality**.

4 Press ⏴ or ⏵ to choose the type of original (Auto, Text or Photo).
Press **Set**.

5 Press **Start**.
—**OR**—
Press other Temporary Copy keys for more settings.

Sorting copies using the ADF

If you want to sort multiple copies, use the ADF. Pages will be printed in the order 123, 123, 123, and so on.

1 Press (**Copy**) to illuminate it in green. Place the original face up in the ADF.

2 Use the dial pad to enter the number of copies you want (up to 99).

3 Press **Sort**.

4 Press **Start**.
—**OR**—
Press other Temporary Copy keys for more settings.

Contrast

You can adjust copy contrast to make copies darker or lighter.

1 Press (**Copy**) to illuminate it in green. Place the original face up in the ADF, or face down on the scanner glass.

2 Use the dial pad to enter the number of copies you want (up to 99).

3 Press **Contrast**.

4 Press ![left arrow] to make a copy lighter
—**OR**—
Press ![right arrow] to make a copy darker.
Press **Set**.

5 Press **Start**.
—**OR**—
Press other Temporary Copy keys for more settings.

Press **Contrast**	– ☐☐■☐☐ +
![Contrast dial illustration]	– ☐☐☐■☐ +
	– ☐☐☐☐■ +
	– ■☐☐☐☐ +
	– ☐■☐☐☐ +
	– ☐☐■☐☐ +
Tray Select

You can change the tray use only for the next copy.

1 Press (**Copy**) to illuminate it in green. Place the original face up in the ADF, or face down on the scanner glass.

2 Use the dial pad to enter the number of copies you want (up to 99).

3 Press **Tray Select**.

4 Press ◄ or ► to select the tray usage.
Press **Set**.

5 Press **Start**.
—**OR**—
Press other Temporary Copy keys for more settings.

(For MFC-8440 with the optional paper tray #2)

Press **Tray Select**	Auto
Tray Select	#1 (XXX)*
	#2 (XXX)*

(For MFC-8640D, MFC-8840D and MFC-8840DN with the optional paper tray #2)
Press **Tray Select**	Auto
Tray Select	#1 (XXX)*
	#2 (XXX)*
	MP Tray

* XXX is the paper size you set in **Menu**, **1**, **3**.

✐ For MFC-8440 the LCD displays the tray use selections only if the optional paper tray is installed.

Duplex/N in 1

'Duplex' prints on both sides of the paper.

Temporary key	Level 1	Level 2	Option	original → Finished Layout

Duplex/N in 1 copy

N in 1 copy

You can save paper by copying either two or four pages onto one page. Please make sure paper size is set to A4, Letter or Legal.

1 Press (**Copy**) to illuminate it in green. Place the original face up in the ADF, or face down on the scanner glass.

2 Use the dial pad to enter the number of copies you want (up to 99).

3 Press **Duplex/N in 1**.

Press **Set** to select N in 1.

4 Press ◁ or ▷ to select 2 in 1(P), 2 in 1(L), 4 in 1(P) or 4 in 1(L).

Press **Set**.

5 If you are ready to copy, go to Step 7.

—**OR**—

Press ◁ or ▷ to select Quality, Contrast or Tray.

```
Enlg/Red:100%
Quality :Auto
Contrast:-□□■□□+
Tray    :#1(LTR)
Press▲▼ or Start   01
```

6 Press ◀ or ▶ to select a new setting.

Press **Set**.

7 Press **Start**.

If you are using the ADF, the MFC scans the originals and prints the copies.

—**OR**—

If you are using the scanner glass, the MFC scans the page. Place the next original on the scanner glass.

```
Flatbed Copy:
 Next Page?
▲  1.Yes
▼  2.No
Select ▲▼ & Set
```

8 Select **1** and press **Set**, or press **1**, to copy next page.

9 Repeat Step 7 and 8 for each page of the layout.

10 After all the pages of the original have been scanned, select **2** and press **Set**, or press **2**, to print the copies.

- ■ (P) means Portrait and (L) means Landscape.
- ■ You can also combine the N in 1 and Duplex operations. (See *Duplex (2 in 1) and Duplex (4 in 1) (For MFC-8640D, MFC-8840D and MFC-8840DN)* on page 10-16.)
- ■ For 2 in 1(P), 2 in 1(L), 4 in 1 (P) or 4 in 1 (L), you can not use the Enlarge/Reduce setting.

Poster

You can make a poster size copy of a photograph. You must use the scanner glass.
1 Place the original face down on the scanner glass.

2 Press **Duplex/N in 1** and ⬥ or ⬥ to select Poster. Press **Set**.

3 Press **Start**.
The MFC starts scanning the original and prints the pages for the poster.

For Poster copies, you cannot make more than one copy or use the Enlarge/Reduce setting.

Duplex (1 in 1)
(For MFC-8640D, MFC-8840D and MFC-8840DN)
Make a double-sided copy from a single-sided original
1 Press (**Copy**) to illuminate it in green. Place the original face up in the ADF, or face down the scanner glass.

2 Use the dial pad to enter the number of copies you want (up to 99).

3 Press **Duplex/N in 1** and ⌣ or ⌣ to select `Duplex(1 in 1)`.
Press **Set**.

4 Press ⌣ or ⌣ to select `Portrait2` or `Landscape1`.
Press **Set**.

—**OR**—

Press ⌣ or ⌣ to select `Portrait1` or `Landscape2`, and then go to Step 6.

5 Press ⌣ or ⌣ to select `Single Sided` for the original (If you are using the scanner glass or changed the number of copies at Step 2, this option will not appear).
Press **Set**.

6 Press **Start** to scan the original.

If you placed the original in the ADF, the MFC starts printing.

—**OR**—

If you placed the original on the scanner glass, go to Step 7.

7 Place the next original on the scanner glass.
Select **1** and press **Set** or press **1** to copy next page.
After all the pages of the original have been scanned, select **2** and press **Set**, or press **2** to print.

Make a double-sided copy from a double-sided original
1 Press 🖨 (**Copy**) to illuminate it in green. Place the original face up in the ADF.

2 Press **Duplex/N in 1** and ⌄ or ⌄ to select `Duplex(1 in 1)`.
Press **Set**.

3 Press ⌄ or ⌄ to select `Portrait2` or `Landscape1`.
Press **Set**.

4 Press ⌄ or ⌄ to select `Double Sided` for the original.
Press **Set**.

5 Press **Start**.

6 Make sure that you have put the original in the ADF as shown on the LCD and press **Start**.

7 After all the pages of the original have been scanned on one side, turn the other side of the original face up in the ADF.
Press **Start**.

Duplex (2 in 1) and Duplex (4 in 1)
(For MFC-8640D, MFC-8840D and MFC-8840DN)

1 Press (**Copy**) to illuminate it in green. Place the original face up in the ADF, or face down on the scanner glass.

2 Use the dial pad to enter the number of copies you want (up to 99).

3 Press **Duplex/N in 1** and ⬅ or ➡ to select Duplex(2 in 1) or Duplex(4 in 1).
   Press **Set**.

4 Press ⬅ or ➡ to select Portrait1, Portrait2, Landscape1 or Landscape2.
   Press **Set**.

5 Press **Start** to scan the original.
   If you placed the original in the ADF, the MFC starts printing.
   —**OR**—
   If you placed the original on the scanner glass, go to Step 6.

6 Place the next original on the scanner glass.
   Select **1** and press **Set** or press **1** to copy next page.

7 After all the pages of the original have been scanned, select **2** and press **Set** or press **2**.

Changing the default copy settings

You can adjust the copy settings that are shown in the chart. These settings will stay until you change them again.

Submenu	Menu Selections	Options	Factory Settings
1.Quality	—	Text	Auto

11 **Important information**

Standard telephone and FCC Notices
These notices are in effect on models sold and
used only in the United States.

When programming emergency numbers or making test calls to emergency numbers:

■ Remain on the line and briefly explain to the dispatcher the reason for the call before hanging up.

■ Perform these activities in the off-peak hours, such as early morning or late evening.

This equipment complies with Part 68 of the FCC rules and the requirements adopted by the ACTA. On the backside of this equipment is a label that contains, among other information, a product identifier in the format US: AAAEQ##TXXXX. If requested, this number must be provided to the telephone company.

You may safely connect this equipment to the telephone line by means of a standard modular jack, USOC RJ11C.

A plug and jack used to connect this equipment to the premises wiring and telephone network must comply with the applicable FCC Part 68 rules and requirements adopted by the ACTA. A compliant telephone cord and modular plug is provided with this product. It is designed to be connected to a compatible modular jack that is also compliant. See installation instructions for details.

The REN is used to determine the number of devices that may be connected to a telephone line. Excessive RENs on a telephone line may result in the devices not ringing in response to an incoming call. In most but not all areas, the sum of RENs should not exceed five (5.0). To be certain of the number of devices that may be connected to a line, as determined by the total RENs, contact the local telephone company. For products approved after July 23, 2001, the REN for this product is part of the product identifier that has the format US:AAAEQ##TXXXX.The digits represented by ## are the REN without a decimal point (e.g., 06 is a REN of 0.6). For earlier products, the REN is separately shown on the label.

If this equipment causes harm to the telephone network, the telephone company will notify you in advance that temporary discontinuance of service may be required. But if advance notice isn't practical, the telephone company will notify the customer as soon as possible. Also, you will be advised of your right to file a complaint with the FCC if you believe it is necessary.

The telephone company may make changes in its facilities, equipment, operations or procedures that could affect the operation of the equipment. If this happens the telephone company will provide advance notice in order for you to make necessary modifications to maintain uninterrupted service.

If trouble is experienced with this equipment, for repair or warranty information, please contact Brother Customer Service. (See *Brother numbers* on page i.) If the equipment is causing harm to the telephone network, the telephone company may request that you disconnect the equipment until the problem is resolved.

Connection to party line service is subject to state tariffs. Contact the state public utility commission, public service commission or corporation commission for information.

If your home has specially wired alarm equipment connected to the telephone line, ensure the installation of this equipment does not disable your alarm equipment. If you have questions about what will disable alarm equipment, call your telephone company or a qualified installer.

If you are not able to solve a problem with your MFC, call Brother Customer Service. (See *Brother numbers* on page i.)

⚠ WARNING

For protection against the risk of electrical shock, always disconnect all cables from the wall outlet before servicing, modifying or installing the equipment.

This equipment may not be used on coin service lines provided by the telephone company or connected to party lines.

Brother cannot accept any financial or other responsibilities that may be the result of your use of this information, including direct, special or consequential damages. There are no warranties extended or granted by this document.

⚠️ WARNING

This MFC has been certified to comply with FCC standards, which are applied to the USA only. A grounded plug should be plugged into a grounded AC outlet after checking the rating of the local power supply for the MFC to operate properly and safely.

Federal Communications Commission (FCC) Declaration of Conformity (USA only)

Responsible Party: Brother International Corporation

100 Somerset Corporate Boulevard

Bridgewater, NJ 08807-0911 USA

TEL: (908) 704-1700

declares, that the products

Product Name: MFC-8440, MFC-8640D, MFC-8840D and
MFC-8840DN

comply with Part 15 of the FCC Rules. Operation is subject to the following two conditions: (1) This device may not cause harmful interference, and (2) this device must accept any interference received, including interference that may cause undesired operation.

This equipment has been tested and found to comply with the limits for a Class B digital device, pursuant to Part 15 of the FCC Rules. These limits are designed to provide reasonable protection against harmful interference in a residential installation. This equipment generates, uses, and can radiate radio frequency energy and, if not installed and used in accordance with the instructions, may cause harmful interference to radio communications. However, there is no guarantee that interference will not occur in a particular installation. If this equipment does cause harmful interference to radio or television reception, which can be determined by turning the equipment off and on, the user is encouraged to try to correct the interference by one or more of the following measures:

■ Reorient or relocate the receiving antenna.

■ Increase the separation between the equipment and receiver.

■ Connect the equipment into an outlet on a circuit different from that to which the receiver is connected.

■ Call the dealer or an experienced radio/TV technician for help.

Important

Changes or modifications not expressly approved by Brother Industries, Ltd. could void the user's authority to operate the equipment.

Important – about the interface cable

A shielded interface cable should be used to ensure compliance with the limits for a Class B digital device.

Industry Canada Compliance Statement (Canada only)

This Class B digital apparatus complies with Canadian ICES-003.

Cet appareil numérique de la classe B est conforme à la norme NMB-003 du Canada.

International ENERGY STAR® Compliance Statement

The purpose of the International ENERGY STAR® Program is to promote the development and popularization of energy-efficient office equipment.

As an ENERGY STAR® Partner, Brother Industries, Ltd. has determined that this product meets the ENERGY STAR® guidelines for energy efficiency.

Laser safety

This equipment is certified as a Class I laser product under the U.S. Department of Health and Human Services (DHHS) Radiation Performance Standard according to the Radiation Control for Health and Safety Act of 1968. This means that the equipment does not produce hazardous laser radiation.

Since radiation emitted inside the equipment is completely confined within protective housings and external covers, the laser beam cannot escape from the MFC during any phase of user operation.

FDA regulations

U.S. Food and Drug Administration (FDA) has implemented regulations for laser products manufactured on and after August 2, 1976. Compliance is mandatory for products marketed in the United States. The following label on the back of the MFC indicates compliance with the FDA regulations and must be attached to laser products marketed in the United States.

Manufactured:

BROTHER CORP. (ASIA) LTD.

BROTHER BUJI NAN LING FACTORY

Gold Garden Industry, Nan Ling Village, Buji, Rong Gang, Shenzhen, China.

This product complies with FDA radiation performance standards, 21 CFR Subchapter J.

⚠ **WARNING**

Use of controls, adjustments or performance of procedures other than those specified in this manual may result in hazardous invisible radiation exposure.

⚠ **WARNING**

Changes or modifications not expressly approved by Brother Industries, Ltd. may void the user's authority to operate the equipment.

Internal laser radiation	
Max. Radiation Power	5 mW
Wave Length	760 - 810 nm
Laser Class	Class IIIb (Accordance with 21 CFR Part 1040.10)

Important safety instructions

1 Read all of these instructions.

2 Save them for later reference.

3 Follow all warnings and instructions marked on the product.

4 Switch off before cleaning. Do not use liquid or aerosol cleaners. Use a damp cloth for cleaning.

5 Do not use this product near water.

6 Do not place this product on an unstable cart, stand, or table. The product may fall, causing serious damage to the product.

7 Slots and openings in the cabinet and the back or bottom are provided for ventilation; to ensure reliable operation of the product and to protect it from overheating, these openings must not be blocked or covered. The openings should never be blocked by placing the product on a bed, sofa, rug, or other similar surface. This product should never be placed near or over a radiator or heater. This product should never be placed in a built-in installation unless proper ventilation is provided.

8 This product should be operated from the type of power source indicated on the label. If you are not sure of the type of power available, call your dealer or local power company.

Use only the power cord supplied with this MFC.

9 This product is equipped with a 3-wire grounded plug, a plug having a third (grounded) pin. This plug will only fit into a grounded power outlet. This is a safety feature. If you are unable to insert the plug into the outlet, call your electrician to replace your obsolete outlet. Do not defeat the purpose of the grounded plug.

10 Do not allow anything to rest on the power cord. Do not place this product where people can walk on the cord.

11 If an extension cord is used with this product, make sure that the total ampere ratings on the products plugged into the extension cord do not exceed the extension cord ampere rating. Also, make sure that the total of all products plugged into the wall outlet does not exceed 15 amperes (USA only).

12 Do not place anything in front of the MFC that will block received faxes. Do not place anything in the path of received faxes.

13 Wait until pages have exited the MFC before picking them up.

14 Never push objects of any kind into this product through cabinet slots, since they may touch dangerous voltage points or short out parts resulting in the risk of fire or electric shock. Never spill liquid of any kind on the product. Do not attempt to service this product yourself because opening or removing covers may expose you to dangerous voltage points and other risks and may void your warranty. Refer all servicing to a Brother Authorized Service Center. For the location of your nearest Brother Authorized Service Center, please call **In USA:** 1-800-284-4357 or **In Canada:** 1-877-BROTHER. (See *Brother numbers* on page i.)

15 Unplug this product from the wall outlet and refer servicing to Authorized Service Personnel under the following conditions:

■ When the power cord is damaged or frayed.

■ If liquid has been spilled into the product.

■ If the product has been exposed to rain or water.

■ If the product does not operate normally when the operating instructions are followed. Adjust only those controls that are covered by the operating instructions. Improper adjustment of other controls may result in damage and will often require extensive work by a qualified technician to restore the product to normal operation.

■ If the product has been dropped or the cabinet has been damaged.

■ If the product exhibits a distinct change in performance, indicating a need for service.

16 To protect your product against power surges, we recommend the use of a power protection device (Surge Protector).

17 To reduce the risk of fire, electric shock and injury to persons, note the following:

■ Do not use this product near appliances that use water, a swimming pool or in a wet basement.

■ Do not use the MFC's telephone during an electrical storm (there is the remote possibility of an electrical shock) or to report a gas leak in the vicinity of the leak.

■ Use only the power cord indicated in this manual.

12 **Troubleshooting and routine maintenance**

Troubleshooting

IMPORTANT
For technical help, you must call the country where you bought the MFC. Calls must be made *from within* that country.

Error messages

As with any sophisticated office product, errors may occur. If this happens, your MFC identifies the problem and displays an error message. The most common error messages are shown below.

You can correct most problems by yourself. If you need additional help, call the Brother fax back system (USA only).

In USA only: 1-800-521-2846

ERROR MESSAGES		
ERROR MESSAGE	**CAUSE**	**ACTION**
Change Drum Soon	The drum unit is near the end of its life.	Use the drum unit until you have a print quality problem; then replace the drum unit with a new one.
	The drum counter was not reset.	1. Open the front cover, and then press **Clear/Back**. 2. Press **1** to reset.
Check Original	The originals were not inserted or fed properly, or original scanned from ADF was longer than about 36 inches (90cm).	See *Original jams* on page 12-4.
Check Paper Check Paper #1 Check Paper #2	The MFC is out of paper or paper is not properly loaded in the paper tray. —**OR**— The paper is jammed in the MFC.	Refill the paper in the paper tray or MP tray. —**OR**— Remove the paper and load it again. See *Paper jams* on page 12-6 or *Paper is jammed in the duplex tray (For MFC-8640D, MFC-8840D and MFC-8840DN)* on page 12-11.
Check Paper MP	Paper in the MP tray runs out.	Reload paper. (See *To load paper or other media in the multi-purpose tray (MP tray) (For MFC-8640D, MFC-8840D and MFC-8840DN)* on page 2-8.)

ERROR MESSAGES

ERROR MESSAGE	CAUSE	ACTION
Check Paper Size	When you see this error, the paper in the paper tray does not match the paper size you set in **Menu**, **1**, **3**.	Load the appropriate size paper or change the default setting. (See *Setting the Mode Timer* on page 4-5.)
Check Scan Lock	The scanner lock is locked.	Release the scanner lock lever, and then press **Stop/Exit**.
Comm. Error	Poor phone line quality caused communication error.	Try the call again. If problem continues, call Telephone Company to check your phone line.
Connection Fail	You tried to poll a fax machine that is not in Polled Waiting mode.	Verify the other party's polling setup.
Cooling Down Wait For A While	The temperature of the drum unit or toner cartridge is too hot. The MFC will pause its current print job and go in to cooling down mode. During the cooling down mode, you will hear the cooling fan running while the display on the MFC shows Cooling Down, and Wait For A While.	You must wait 20 minutes for it to cool.
Cover Open PLS Close Cover	The front cover was not completely closed.	Close the front cover for the drum unit.
Disconnected	The other party or other party's fax machine terminated the call.	Try to transmit or receive again.
DX Lever Error	The paper adjustment lever for duplex printing is not correctly set for the paper size.	Set the duplex lever to the correct position. (See *To use Automatic Duplexing for fax, copy and print operations (For MFC-8640D, MFC-8840D and MFC-8840DN)* on page 2-10.)
Face Up Open	The face-up output tray is open.	Please close the face-up output tray.
Fuser Open	The fuser cover is open.	Please close the jam clear cover. (See *Paper jams* on page 12-6.)
Machine Error XX	MFC has a mechanical problem.	Call Brother Customer Service and tell them the Machine Error number. **In USA:** 1-800-284-4329 **In Canada:** 1-877-BROTHER

ERROR MESSAGES			
ERROR MESSAGE	**CAUSE**		**ACTION**
Out Of Memory	You can't store data in the memory.		(Fax sending in process) Press **Stop** and wait until the other operations in progress finish and then try again. **—OR—** Clear the data in the memory. (See *Out of Memory message* on page 10-5.) (Copy operation in process) Press **Stop** and wait until the other operations in process finish and then try again. **—OR—** Clear the data in the memory. (See *Out of Memory message* on page 10-5.) **—OR—** Add an optional memory. (See *Memory board* on page 13-1.) (Printing operation in process) Reduce print resolution. (See *Print Quality* in Software User's Guide on the CD-ROM.) **—OR—** Clear the data in the memory. (See *Out of Memory message* on page 10-5.) **—OR—** Add an optional memory. (See *Memory board* on page 13-1.)
No Response/Busy	The number you dialed does not answer or is busy.		Verify the number and try again.
Not Registered	You tried to access a One-Touch or Speed-Dial number that is not programmed.		Set up the One-Touch or Speed-Dial number. (See *Storing One-Touch Dial numbers* on page 7-1 and *Storing Speed-Dial numbers* on page 7-2.)
Pls Open Cover	A page, piece of paper or paper clip, etc. may be jammed inside the MFC.		Open the front cover. If you see any jammed paper or other item, gently pull it out, then close the front cover. If the error message remains, open and close the front cover again. If the MFC cannot reset itself and return to the date and time prompt, it will display Machine Error XX. Please call Brother Customer Service and tell them the Machine Error number: **In USA: 1-800-284-4329** **In Canada: 1-877-BROTHER**
No DX Tray	You tried to make duplex printing with duplex cover open.		Install the duplex tray correctly. (See *Paper is jammed in the duplex tray (For MFC-8640D, MFC-8840D and MFC-8840DN)* on page 12-11.)

ERROR MESSAGES		
ERROR MESSAGE	**CAUSE**	**ACTION**
`Paper Jam`	The paper is jammed in the MFC.	See *Paper jams* on page 12-6 or *Paper is jammed in the duplex tray (For MFC-8640D, MFC-8840D and MFC-8840DN)* on page 12-11.
`Toner Empty`	Toner cartridge is not installed. —**OR**— Toner is used up and printing is not possible.	Reinstall the toner cartridge. —**OR**— Replace the toner cartridge with a new one. (See *Replacing the toner cartridge* on page 12-28.)
`Toner Low`	If the LCD shows `Toner Low`, you can still print, however the MFC is telling you that the toner will soon run out.	Order a new toner cartridge now.

Original jams

Based upon where the original is jammed, follow the appropriate set of instructions to remove it.

Original is jammed in the top of the ADF unit.

1 Take out any paper from the ADF that is not jammed.

2 Lift the ADF cover.

3 Pull the jammed original out to the left.

4 Close the ADF cover.

5 Press **Stop/Exit**.
Original is jammed inside the ADF unit.

1 Take out any paper from the ADF that is not jammed.

2 Lift the document cover.

3 Pull the jammed original out to the right.

4 Close the document cover.

5 Press **Stop/Exit**.
—**OR**—

1 Take the ADF support out of the ADF unit.

2 Pull the jammed original out to the right.

3 Press **Stop/Exit**.

Paper jams

To clear paper jams, please follow the steps in this section.

⚠️ WARNING

After you have just used the MFC, some parts inside the MFC are extremely hot. When you open the front cover or back output tray of the MFC, never touch the shaded parts shown in the following diagram.

Front view   Back view
Clear the jammed paper as follows.

If the jammed paper is removed completely by using the information in the following steps, you can install the paper tray first, and then close the front cover and the MFC will resume printing automatically.

■ If a paper jam occurs when using the optional lower tray unit, check for correct installation of the upper paper tray.

■ Always remove all paper from the paper tray and straighten the stack when you add new paper. This helps prevent multiple sheets of paper from feeding through the MFC at one time and reduces paper jams.

1 Pull the paper tray completely out of the MFC.

2 Pull the jammed paper up and out of the MFC.
3 Press the cover release button and then open the front cover.

4 Pull out the drum unit assembly. Pull the jammed paper up and out of the MFC. If you cannot remove the drum unit assembly easily at this time, do not use extra force. Instead, pull the edge of the jammed paper from the paper tray.

If the jammed paper can not be pulled out easily, turn the jam dial towards you so that you gently pull the paper out.

Jam Dial
⚠ WARNING

To prevent damage to the MFC caused by static electricity, do not touch the electrodes shown in the following diagram.
5 Open the back output tray. Pull the jammed paper out of the fuser unit. If the paper jam can be cleared, go to Step 7.
If you have to pull the paper toward the back of the MFC, the fuser may get dirty with toner powder and it may scatter on the next printouts. Print a few copies of the test page until the scattering of toner stops.

⚠ WARNING

After you have just used the MFC, some internal parts of the MFC are extremely **HOT!** Wait for the MFC to cool down before you touch the internal parts of the MFC.
Back view

6 Open the jam clear cover (fuser cover). Pull the jammed paper out of the fuser unit.

Jam Clear Cover
(Fuser Cover)
7 Close the jam clear cover. Close the back output tray.

8 Push the lock lever down and take the toner cartridge out of the drum unit assembly. Take out the jammed paper if there is any inside the drum unit.
9 Put the drum unit assembly back in the MFC.

10 Put the paper tray in the MFC.

11 Close the front cover.

Paper is jammed in the duplex tray
(For MFC-8640D, MFC-8840D and MFC-8840DN)

1 Pull the duplex tray and paper tray out of the MFC.
2 Pull the jammed paper out of the MFC.
3 Put the duplex tray and paper tray back into the MFC.
■ The `Jam Duplex` message appears if you remove a sheet of paper from the Face Down Output Tray after only one side has printed.

■ If the Paper Adjustment Lever for Duplex Printing is not set correctly for the paper size, paper jams may occur and the printing will be out of position on the page. (See *To use Automatic Duplexing for fax, copy and print operations (For MFC-8640D, MFC-8840D and MFC-8840DN)* on page 2-10.)

If you are having difficulty with your MFC

If you think there is a problem with the way your faxes look, *make a copy first*. If the copy looks good, the problem is probably not your MFC. Check the chart below and follow the troubleshooting tips.

DIFFICULTY	SUGGESTIONS
Printing or Receiving Faxes	
Condensed print and horizontal streaks or the top and bottom of sentences are cut off.	If your copy looks good, you probably had a bad connection, with static or interference on the telephone line. If the copy looks bad, clean the scanner area. If there is still problem, call Brother Customer Service at 1-800-284-4329 (**in USA**) or 1-877-BROTHER (**in Canada**).
Poor quality print.	See *Improving the print quality* on page 12-18.
Vertical black lines when receiving.	Sometimes you may see vertical streaks/black lines on the faxes you receive. Your MFC's primary corona wire for printing may be dirty, or the sending party's fax scanner may be dirty. Clean your primary corona wire (See *Cleaning the drum unit* on page 12-27), or ask the sender to make a copy to see if the problem is with the sending machine. Try receiving from another fax machine. If the problem continues, call Brother Customer Service at 1-800-284-4329 (**In USA**) or 1-877-BROTHER (**In Canada**).
Horizontal streaks; lines are missing.	You may get a fax with horizontal streaks or with missing lines. Usually this is caused by a poor telephone connection. Ask the other party to send the fax again.
Received faxes appear as split or blank pages.	If the received data is divided and printed on two pages or if you get an additional blank page, your Paper Size setting may not be correct for the paper you are using (See *Type and size of paper* on page 2-1). Make sure that auto reduction function setting is turned on. (See *Printing a reduced incoming fax (Auto Reduction)* on page 5-5.)
Phone Line or Connections	
Dialing does not work	Check for a dial tone. Change `Tone/Pulse` setting. (See *Setting Tone and Pulse dialing mode (For Canada only)* on page 4-4.) Check all line cord connections. Check power cord connection. Send a manual fax by pressing **Hook**, or by lifting the external handset and dialing the number. Wait to hear fax receiving tones before pressing **Start**.
The MFC does not answer when called.	Make sure the MFC is in the correct receiving mode for your setup. (See *Basic sending operations* on page 6-6.) Check for a dial tone. If possible, call your MFC to hear it answer. If there is still no answer, check the telephone line cord connection. If there is no ringing when you call your MFC, ask your telephone company to check the line.
Sending Faxes	
Poor sending quality.	Try changing your resolution to `Fine` or `S.Fine`. Make a copy to check your MFC's scanner operation. If copy quality is not good, clean the scanner. (See *Cleaning the scanner* on page 12-25.)
Transmission Verification Report says 'RESULT:NG' or 'RESULT:ERROR'.	There is probably temporary noise or static on the line. Try sending the fax again. If you send a PC FAX message and get 'RESULT:NG' or, on the Transmission Verification Report, your MFC may be out of memory. To gain extra memory, you can turn off Fax Storage (See *Setting Fax Storage* on page 8-3), print fax messages in memory (See *Polling* on page 5-9) or cancel a Delayed Fax or Polling Job (See *Canceling a job while scanning the original* on page 6-11). If the problem continues, ask the telephone company to check your phone line.

DIFFICULTY	SUGGESTIONS
Vertical black lines when sending.	If the copy you made shows the same problem, your scanner is dirty. (See *Cleaning the scanner* on page 12-25.)
Handling Incoming Calls	
MFC 'Hears' Voice as CNG Tone.	If your MFC is set to Easy Receive ON, it is more sensitive to sounds. Your MFC may mistakenly interpret certain voices or music on the line as a calling fax machine and respond with fax receiving tones. Deactivate the fax by pressing **Stop/Exit**. Try avoiding this problem by turning Easy Receive to OFF. (See *Easy Receive* on page 5-4.)
Sending a Fax Call to the MFC.	If you answered at the MFC, press **Start** and hang up immediately. If you answered on an external or extension phone, press your Fax Receive Code (default setting is (✱ 51). When your MFC answers, hang up.
Custom features on a single line.	If you have Call Waiting, Call Waiting/Caller ID, RingMaster, Voice Mail, an answering machine, an alarm system or other custom feature on a single phone line with your MFC, it may create a problem sending or receiving fax data. **For Example:** Your Brother MFC handles the Caller ID subscriber services. However, if you subscribe to Call Waiting or some other custom service and its signal comes through the line while your MFC is sending or receiving a fax, the signal can temporarily interrupt or disrupt the fax data. Brother's ECM feature should help overcome this problem. This condition is related to the telephone system industry and is common to all devices that send and receive information on a single, shared line with custom features. If avoiding a slight interruption is crucial to your business, a separate line with no custom features is recommended.
Menu Setting Difficulties	
The MFC beeps when you try to access the Setup Receive and Setup Send menus.	Make sure that MFC is in Fax mode. If the Fax 🖾 key is not illuminated, press it to turn on Fax mode. Setup Receive setting (**Menu**, **2**, **1**) and Setup Send setting (**Menu**, **2**, **2**) are available only when the MFC is in Fax mode.
Copy Quality Difficulties	
Vertical streaks appear in copies.	Sometimes you may see vertical streaks on your copies. Either the scanner or the primary corona wire for printing is dirty. Clean them both. (See *Cleaning the scanner* on page 12-25 and *Cleaning the drum unit* on page 12-27.)

DIFFICULTY	SUGGESTIONS
Printer Difficulties	
The MFC does not print.	Check the following: • The MFC is plugged in and the power switch turned On. (See the Quick Setup Guide.) • The toner cartridge and drum unit are installed properly. (See *Replacing the drum unit* on page 12-34.) • The interface cable is securely connected between the MFC and computer. (See the Quick Setup Guide.) • Check to see if LCD is showing an error message. (See *Error messages* on page 12-1.)
The MFC prints unexpectedly or it prints garbage.	Reset the MFC or turn it off and then on again. Check the primary settings in your application software to make sure it is set up to work with your MFC.
The MFC prints first couple of pages correctly, then some pages have text missing.	Your computer is not recognizing the printer's input buffer full signal. Please make sure to connect the MFC cable correctly.
The MFC cannot print full pages of a document. `Out Of Memory` message occurs.	Reduce the printing resolution. Reduce the complexity of your document and try again. Reduce the graphic quality or the number of font sizes within your application software.
My headers or footers appear when I view my document on the screen but do not appear when I print them.	Most laser printers have a restricted area that will not accept print. Usually these are the first two lines and last two lines, leaves 62 printable lines. Adjust the top and bottom margins in your document to allow for this.
Scanning Difficulties	
TWAIN errors appear while scanning.	Make sure the Brother TWAIN driver is selected as the primary source. In PaperPort®, click Scan in the File menu and select the Brother TWAIN driver.

DIFFICULTY	SUGGESTIONS
Software Difficulties	
Cannot install software or print.	Run the **MFC-Pro Suite Repair and Install** program on the CD-ROM. This program will repair and reinstall the software.
Cannot perform '2 in 1 or 4 in 1' printing.	Check that the paper size setting in the application and in the printer driver are the same.
Cannot print when using Adobe Illustrator.	Try to reduce the print resolution.
When using ATM fonts, some characters are missing or some characters are printed in their place.	If you are using Windows® 98/98SE/Me, select 'Printer Settings' from the 'Start' menu. Select the properties of the 'Brother MFC-8440, MFC-8640D or MFC-8840D'. Click 'Spool Setting' on the 'Details' tab. Select 'RAW' from 'Spool Data Format.'
"Unable to write to LPT1" or "LPT1 already in use" Error Message appears. "MFC is Busy" or "MFC Connect Failure" Error Message appears.	1. Make sure the MFC is on (plugged into the AC power outlet and turned the power switch on) and that it is connected directly to the computer using a IEEE-1284 bi-directional parallel cable. The cable must not go through another peripheral device (such as a Zip Drive, External CD-ROM Drive, or Switch box). 2. Make sure the MFC is not displaying an error message on the LCD Display. 3. Make sure no other device drivers, which also communicate through the parallel port, are running automatically when you boot up the computer (such as, drivers for Zip Drives, External CD-ROM Drive, etc.) Suggested areas to check: (*Load=, Run=command lines in the win.ini file or the Setup Group*) 4. Check with you computer manufacturer to confirm that the computer's parallel port settings in the BIOS are set to support a bi-directional machine; i.e. (Parallel Port Mode – ECP)
Paper Handling Difficulties	
The MFC does not load paper. The LCD shows `Check Paper` or `Paper Jam`.	Check to see if the `Check Paper` or `Paper Jam` message appears on the LCD. If it is empty, load a new stack of paper into the paper tray. If there is paper in the paper tray, make sure it is straight. If the paper is curled, you should straighten it. Sometimes it is helpful to remove the paper, turn the stack over and put it back into the paper tray. Reduce the amount of paper in the paper tray, and then try again. Check that the manual feed mode or MP tray or MP mode is not selected in the printer driver.
The MFC does not feed paper from the manual feed tray.	Reinsert the paper firmly, load one sheet at a time. Make sure that manual feed mode or MP mode is selected in the printer driver.
How can I load envelopes?	You can load envelopes from the manual feed or MP tray. Your application software must be set up to print the envelope size you are using. This is usually done in the Page Setup or Document Setup menu of your software. Refer to your software application manual.
What paper can I use?	You can use plain paper, envelopes, transparencies and labels that are made for laser machines. (For information on paper you can use, see *Printer operation keys* in Software User's Guide on the CD-ROM.)
How can I clear paper jams?	See *Paper jams* on page 12-6.

| DIFFICULTY	SUGGESTIONS
Print Quality Difficulties	
Printed pages are curled.	Thin or thick paper below the standard can cause this problem. Make sure you select the Paper Type that suits the media type you use. (See *Setting the Paper Type* and *Media Type* in Software User's Guide on the CD-ROM.)
Printed pages are smeared.	The Paper Type setting may be incorrect for the type of print media you are using—**OR**—The print media may be too thick or have a rough surface. (See *Setting the Paper Type* and *Media Type* in Software User's Guide on the CD-ROM.)
Printouts are too light.	Set Toner Save mode to off in the Advance tab in the printer driver. (See *Toner Save* in Software User's Guide on the CD-ROM.)
Network Difficulties	
I cannot print over the Network	Make sure that your MFC is powered on and is On Line and in Ready mode. Press the Test switch. Then the current settings of the NC-9100h are printed.Verify that the cabling and Network connections are good. If possible, try connecting the MFC to a different port on your hub using a different cable. Check to see if there is any LED activity. The NC-9100h has a two color LED for diagnosing problems.

Improving the print quality

This section provides information on the following topics:

Examples of poor print quality	Recommendation
ABCDEFGH **abcdefghijk** **A B C D** **a b c d e** **0 1 2 3 4** **Faint**	Check the printer's environment. Conditions such as humidity, high temperatures, and so on may cause this print fault. (See *Choosing a location* on page ix.) If the whole page is too light, **Toner Save** mode may be on. Turn off **Toner Save** mode in the printer Properties tab of the driver. —**OR**— If your MFC is not connected to a computer, turn off Toner Save mode in the MFC itself. (See *Toner Save* on page 4-9.) Try installing a new toner cartridge. (See *Replacing the toner cartridge* on page 12-28.) Try installing a new drum unit. (See *Replacing the drum unit* on page 12-34.)
ABCDEFGH **abcdefghijk** **A B C D** **a b c d e** **0 1 2 3 4** **Gray background**	Make sure that you use paper that meets the recommended specifications. (See *About paper* on page 2-1.) Check the printer's environment - high temperatures and high humidity can increase the amount of background shading. (See *Choosing a location* on page ix.) Use a new toner cartridge. (See *Replacing the toner cartridge* on page 12-28.) Use a new drum unit. (See *Replacing the drum unit* on page 12-34.)
B **B** **B** **Ghost**	Make sure you use paper that meets our specifications. Rough-surfaced paper or thick print media may cause this problem. Make sure that you choose the appropriate media type in the printer driver. (See *About paper* on page 2-1.) Try using a new drum unit. (See *Replacing the drum unit* on page 12-34.)
ABCDEFGH **abcdefghijk** **A B C D** **a b c d e** **0 1 2 3 4** **Toner specks**	Make sure that you use paper that meets our specifications. Rough-surfaced paper may cause the problem. (See *About paper* on page 2-1.) The drum unit may be damaged. Put in a new drum unit. (See *Replacing the drum unit* on page 12-34.)
B **Hollow print**	Make sure that you use paper that meets our specifications. (See *About paper* on page 2-1.) Choose **Thick paper** mode in the printer driver, or use thinner paper than you are currently using. Check the printer's environment because conditions such as high humidity can cause hollow print. (See *Choosing a location* on page ix.)
All black	You may clear the problem by cleaning the primary corona wire inside the drum unit by sliding the blue tab. Make sure you return the blue tab to the home position (▲). (See *Cleaning the drum unit* on page 12-27.) The drum unit may be damaged. Put in a new drum unit. (See *Replacing the drum unit* on page 12-34.)

Examples of poor print quality	Recommendation
3.7 in. (94 mm) 3.7 in. (94 mm) **White Spots on black text and graphics at 3.7 in. (94 mm) intervals** 94 mm (3.7 in.) 94 mm (3.7 in.) **Black Spots at 3.7 in. (94 mm) intervals**	If the problem is not solved after printing a few pages, the drum unit may have glue from label stock on the OPC drum surface. Clean the drum unit as follows: 1 Position the print sample in front of the drum unit, and find the exact position of the poor print. 2 Turn the drum unit gear by hand while looking at the surface of the OPC drum. 🛈 Do not touch the photosensitive drum with your fingers. Photosensitive drum 3 When you have located the mark on the drum that matches the print sample, wipe the surface of the OPC drum with a cotton swab until the dust or paper powder on the surface comes off. 🛈 Do not try to clean the surface of the photosensitive drum with a sharp object, such as a ball-point pen, and so on. The drum unit may be damaged. Put in a new drum unit. (See *Replacing the drum unit* on page 12-34.)
Examples of poor print quality	Recommendation
Black toner marks across the page	The drum unit may be damaged. Put in a new drum unit. (See *Replacing the drum unit* on page 12-34.) Make sure that you use paper that meets our specifications. (See *About paper* on page 2-1.) If you use label sheets for laser printers, the glue from the sheets may sometimes stick to the OPC drum surface. Clean the drum unit. (See *Cleaning the drum unit* on page 12-27.) Do not use paper that has clips or staples because they will scratch the surface of the drum. If the unpacked drum unit is in direct sunlight or room light, the unit may be damaged.
White lines across the page	Make sure that you use paper that meets our specifications. A rough surfaced paper or thick print media can cause the problem. Make sure that you select the appropriate media type in the printer driver. The problem may disappear by itself. Try printing multiple pages to clear this problem, especially if the printer has not been used for a long time. The drum unit may be damaged. Put in a new drum unit. (See *Replacing the drum unit* on page 12-34.)
Lines across the page	Clean the inside of the printer and the primary corona wire in the drum unit. (See *Cleaning the drum unit* on page 12-27.) The drum unit may be damaged. Put in a new drum unit. (See *Replacing the drum unit* on page 12-34.)
Black lines down the page Printed pages have toner stains down the page.	Clean the primary corona wire of the drum unit. Make sure the primary corona wire cleaner is at the home position (▲). The drum unit may be damaged. Install a new drum unit. (See *Replacing the drum unit* on page 12-34.) The toner cartridge may be damaged. Put in a new toner cartridge. (See *Replacing the toner cartridge* on page 12-28.) Make sure that a torn piece of paper is not inside the printer covering the scanner window. The fixing unit may be smudged. Call Customer Service.
White lines down the page	You may clear the problem by wiping the scanner window with a soft cloth. (See *Cleaning the printer* on page 12-26.) The toner cartridge may be damaged. Put in a new toner cartridge. (See *Replacing the toner cartridge* on page 12-28.)
Page skewed	Make sure the paper or other print media is loaded properly in the paper tray and that the guides are not too tight or too loose against the paper stack. Set the paper guides correctly. If you are using the manual feed tray (or the multi-purpose tray). (See *How to load paper* on page 2-5.) The paper tray may be too full. Check the paper type and quality. (See *About paper* on page 2-1.)
Curl or wave	Check the paper type and quality. High temperatures and high humidity will cause paper to curl. If you don't use the printer very often, the paper may have been in the paper tray too long. Turn over the stack of paper in the paper tray. Also, try fanning the paper stack and then rotating the paper 180° in the paper tray. Try printing using the straight-through output path. (See *How to load paper* on page 2-5.)

Examples of poor print quality	Recommendation
ABCDEFGH abcdefghijk **A B C D** abcde 01234 **Wrinkles or creases**	Make sure that paper is loaded properly. Check the paper type and quality. (See *About paper* on page 2-1.) Try printing using the straight-through output path. (See *How to load paper* on page 2-5.) Turn over the stack of paper in the tray or try rotating the paper 180° in the input tray.

The drum unit is a consumable item and it is necessary to replace it periodically.

Packing and shipping the MFC

Whenever you transport the MFC, use the packing materials that came with your machine. If you do not pack the MFC correctly, you may void your warranty.

1 Turn the MFC power switch off.

2 Unplug the MFC from the telephone wall jack.

3 Unplug the MFC from the AC outlet.

Lock the Scanner Lock

4 Push the Scanner Lock Lever down to lock the scanner. This lever is located on the left of the scanner glass.

Scanner Lock Lever
⚠ **Caution**

Damage caused to your MFC by failure to lock the scanner before moving and shipping may void your warranty.

5 Open the front cover.

6 Remove the drum unit and toner cartridge assembly. Leave the toner cartridge installed in the drum unit.
7 Place the drum unit and toner cartridge assembly into the plastic bag and seal the bag.
8 Close the front cover. Fold down the face-down output tray flap. Remove the telephone line cord.

9 Wrap the MFC in the plastic bag and place it in the original carton with the original packing material.
10 Pack the drum unit and toner cartridge assembly, telephone line cord, AC cord and printed materials in the original carton as shown below:
✎ If you are returning the MFC to Brother as part of the Exchange Service, pack *only* the MFC. Keep all separate parts to use with your 'Exchange' machine.

11 Close the carton and tape it shut.

Routine maintenance

Cleaning the scanner

Turn the MFC power switch off and lift the document cover. Clean the scanner glass and glass strip with dry cloth and the white film with isopropyl alcohol on a lint free cloth.
If the screen *still* displays a scanner error, call Brother Customer Service for assistance at 1-800-284-4329 (**in USA**) or 1-877-BROTHER (**in Canada**).

Cleaning the printer

> **Caution**
> - Do *not* use isopropyl alcohol to remove dirt from the control panel. It may crack the panel.
> - Do *not* use isopropyl alcohol to clean the laser scanner window.
> - Do *not* touch the scanner window with your finger.
> - The drum unit contains toner, so handle it carefully. If toner scatters and your hands or clothes get dirty, immediately wipe or wash it off with cold water.

1 Turn the MFC power switch off and open the front cover.

2 Remove the drum unit and toner cartridge assembly.

> ⚠️ **WARNING**
> Just after you have used the MFC, some internal parts of the machine are extremely **HOT!** When you open the front cover of the MFC, never touch the shaded parts shown in the diagram below.

Front view
3 Gently clean the scanner window by wiping it with a clean soft dry cloth. Do *not* use isoproply alcohol.

Laser Scanner Window
Cleaning the drum unit

We recommend placing the drum unit and toner cartridge assembly on a cloth or large disposable paper to avoid spilling and scattering toner.

1 Clean the primary corona wire inside the drum unit by gently sliding the blue tab from right to left several times.

2 Return the blue tab and snap it into the Home position (▼).

Home Position(▼) Tab Corona Wire
⚠ **Caution**

If the blue tab is not at Home position (▼), printed pages may have vertical stripes.

3 Reinstall the drum unit and toner cartridge assembly into the MFC. (See *Replacing the drum unit* on page 12-34.)

4 Close the front cover.

5 Plug in the power cord *first*, then the telephone cord.

Replacing the toner cartridge

The MFC can print *up to* 6,700 pages using a *high yield* toner cartridge. When the toner cartridge is running low, the LCD shows `Toner Low`. The MFC is supplied with a *standard* toner cartridge that must be replaced after approximately 3,500 pages. Actual page count will vary depending on your average type of original (i.e., standard letter, detailed graphics).

It is a good idea to keep a new toner cartridge ready for use when you see the `Toner Low` warning.

Discard the used toner cartridge according to local regulations, keeping it separate from domestic waste. Be sure to seal the toner cartridge tightly so toner powder does not spill out of the cartridge. If you have questions, call your local waste disposal office.

We recommend that you clean the MFC when you replace the toner cartridge.

How to replace the toner cartridge

⚠ WARNING

Just after you use the MFC, some internal parts of the machine will be extremely **HOT!** So, never touch the shaded parts shown in the illustration.
1 Open the front cover and pull out the drum unit.
ⓘ Caution

■ Place the drum unit on a drop cloth or large piece of disposable paper to avoid spilling and scattering the toner.

■ To prevent damage to the MFC from static electricity, do not touch the electrodes shown below.
2 Hold down the lock lever on the right and pull the toner cartridge out of the drum unit.

Lock Lever
⚠ **Caution**

Handle the toner cartridge carefully. If toner scatters on your hands or clothes, immediately wipe it off or wash it with cold water.

3 Unpack the new toner cartridge. Place the used toner cartridge into the aluminum bag and discard it according to local regulations.

Caution

■ Wait to unpack the toner cartridge until immediately before you install it in the MFC. If a toner cartridge is left unpacked for a long period of time, the toner life is shortened.

■ Brother strongly recommends that you do not refill the toner cartridge provided with your MFC. We also strongly recommend that you continue to use only Genuine Brother Brand replacement toner cartridges (**TN-540** or **TN-570**). Using or attempting to use potentially incompatible toner and/or toner cartridges in your MFC may cause damage to the machine itself and/or it may result in unsatisfactory print quality. Our warranty coverage does not apply to any problem that was caused by the use of unauthorized third party toner and toner cartridges. To protect your investment and guarantee your print quality please continue to replace consumed toner cartridges with only Genuine Brother Branded Supplies.

4 Gently rock the toner cartridge from side to side five or six times to distribute the toner evenly inside the cartridge.
5 Remove the protective cover.
6 Insert the new toner cartridge in the drum unit until it clicks into place. If you put it in properly, the lock lever will lift automatically.

Drum Unit
Toner Cartridge

7 Clean the primary corona wire inside the drum unit by gently sliding the blue tab from right to left several times. Return the blue tab to the Home position (▼) before reinstalling the drum unit and toner cartridge assembly.

Home Position(▼)   Tab   Corona Wire
8 Reinstall the drum unit and toner cartridge assembly and close the front cover.
Replacing the drum unit

The MFC uses a drum unit to create print images on paper. If the LCD shows `Change Drum Soon`, the drum unit is near the end of its life and it is time to purchase a new one.

Even if the LCD shows `Change Drum Soon`, you may be able to continue printing without having to replace the drum unit for a while. However, if there is a noticeable deterioration in the output print quality (even before `Change Drum Soon` appears), then the drum unit should be replaced. You should clean the MFC when you replace the drum unit. (See *Cleaning the drum unit* on page 12-27.)

⚠ Caution

When removing the drum unit, handle it carefully because it contains toner. If toner scatters and your hands or clothes get dirty, immediately wipe or wash with cold water.

> The drum unit is a consumable item, and it is necessary to replace it periodically. There are many factors that determine the actual drum life, such as temperature, humidity, type of paper and how much toner you use for the number of pages per print job. The estimated drum life is *up to* 20,000 pages. The actual number of pages your drum will print may be significantly less than these estimates. Because we have no control over the many factors that determine the actual drum life, we cannot guarantee a minimum number of pages that will be printed by your drum.

⚠ WARNING

Just after you have used the MFC, some internal parts of the MFC are extremely **HOT!** So please be careful.
Follow these steps to replace the drum unit:

1 Press the cover release button and then open the front cover.

2 Remove the old drum unit and toner cartridge assembly. Place it on a drop cloth or disposable paper to avoid scattering toner.
⚠ **Caution**

To prevent damage to the printer from static electricity, do not touch the electrodes shown below.
**3** Hold down the lock lever on the right and pull the toner cartridge out of the drum unit. (See *Replacing the toner cartridge* on page 12-28.)

Lock Lever
Discard the used drum unit according to local regulations, keeping it separate from domestic waste. Be sure to seal the drum unit tightly so toner powder does not spill out of the unit. If you have questions, call your local waste disposal office.

4 Wait to unpack the new drum unit until immediately before installing it. Place the old drum unit into the plastic bag and discard it according to local regulations.

5 Reinstall the toner cartridge into the new drum unit. (See *Replacing the toner cartridge* on page 12-28.)

6 Reinstall the new drum unit, keeping the front cover *open*.

7 Press **Clear/Back**.

8 Press **1** and when the LCD shows Accepted, close the front cover.

```
Replace Drum?

▲    1.Yes
▼    2.No
Select ▲▼ & Set
```

⚠ **Caution**

If toner scatters and your hands or clothes get dirty, immediately wipe off or wash with cold water.
Checking the drum life

You can see the percentage of the drum's life that remains available.

1 Press **Menu**, **2**, **0**, **2**.

2 For five seconds, the LCD shows the available percentage of drum life.

```
20.Miscellaneous
  2.Drum Life

  Remaining:100%
```

Even if the remaining drum life is 0%, you may continue to use the drum unit until you have a print quality problem.

Page Counter

You can see number of total pages, copy pages, print pages and List/Fax (total fax print + total list print) pages that your MFC has printed.

1 Press **Menu**, **2**, **0**, **3**.

2 The LCD shows number of pages for Total and Copy.

   Press ◄► to see Print and List/Fax.

```
20.Miscellaneous
  3.Page Counter
▲    Total   :123456
▼    Copy    :120002
```

3 Press **Stop/Exit**.

13 Optional accessories

Memory board

The memory board is installed on the main controller board inside the MFC. When you add the optional memory board, it increases the performance for both copier and printer operations.

Model Name	Optional Memory
MFC-8440 (32 MB Standard Memory)	32MB TECHWORKS 12457-0001
MFC-8640D (16 MB Standard Memory	64MB TECHWORKS 12458-0001
MFC-8840D (32 MB Standard Memory)	128MB TECHWORKS 12459-0001
MFC-8840DN (32 MB Standard Memory)	

In general, the DIMM must have the following specifications:

Type: 100 pin and 32 bit output

CAS Lantency: 2 or 3

Clock Frequency: 100MHz or more

Capacity: 32, 64, 128MB

Height: 1.4 inches (35mm) or less

Parity: NONE

DRAM Type: SDRAM 4 Bank

Some DIMMs might not work with this MFC. For the latest information from Brother visit:

http://solutions.brother.com

Installing the optional memory board

⚠ WARNING

■ DO NOT touch the surface of the main board within 15 minutes after turning off the power.

■ Before installing the optional memory board, make sure there are no faxes in the memory.

1 Disconnect the telephone line cord, turn the MFC power switch off, unplug the MFC power cord from the AC outlet, and then disconnect the interface cable.

⚠ WARNING

Turn the MFC power switch off, before installing (or removing) the memory board.
2 Remove the side cover. Loosen the two screws, and then remove the metal shield plate.
3 Unpack the DIMM and hold it by the edges.

⚠ WARNING

DIMM boards can be damaged by even a small amount of static electricity. Do not touch the memory chips or the board surface. Wear an antistatic wrist strap when you install or remove the board. If you do not have an antistatic wrist strap, frequently touch the bare metal on the printer.

4 Hold the DIMM with your fingers on the side edges and your thumb on the back edge. Line up the notches on the DIMM with the DIMM slot. (Check that the locks on each side of the DIMM slot are open or facing outwards.)
5 Press the DIMM straight into the slot (press firmly). Make sure the locks on each side of the DIMM click into place. (To remove a DIMM, you must release the locks.)

6 Put the metal plate back on and secure the metal plate with the two screws.

7 Put the side cover back on.

8 Reconnect the telephone line cord.

9 Reconnect any additional interface cables that you removed.

10 Reconnect the power cable and then turn on the MFC power switch.

✎ You can check the current memory size in the user setting list. (See *Printing reports* on page 9-3.)

⚠ WARNING

If the Status LED turns Red for a Service Error, please call Brother Customer Service at: 1-800-284-4329 (in USA) or 1-877-BROTHER (in Canada).

Network (LAN) board

When you add the optional Network (LAN) Board (NC-9100h), you can connect your MFC into the network to use the Internet FAX, Network Scanner, Network Printer and Network Management operations.

⚠ WARNING

DO NOT touch the surface of the main board within 15 minutes after turning off the power.

For more details about how to configure the Network board, please see the NC-9100h Network User's Guide on the CD-ROM supplied with the MFC.
NC-9100h
Print/Fax Server

Before starting installation

Be careful when handling the NC-9100h. There are many delicate electronic components that are susceptible to damage from static electricity. To avoid such damage, use the following precautions when handling the board.

■ Leave the NC-9100h in its anti-static bag until you are ready to install it.

■ Make sure that you are adequately grounded before touching the NC-9100h. Use an anti-static wrist strap and a grounding mat if possible. If you do not have an anti-static wrist strap, touch the bare metal surface on the back of the machine before handling the NC-9100h.

■ Avoid moving around the work area in order to eliminate static charge build-up.

■ If possible, do not work on a carpeted area.

■ Do not flex the board and do not touch the components on the card.

Tools Required:

Phillips Screwdriver ⊕

Step 1: Hardware installation

⚠️ **WARNING**

DO NOT touch the surface of the main boards within 15 minutes after turning off the power.

1 Disconnect the telephone line cord, turn the MFC power switch off, unplug the MFC power cord from the AC outlet, and then disconnect the interface cable.

⚠️ WARNING

Turn the MFC power switch off, before installing (or removing) the NC-9100h board.
**2** Remove the side cover. Loosen the two screws, and then remove the metal shield plate.
3 Loosen the two screws, and then remove the metal cover plate.

Cover Plate
4 Plug the NC-9100h into connector P1 located on the main board as shown in the illustration (press firmly) and secure the NC-9100h with the two screws.
5 Put the metal shield plate back on and secure it with the two screws.

6 Put the side cover back on.

7 Reconnect the telephone line cord.

8 Reconnect any additional interface cables that you removed.

9 Reconnect the power cable and then turn on the MFC power switch.

10 Press the Test switch and print a network configuration page. (See *TEST SWITCH* on page 13-9.)

Step 2: Connecting the NC-9100h to an Unshielded Twisted Pair 10BASE-T or 100BASE-TX Ethernet Network

To connect the NC-9100h to a 10BASE-T or 100BASE-TX Network, you must have an Unshielded Twist Pair Cable. One side of the cable must be connected to a free port on your Ethernet hub and the other side must be connected to the 10BASE-T or 100BASE-TX connector (an RJ45 Connector) of the NC-9100h.
Verifying successful hardware Installation:

Plug in the AC power cord. After initialization and warm-up (this may take several seconds), the machine will come to a Ready state.

LED

No light:

If both of the two LEDs are off, then the print server is not connected to the network.

Link/Speed LED is orange: Fast Ethernet

This Link/Speed LED will be orange if the print server is connected to a 100BASETX Fast Ethernet network.

Link/Speed LED is green: 10 BASE T Ethernet

This Link/Speed LED will be green if the print server is connected to a 10 BASE T Ethernet.

Active LED is yellow:

The Active LED will blink if the print server is receiving or transmitting data.

✎ If there is a valid connection to the network, the LED will blink orange or green.

TEST SWITCH

Short push: Prints the network configuration page.

Long push (more than 5 seconds): Reset the network configuration back to the factory default settings.
✎ To set up the MFC on the Network, see the *NC-9100h Network User's Guide* on the CD-ROM.

Paper Tray #2

You can purchase the Paper Tray #2 accessory (LT-5000) to use as a third paper source. Tray #2 holds up to 250 sheets of 20 lb (80 g/m^2) paper.

Paper Tray #2	Holds approx. 250 sheets of 20 lb (80 g/m^2)
Basis Weight	16 to 28 lb (60 to 105 g/m^2)
Moisture Content	4% to 6% by weight
We Recommend: Cut sheet:	Xerox 4200 DP 20 lb Hammermill Laser Paper 24 lb

_G_ **Glossary**

ADF (Automatic Document Feeder) The original can be placed in the ADF and scanned one page at a time automatically.

Auto Dial List A listing of names and numbers stored in One-Touch and Speed-Dial memory, in numerical order.

Automatic fax transmission Sending a fax without picking up the handset of an external phone (or pressing **Hook**).

Automatic Redial A feature that enables your MFC to redial the last fax number if the fax did not go through because the line was busy.

Auto Reduction Reduces the size of incoming faxes.

Batch Transmission As a cost savings feature, all delayed faxes to the same fax number will be sent as one transmission.

Beeper The sound the keys make when they are pressed, an error occurs, or a fax has been received or sent.

Beeper volume Volume setting for the beep when you press a key or make an error.

Broadcasting The ability to send the same fax message to more than one location.

Caller ID A subscriber service purchased from the Telephone Company that lets you see the number (or name) of the party calling you. Your MFC stores the latest callers so you can print a Log and view caller information.

CNG tones The special tones (beeps) sent by fax machines during automatic transmission to tell the receiving machine that they are from a fax machine.

Communication error (or Comm. Error) An error during fax sending or receiving, usually caused by line noise or static.

Coding Method Method of coding the information contained in the original. All fax machines must use a minimum standard of Modified Huffman (MH). Your MFC is capable of greater compression methods, Modified Read (MR), Modified Modified Read (MMR) and JBIG, if the receiving machine has the same capability.

Compatibility Group The ability of one fax unit to communicate with another. Compatibility is assured between ITU-T Groups.

Contrast Setting to compensate for dark or light originals, by making faxes or copies of dark originals lighter and light originals darker.

Cover Page Prints a page at the other party's fax machine that contains the sender and recipient's name and fax number, number of pages and comment. You can generate an electronic cover page at the other end with pre-programmed information from memory or you can print a sample cover page to fax with your original.

Cover Page Message The comment that is on the Cover Page. This is a programmable feature.

Delayed Fax Sends your fax at a later time that day.

Distinctive Ring A subscriber service purchased from the telephone company that provides another phone number on an existing phone line. The Brother MFC uses the new number to simulate a dedicated fax line.

Drum Unit A printing device for the MFC.

Dual Access Your MFC can scan outgoing faxes or scheduled jobs into memory at the same time it is sending a fax or receiving or printing an incoming fax.

Easy Receive Enables your MFC to respond to CNG tones if you interrupt a fax call by answering it.

ECM (Error Correction Mode) Detects errors during fax transmission and resends the pages of the fax that had an error.

Extension phone A telephone on the fax number that is plugged into a separate wall jack.

External phone A TAD (telephone answering device) or telephone that is plugged into the EXT jack of your MFC.

F/T Ring Time The length of time that the Brother MFC rings (when the Receive Mode setting is Fax/Tel) to notify you to pick up a voice call that it answered.

Fax Activity Report Lists information about the last 200 incoming and outgoing faxes. TX means Transmit. RX means Receive.

Fax Forwarding Sends a fax received into the memory to another preprogrammed fax number.

Fax Receive Code Press this code ($\ast$ **51**) when you answer a fax call from an extension or external phone to transfer the call to the MFC.

Fax Storage You can print stored faxes later, or retrieve them from another location using Fax Forwarding, Paging, or Remote Retrieval operations.

Fax/Tel You can receive faxes and telephone calls. Do not use this mode if you are using a telephone answering device (TAD).

Fax tones The signals sent by sending and receiving fax machines while communicating information.

Fine resolution Resolution is 203×196 dpi. It is used for small print and graphs.

Gray scale The shades of gray available for copying and faxing photographs.

Group number A combination of One-Touch, Speed-Dial numbers that are stored as a Speed-Dial number for Broadcasting.

Help list A printout of the complete Menu that you can use to program your MFC when you do not have the User's Guide with you.

Interval The preprogrammed time period between automatically printed Activity Reports. You can print Activity Reports on demand without interrupting this cycle.

LCD (liquid crystal display) The display screen on the MFC that shows interactive messages during On-Screen Programming and shows the date and time when the MFC is idle.

Manual fax When you lift the handset of your external telephone or press **Hook** so you can hear the receiving fax machine answer before you press Start to begin transmission.

Menu mode Programming mode for changing your MFC's settings.

MFL-Pro Suite Turns your MFC into a printer and a scanner and enables PC faxing using the MFC.

OCR (optical character recognition) The bundled ScanSoft® OmniPage® software application converts an image of text to text you can edit.

One-Touch Keys on the MFC control panel where you can store numbers for easy dialing. You can store a second number on each key if you press **Shift** and the One-Touch key together.

Out of Paper Reception Receives faxes into the MFC's memory when the machine is out of paper.

Overseas Mode Makes temporary changes to the fax tones to accommodate noise and static on overseas phone lines.

Paging This feature enables your MFC to call your pager when a fax is received into its memory.

Pause Allows you to place a 3.5 second delay in the dialing sequence stored on Speed-Dial numbers. Press **Pause** as many times as needed for longer pauses.

Photo resolution A resolution setting that uses varying shades of gray for the best representation of photographs.

Polling The process of a fax machine calling another fax machine to retrieve waiting fax messages.

Pulse A form of rotary dialing on a telephone line.

Real Time Transmission When memory is full, you can send faxes in real time.

Remaining jobs You can check which jobs are waiting in memory and cancel jobs individually.

Remote Retrieval Access The ability to access your MFC remotely from a touch tone phone.

Remote Access Code Your own four-digit code that allows you to call and access your MFC from a remote location.

Resolution The number of vertical and horizontal lines per inch. See: Standard, Fine, Super Fine and Photo.

Ring Delay The number of rings before the MFC answers in FAX mode.

Ring Volume Volume setting for the MFC's ring.

Scanning The process of sending an electronic image of a paper document into your computer.

Search An electronic, alphabetical listing of stored One-Touch, Speed-Dial and Group numbers.

Speed-Dial A preprogrammed number for easy dialing. You must press the **Search/Speed Dial** key and then **#**, and the three digit code to start the dialing process.

Standard resolution 203 x 97 dpi. It is used for regular size text and quickest transmission.

Station ID The stored information that appears on the top of faxed pages. It includes the sender's name and fax number.

Super fine resolution 203 x 391 dpi. Best for very small print and line art.

TAD (telephone answering device) You can connect an external TAD to the EXT. jack of the MFC.

Telephone Answer Code (Fax/Tel mode) When the MFC answers a voice call, it pseudo/double-rings. You can pick up at an extension phone by pressing this code (**#51**).

Temporary Settings You can select certain options for each fax transmission and copy without changing the default settings.

Tone A form of dialing on the telephone line used for Touch Tone telephones.

Toner cartridge An accessory that holds toner for the drum unit on Brother laser models.

Toner Save A process that causes less toner to be affixed to the page to extend the life of the toner assembly. This will make the receiving document significantly lighter.

Transmission The process of sending faxes over the phone lines from your MFC to the receiving fax machine.

Transmission Verification Report A listing for each transmission, that shows its date, time and number.

True Type fonts The fonts that are used in the Windows® operating systems. If you install the Brother True Type fonts, more types of fonts will be available for Windows® applications.

User Settings A printed report that shows the current settings of your MFC.

S Specifications

Product description

The MFC-8440, MFC-8640D, MFC-8840D and MFC-8840DN are **5 in 1** Multi-Function Centers: Printer, Copier, Color Scanner, Fax, and PC-FAX (via your PC). The MFC-8640D and MFC-8840D include Duplex Printing. The MFC-8840DN includes Duplex Printing and Network capability.

General

Memory Capacity	16 MB (MFC-8640D)
	32 MB (MFC-8440/8840D/8840DN)
Optional Memory	1 DIMM slot; Memory expandable up to 160 MB
Automatic Document Feeder (ADF)	Up to 50 pages
	Temperature: 68°F - 86°F (20°C - 30°C)
	Humidity: 50% - 70%
	Paper: 20 lb or 75 g/m^2 Letter size
Paper Tray	250 Sheets (20 lb)
Multi-Purpose Tray	50 Sheets (20 lb) (MFC-8640D/8840D/8840DN only)
Manual Feed Tray	Single sheet (20 lb) (MFC-8440 only)
Printer Type	Laser
Print Method	Electrophotography by semiconductor laser beam scanning
LCD (Liquid Crystal Display)	22 characters $\times$ 5 lines
Warm-up	Max. 18 seconds at 73.4°F (23°C)
Power Source	120V AC 50/60Hz (USA, Canadian Version Only)
Power Consumption	Average Operating (Copying): 450 W or less (25°C)
	Peak: 1090 W or less
	Sleep: 14 W or less
	16 W or less (When Network LAN board (NC-9100h) is installed.)
	Standby: 85 W or less (25°C)
Dimensions	21.28 x 17.76 x 18.76 (in.)
	532 $\times$ 444 $\times$ 469 (mm)
Weight	Without Drum/Toner Unit:
	MFC-8440: 36.6 lb/16.6 kg
	MFC-8640D/8840D/8840DN: 39.9 lb/18.1 kg
Noise	Operating: 53 dB A or less
	Standby: 30 dB A or less

General (continued)

Temperature	Operating:	50 - 90.5°F (10 - 32.5°C)
	Storage:	32 - 104°F (0 - 40°C)
Humidity	Operating:	20 to 80% (without condensation)
	Storage:	10 to 90% (without condensation)

Print media

Paper Input   **Paper Tray**

- Paper type:

  Plain paper, recycled paper and transparencies, envelopes (Manual Feed/Multi-purpose Tray)

- Paper size:

  A4, Letter, Legal, B5 (ISO), B5 (JIS), Executive, A5, A6, B6 (ISO)

  Weight: 16 - 28 lb (60 - 105 g/m^2) (Paper Tray)

  For more details, see *Paper specifications for each paper tray* on page 2-4.

- Maximum paper tray capacity: Approx. 250 sheets of 20 lb (80 g/m^2) plain paper

- Maximum multi-purpose tray capacity: Approx. 50 sheets of 20 lb (80 g/m^2) plain paper (MFC-8640D/8840D/8840DN only)

Manual Feed Tray/Multi-Purpose Tray

- Paper size:

  Width: 20 lb 2.75 - 8.66" (69.8 - 220.0 mm)

  Height: 4.57 - 16.00" (116.0 - 406.4 mm)

  Weight: 16 - 43 lb (60 - 161 g/m^2)

Paper Output   Up to 150 sheets of plain paper (Face down print delivery to the output paper support)

Copy

Color/Monochrome	Monochrome
Copy Speed	Up to 21 copies/minute (Letter paper) Up to 20 copies/minute (A4 paper)
Multiple Copies	Stacks or Sorts up to 99 pages
Enlarge/Reduce	25% to 400% (in increments of 1%)
Resolution	Max. 1200 x 600 dpi

Fax

Compatibility	ITU-T Group 3
Coding System	MH/MR/MMR/JBIG
Modem Speed	33600-2400 bps Automatic Fallback
Original Size	ADF Width: 5.8" to 8.5" (148 mm to 216 mm) ADF Height: 5.8" to 14.0" (148 mm to 356 mm) Scanner Width: Max. 8.48" (212 mm) Scanner Height: Max. 14.0" (356 mm)
Scanning Width	8.2 inches (208 mm)
Printing Width	8.2 inches (208 mm)
Gray Scale	64 levels
Polling Types	Standard, Sequential
Contrast Control	Automatic/Light/Dark (manual setting)

Resolution	• Horizontal 203 dot/inch (8 dot/mm)
	• Vertical
	  • Standard 98 line/inch (3.85 line/mm)
	  • Fine, Photo 196 line/inch (7.7 line/mm)
	  • Superfine 392 line/inch (15.4 line/mm)

One-Touch Dial	40 (20 $\times$ 2)
Speed-Dial	300 stations
Automatic Redial	one time
Auto Answer	0, 1, 2, 3 or 4 rings
Communication Source	Public Switched Telephone Network.
Memory Transmission	Up to 480[1]/400[2] pages
Out of Paper Reception	Up to 480[1]/400[2] pages

---

[1] "Pages" refers to the "Brother Standard Chart No. 1" (a typical business letter, Standard resolution, JBIG code). Specifications and printed materials are subject to change without prior notice.

[2] "Pages" refers to the "ITU-T Test Chart #1" (a typical business letter, Standard resolution, JBIG code). Specifications and printed materials are subject to change without prior notice.

Scanner

Color/Monochrome	Color/Monochrome
TWAIN Compliant	Yes (Windows® 98/98SE/Me/2000 Professional and Windows NT® Workstation Version 4.0)
	Mac OS® 8.6 - 9.2/Mac OS® X 10.2.1 or greater
WIA Compliant	Yes (Windows® XP)
Resolution	Up to 9,600 × 9,600 dpi (interpolated)*
	Up to 600 × 2,400 dpi (optical)
	*Maximum 1200 x 1200 dpi scanning with Windows® XP (resolution up to 9600 x 9600 dpi can be selected by using the Brother scanner utility)
Document Size	ADF Width: 5.8" to 8.5" (148 mm to 216 mm)
	ADF Height: 5.8" to 14.0" (148 mm to 356 mm)
	Scanner Glass Width: Max. 8.5" (216 mm)
	Scanner Glass Height: Max. 14.0" (356 mm)
Scanning Width	8.35 inches (212 mm)
Gray Scale	256 levels

■ Scanning directly to a networked PC is available with Windows® 98/98SE/Me/2000 Professional and XP.

■ Mac OS® X scanning is supported in Mac OS® X 10.2.1 or greater.

Printer

Emulation	PCL6 (Brother Printing System for Windows® emulation mode of HP LaserJet) and BR-Script (PostScript®) Level 3
Printer Driver	Windows® 98/98SE/Me/2000 Professional/XP and Windows NT® Workstation Version 4.0 driver supporting Brother Native Compression mode and bi-directional capability
	Apple® Macintosh® QuickDraw® Driver and PostScript (PPD) for Mac OS® 8.6 - 9.2/ Mac OS® X 10.1/10.2.1 or greater
Resolution	HQ1200 (Max. 2400 × 600 dots/inch)
Print Quality	Normal printing mode
	Economy printing mode (saves toner usage)
Print Speed	Up to 21 pages/minute letter size (when loading paper from paper tray)
Duplex Printing	Up to 9 pages/minute: (MFC-8640D/8840D/ 8840DN only)
	(9 sides per minute, 4.5 sheets per minute)
First Print	Up to 12 seconds (using letter size paper in paper tray)

Interfaces

Interface	**Recommended Cable**
Parallel	A bi-directional shielded parallel cable that is IEEE 1284 compliant and not longer than 6 feet (2 m).
USB	A USB 2.0 Hi-Speed cable that is not longer than 6 feet (2 m).

■ Please make sure that you use a Hi-Speed USB 2.0 certified cable if your computer uses a Hi-Speed USB 2.0 interface.

■ Even if your computer has a USB 1.1 interface you can connect the MFC.

Computer requirements

Minimum System Requirements						
Computer Platform & Operating System Version		**Processor Minimum Speed**	**Minimum RAM**	**Recommended RAM**	**Available Hard Disk Space**	
					for Drivers	for Applications*2
Windows® *1 Operating System	98, 98SE	Pentium II or equivalent	32 MB	64 MB	90 MB	130 MB
	Me					
	NT® Workstation 4.0		64 MB	128 MB		
	2000 Professional					
	XP		128 MB	256 MB	150 MB	220 MB
Apple® Macintosh® Operating System	Mac OS® 8.6 - 9.2 (Printing, Scanning and PC-FAX Send Only)	All base models meet minimum Requirements	64 MB		80 MB	200 MB
	Mac OS® X 10.1/10.2.1 or greater (Printing, Scanning*3 and PC-FAX Send Only)		128 MB	160 MB		
NOTE: All registered trademarks referenced herein are the property of their respective companies.						
For the latest drivers, go to the Brother Solutions Center at http://solutions.brother.com/						

*1 Microsoft® Internet Explorer 5 or greater.
*2 Application software is different for Windows® and Macintosh®.
*3 Scanning is supported in 10.2.1 or greater.

Consumable items

Toner Cartridge Life Expectancy

TN-540: Standard Toner Cartridge - Up to 3,500* pages
TN-570: High Yield Toner Cartridge - Up to 6,700* pages

* (when printing letter size or A4 paper at 5% print coverage)

Toner life expectancy will vary depending upon the type of average print job.

Drum Unit Life Expectancy

Up to 20,000 pages/drum unit (DR-510)

There are many factors that determine the actual drum life, such as temperature, humidity, type of paper, toner you use and number of pages per print job.

Network (LAN) board (NC-9100h)

MFC-8440 (Option)
MFC-8640D (Option)
MFC-8840D (Option)
MFC-8840DN (Standard)

When you add the optional Network (LAN) Board (NC-9100h), you can connect your MFC into the network to use the Internet FAX, Network Scanner, Network Printer and Network Management software operations for small workgroups.

SMTP/POP3 E-mail Services are required for Internet Fax.

Support for:

Windows® 98/Me/NT® 4.0/2000/XP
Novell NetWare 3.X, 4.X, 5.X
Mac OS® 8.6 - 9.2, X 10.1/10.2.1 or greater
Ethernet 10/100 BASE-TX Auto Negotiation
TCP/IP, IPX/SPX, AppleTalk, DLC/LLC
RARP, BOOTP, DHCP, APIPA, NetBIOS, WINS
LPR/LPD, Port9100, SMTP/POP3
SMB(NetBIOS/ IP), IPP, SSDP
mDNS, FTP
MIBII as well as Brother private MIB
TELNET, SNMP, HTTP, TFTP

Included Utilities:

BRAdmin Professional and Web Based Management

■ Scanning directly to a networked PC is not supported in Windows NT® and Mac OS®.

■ BRAdmin Professional is not supported in Mac OS®.

Optional External Wireless Print/Scan Server (NC-2200w)

NC-2200w External Wireless Print/Scan Server (Optional)	Connecting the optional External Wireless Print/Scan Server (NC-2200w) to your MFC will allow you to print and scan over a wireless network.
Network types	IEEE802.11b wireless LAN
Support for	Windows® 98/98SE/Me/2000/XP and Windows NT® Mac OS® X 10.2.4 or greater
Protocols	TCP/IP ARP, RARP, BOOTP, DHCP, APIPA (Auto IP), WINS/NetBIOS, DNS, LPR/LPD, Port9100, SMB Print, IPP, RawPort, mDNS, TELNET, SNMP, HTTP

■ Scanning directly to a networked PC is not supported in Windows NT® and Mac OS®.

■ You can assign the scan key to one networked computer only.

Index

Remote Retrieval Access card

If you plan to receive fax messages while away from your MFC, carrying the Remote Retrieval Access Card printed below will serve as a convenient reminder of the retrieval procedures. Simply cut out the card and fold it to fit your wallet or organizer. Keeping it handy will help you derive the full benefit of your MFC's Fax Forwarding, Paging and Remote Retrieval features.

Fold →   ← Fold

REMOTE RETRIEVAL ACCESS CARD

Using Remote Access Code

1. Dial your fax number from a telephone or fax machine using touch tone.
2. When your MFC answers, immediately enter your Remote Access Code (3 digits followed by ✱).
3. Your MFC signals the kinds of messages it received:
   1 long beep — Fax messages
   No beeps — No messages.
4. After 2 short beeps, enter a command.
5. Press **9 0** to reset your MFC when you finish.
6. Hang up.

❶

❹

CHECK RECEIVING STATUS
Press **9 7 1**
   1 long beep — Fax messages
   3 short beeps — No messages

CHANGE RECEIVE MODE
Press **9 8**
then for **External TAD**, press **1**.
   Fax/Tel, press **2**.
   Fax Only, press **3**.

EXIT REMOTE OPERATION
Press **9 0**.

Changing Remote Access Code

When you are at the machine:

1 Press **Menu, 2, 5, 3**.

2 Enter a three-digit number from 000 to 999.

The ✱ cannot be changed.

3 Press **Set**.

4 Press **Stop**.

Remote Commands

CHANGE PAGING/FAX FORWARDING SETTING

Press **9 5**.

then to
Turn feature Off, press **1**.
Select Fax Forwarding, press **2**.
Select Paging, press **3**.

Program Fax Forwarding Number, press **4**. Enter the new fax number where you want your fax messages forwarded followed by **# #**.

Turn Fax Storage On, press **6**.
Turn Fax Storage Off, press **7**.

RETRIEVE A FAX

Press **9 6**.

then to
Retrieve all faxes, press **2**.
then enter the number of remote fax machine followed by **# #**.
After the beep, hang up and wait.
Erase all fax messages, press **3**.

EQUIPMENT ATTACHMENT LIMITATIONS
(Canada only)

NOTICE

This product meets the applicable Industry Canada technical specifications.

NOTICE

The Ringer Equivalence Number is an indication of the maximum number of devices allowed to be connected to a telephone interface. The termination on an interface may consist of any combination of devices subject only to the requirement that the sum of the RENs of all the devices does not exceed five.
